Analysis prepared by **Jeff Lye, CFA** on Aug 07, 2023 05:40 AM ET, when the stock traded at **DKK 12,600.00**.

Highlights

- Maersk's Q2 2023 EBITDA of USD2.9 billion (-72% Y/Y; -27% Q/Q) was 16% above consensus estimate, attributed to good cost management instead of strong rates, in our view. The fall in earnings was mainly caused by Ocean (-76% Y/Y; -33% Q/Q) on reduced freight rates (-51% Y/Y; -15% Q/Q) and weaker volumes (-6% Y/Y; +7% Q/Q).
- Maersk lifted the bottom end of its 2023 EBITDA guidance to USD9.5-USD11.0 billion from USD8.0-11.0 billion reflecting the stronger H1 2023 results but lowered its 2023 market volume outlook to -4.0% to -1.0% (previously -2.5% to +0.5%) on continued inventory correction till the end of 2023. We think the implied sequential drop in H1 2023 earnings reflects the ongoing decline in Maersk's contracted rate given that they are being reset to a level nearer to the spot which has fallen sharply since mid-2022. Also, we gathered that the industry's supply of new vessels may increase freight capacity by 9% and 10% in 2023 and 2024 respectively, which we think will outgrow demand causing overcapacity and further deterioration in freight rates.
- We forecast EPS of USD220 for 2023 and USD100 for 2024 as we expect a further weakness in freight rates.

Investment Rationale/Risk

- Our call is 2-STARS (Sell). We believe Maersk's near-term financial performance will be vulnerable to lower freight rates, which have been on a downward trend due to continuing subdued demand and easing of port congestion which release capacity back into service. Furthermore, we think the negative feedback loop to freight rates will continue and think its customers may seek renegotiation given the price differential between contract and spot has widened. Also, the overhang situation may be amplified by the entry of new vessels which are projected to increase the industry's supply by 9 and 10% in 2023 and 2024 respectively. Nonetheless, we are positive about its long-term strategy of growing its non-ocean logistic business to complement its core business with end-to-end solutions.
- Upside risks include strong economic growth, which improves shipping activities, a positive reversal in freight rates, and effective cost management.
- Our 12-month target price for Maersk of DKK9,500 reflects a 3.0x 2024 EV/EBITDA, broadly in line with peer average.

Analyst's Risk Assessment

LOW | **MEDIUM** | HIGH

Our risk assessment reflects the strength of Maersk's scale and balance sheet, which helps it compete in a highly competitive market. Its strategy to grow non-ocean logistics also helps to complement its ocean business.

A.P. Møller - Mærsk A/S

Business Summary Aug 07, 2023

Founded in 1904, A.P. Moller – Maersk is a Danish integrated transport and logistics company with roughly 80,000 employees across operations in 130 countries. In 2016, Maersk made a strategic decision to transform the company from being a conglomerate with diversified business interests to focusing on becoming a global leader in container logistics, building its strong position in container shipping, ports, and container-based landside logistics. It disposed of Maersk Oil, Maersk Drilling, and Maersk Tankers during 2017 and 2019. In November 2017, Maersk acquired Hamburg Sud, the 7th largest container shipping line globally, to strengthen the Ocean network. As of end 2022, Maersk is one of the world's largest container shipping lines with market shares of around 17%.

BUSINESS DIVISION: Ocean is Maersk's main business operation accounted for 75% of 2022 total revenue, followed by Logistics (17%), Terminals (5%), and Towage & Marine Services (3%). i) Ocean segment engages in container shipping activities such as demurrage and detention, terminal handling, documentation services, container services, and container storage, as well as transshipment services under Maersk Line, Safmarine, Sealand – A Maersk Company, Hamburg Süd, and APM Terminal brands. As of end 2022, its vessel fleet size was 707 (owned 318 and chartered 389) with an average fleet capacity of 4,285,000 twenty-foot equivalent unit (TEU).

ii) Logistics and Services segment offers freight forwarding, supply chain management, inland services, and intermodal under Damco, Maersk Line, Safmarine, and Sealand – A Maersk Company brands. iii) Terminals segment is involved in gateway terminal activities and is an important part of the end-to-end container shipping supply chain. iv) Towage and Marine Services is mainly involved in towage among Maersk's terminals and fleet supply services. The towage revenue is measured on a "per move" basis by charging for moving containers on and off ships.

MARKET PROFILE: Maersk is one of the world's largest container shipping companies with a total market share of around 17% in capacity, as of the end of 2022, trailing after MSC's but ahead of CMA CGM's 13% and COSCO's 12%. Over the years, the industry has consolidated, with the top 5 operators now account for around 65% of the market. Nevertheless, the industry remains competitive as the freight rate fluctuates based on the supply-demand dynamics. In 2015, Maersk and MSC formed a 10-year 2M Alliance, which involves vessel-sharing agreements on Asia-Europe, Trans-Pacific, and Trans-Atlantic routes to save cost and improve capacity utilization rates. However, the alliance is expected to end by January 2025 as they intend to pursue their respective strategies and be quick to adopt changes in response to market needs. In 2022, 46% of Maersk's loaded volume was from East-West trades, followed by 32% in North-South and 22% in Intra-regional.

CORPORATE STRATEGY: Maersk continues to enhance its position as a leading integrator of container logistics via better reliability, better services, and selling unique products. In order to enhance its end-to-end logistics solutions, Maersk is expected to see stronger growth in its non-ocean services to create a more diversified business model through M&A and improvement of its existing operations. Also, Maersk is investing in digitizing its global supply chain solutions, where customers can have access to live data insights and manage services via an online channel.

Maersk outlined multiple mid-term targets in its Roadmap 2021-2025, including ii) group's cumulative return on invested capital of over 12%, ii) Ocean's EBIT margin of over 6% with 4.1-4.3 TEU of fleets, iii) Logistics & Services' revenue growth of over 10% and EBIT margin of over 6%, and iv) Terminals' return on invested capital of over 9%.

FINANCIAL TREND: Maersk's total revenue was stable between USD39 billion and USD40 billion from 2018 through 2020, only to surge to USD61.8 billion in 2021 and USD 81.5 billion in 2022. The strong sales growth in recent two years was underpinned by exceptionally high freight rates caused by port congestion, bottleneck across the entire supply chain and pent-up shipping demand as covid-19 eases. Consequentially, EBITDA nearly tripled Y/Y to USD24.0 billion in 2021 and further grew 53% in 2022 to USD36.8. Meanwhile, Ocean loaded volume fell to 12 billion forty-foot equivalent units (FFE), from 2018-2021 average of around 13 billion FFE owing to weakening demand during late-2022. For Logistics & Services, the EBITDA grew to USD944 million in 2022 from USD678 in 2021 due to margin optimization in intermodal, increased profitability in warehousing and distribution facilities in North America, as well as inorganic growth through M&A. 2022 free cash flow soared to USD27.1 billion from USD16.5 billion a year ago, which enabled balance sheet deleveraging (net cash of USD12.6 billion from net debt of USD1.5 billion), and facilitated higher share buybacks of around 3.0 billion and dividends of DKK4,300/share from DKK2,500/share a year ago.

Industry Outlook

We maintain our sector recommendation for EMEA Industrial sector at neutral for Q4 2023 and 2024. We believe that the key issue facing the sector is the surge in energy price arising from the concern on potential supply disruption from the Middle East. However, supply chain disruptions have eased. This could be attributed to slower demand for goods and weak economy growth in China. In the past 12 months, the Shanghai Containerized Freight Index (SCFI) has declined about 30% to about $900 per TEU. This is a signal of weak demand on global movement of cargoes.

Year to date as of October 16, 2023, the EMEA Industrial Index is up 13.0% versus the S&P Europe 350 Index increase of 10.0%. However, in Q3 2023, the EMEA Industrial sector's performance was at -3.8%, which is below S&P Europe 350's -1.8%.

The eurozone's annual inflation rate dropped to 4.3% in September (from August's 5.2%). We expect lower inflation impact to be positive to industrial sector earnings as it lowers cost and widens operating margin. In Q4 2023, industrial players will likely focus on revenue growth via business volume increase instead of average selling price increases. For Q4 2023, the outlook should turn more positive as inflation moderates, although this is partially caused by a high base case comparison in Q4 2022. However, the growth momentum is likely to be slow as the factor of China reopening has so far generated little demand growth. In our view, industrial players will shift their focus to grow volume instead of passing on increases in cost as inflation cools down.

The Eurozone Manufacturing PMI for September stands at 43.4, which is little changed compared to the August level of 43.5. According to our findings, contractions in order book and an output decline trend is still ongoing. On the positive side, the price of input material has declined and manufacturers are passing the cost savings to their clients.

Due to the aircraft engine recall issues (PW1100G Geared Turbofan Engines), we are now neutral on Aerospace & Defense from positive previously. We also lowered our opinion to neutral for Airlines. Although airlines players will likely benefit from the global aviation sector recovery due to Covid-19 normalization, its margin could be affected by the spike in jet fuel price (in line with the higher crude oil price).

We are positive on the Industrial Machinery and Industrial Conglomerates sub-sectors. Industrial Machinery sub-sector players are the beneficiaries of high demand due to energy efficiency and automation. For Industrial Conglomerates, strong demand for electrification and sustainability services should continue to support revenue growth.

The focus for Trading Companies and Distributors will be to reduce the record-high inventory in the near term, in our view. This may affect their near-term margin, although it could lead to stronger cash flow. For the Heavy Electrical Equipment sub-sector, the smoother supply chain should lead to improvement in revenue recognition. However, the intense competition should keep the margin upside limited.

We are less positive on the Building Products and Construction Machinery & Heavy Trucks sub-sectors. We expect the Building Products sub-sector's revenue to be affected by poor demand for property during slow economy growth/recession in Europe. For the Construction Machinery & Heavy Trucks sub-sector, slower economy growth/recession in Europe should affect construction activity, trucks demand, and rolling stock.

Analyst Research Notes and other Company News

August 07, 2023
02:08 AM ET... CFRA Keeps Sell Opinion on Shares of Maersk (MAERSK B DC 12600.00**):
We keep our target price of DKK9,500, reflecting a 3.0x 2024 EV/EBITDA, broadly in line with peer average. We leave our 2023 EPS estimate unchanged at USD220 despite the EPS beat in Q2 2023 (USD77 versus consensus estimate of USD38) as we expect the business landscape to deteriorate in H2 2023. Q2 2023 EBITDA of USD2.9 billion (-72% Y/Y; -27% Q/Q) was 16% above consensus estimate, attributed to good cost management instead of strong rates. The fall in earnings was mainly caused by Ocean (-76% Y/Y; -33% Q/Q) on reduced freight rates (-51% Y/Y; -15% Q/Q) and weaker volumes (-6% Y/Y; +7% Q/Q). Maersk lifts the bottom end of its 2023 EBITDA guidance to USD9.5-11.0 billion from USD8.0-11.0 billion, reflecting the stronger H1 2023 results but lowered its 2023 market volume outlook to -4.0% to -1.0% (previously -2.5% to +0.5%) on continued inventory correction till the end of 2023. We maintain our Sell opinion as we think the overhang situation will worsen given weaker demand and increasing entry of new vessels. / Jeff Lye, CFA

May 05, 2023
02:13 AM ET... CFRA Keeps Sell Opinion on Shares of Maersk (MAERSK B DC 11600.00**):
We cut our target price for Maersk to DKK9,500 (from DKK12,000), accounting for the ex-dividend of DKK4,300 per share and reflecting a 3.0x 2024 EV/EBITDA, broadly in line with peer average. Maersk's Q1 2023 EBITDA of USD4.0 billion (-56% Y/Y; -39% Q/Q) was 9% above consensus estimate, which we attribute to lower costs instead of stronger rates. The earnings decline was primarily caused by Ocean (-59% Y/Y; -44% Q/Q) on lower freight rates (-37% Y/Y; -26% Q/Q) and lower volumes (-9% Y/Y; -3% Q/Q). Maersk kept its 2023 EBITDA guidance of USD8-11 billion and expects ongoing inventory correction to continue through Q2 2023 before some improvement in 2H 2023. We think the implied sequential drop in 2023 earnings reflects the ongoing decline in Maersk's contracted rate given that they are being reset to a level nearer to the spot, which has fallen sharply since mid-2022. We keep our 2023 EPS forecast of USD220 but cut 2024 EPS to USD100 (from USD150), accounting for headwinds from declining contracted freight rates. / Jeff Lye, CFA

February 09, 2023
08:35 AM ET... CFRA Lowers Opinion on Shares of Maersk to Sell from Hold (MAERSK B DC 15500.00**):
We lower our 12-month target price for Maersk to DKK12,000 (DKK15,000), reflecting a 3.5x 2024 EV/EBITDA, broadly in line with peer average. We cut our 2023 EPS forecast to USD220 (USD420) and set 2024 EPS at USD150. Q4 2022 EBITDA fell to USD6.5 billion (-18% Y/Y; -40% Q/Q) no thanks to Ocean (-18% Y/Y; -39% Q/Q) on lower freight rates (-4% Y/Y; -23% Q/Q) and lower volumes (-14% Y/Y; -7% Q/Q). Meanwhile, Logistics & Services slowed down sequentially with Q4 2022 EBITDA falling 17% Q/Q due to lower volumes and margins, though it represents 50% Y/Y improvement underpinned by maiden contribution from LF Logistics. Maersk introduced 2023 EBITDA guidance of USD8-USD11 billion (2022 EBITDA: USD35.7 billion), reflecting the down trending freight rates and a sharp fall in earnings. Separately, Maersk proposed USD14 billion cash returns to shareholders in 2023. Although the estimated cash yield of ~35% is substantial, we think it is arguably backward-looking. Hence, we lower our call for Maersk to Sell from Hold. / Jeff Lye, CFA

November 02, 2022
08:32 AM ET... CFRA Lowers Opinion on Shares of Maersk to Hold from Buy (MAERSK B DC 16150.00***):
We lower our 12-month target price to DKK15,000 (from DKK27,000), reflecting a 3.0x 2023 EV/EBITDA, broadly in line with peer average. We slash our 2023 EPS forecast to USD420 (from USD750). Q3 2022 EBITDA of USD10.9 billion (+56% Y/Y) beat consensus estimate by 5%. The result was underpinned by Ocean (+59% Y/Y) on higher freight rates (+42% Y/Y; +1% Q/Q) and Logistics & Services (+48% Y/Y) on higher rates and maiden contribution from LF Logistics. Despite the outperformance in Q3 2022, Maersk maintained its 2022 EBITDA guidance of USD37 billion, reflecting a sharp earnings normalization in Q4 2022, in our view. We also gather the decline in market freight rate has accelerated with spot rates now more than halved since July. Moreover, we think there is further downside to freight rates due to continuing slowdown in demand. Easing port congestion which released capacity back into service will also create a negative feedback loop to rates, in our view. Hence, we lower our call for Maersk to Hold from Buy. / Jeff Lye, CFA

August 03, 2022
11:55 AM ET... CFRA Lowers Opinion on Shares of Maersk to Buy from Strong Buy (MAERSK B DC 21240.00****):
We adjust our target price to DKK27,000 (DKK32,700), reflecting a 3.5x 2023 EV/EBITDA, broadly in line to peer average. We raise our EPS estimate to USD1,550 (USD1,300) for 2022, but keep USD750 for 2023. Q2 2022 EBITDA doubled Y/Y to USD10.3 billion, beating S&P Capital IQ consensus estimate by 15%. The result was driven by exceptionally high Ocean freight rates (+64% Y/Y; +9% Q/Q), which more than offset higher bunker, container handling, and network cost. However, Ocean volume fell 7% Y/Y to 3.1 million FFE in Q2 2022. Meanwhile, Maersk raised its 2022 EBITDA guidance to USD37 billion (USD30 billion) in view of sustained freight rates across H1 2022, but it also guided on a possible rate normalization in Q4 2022. We lower our call on Maersk to Buy from Strong Buy as we think its outlook is becoming less positive, as we understand the decline in market freight rates have accelerated in July, which may lead to downward normalization in its H2 2022 profit, in our view. / Jeff Lye, CFA

May 05, 2022
12:14 AM ET... CFRA Maintains Strong Buy Opinion on Shares of Maersk (MAERSK B DC 21000.00*****):
We raise our target price to DKK32,700 (from DKK29,850), reflecting a 4.5x 2022 EV/EBITDA, lower than its 5-year average of 6x, justified in our view as the strong earnings outlook is supported by exceptional freight rate, which is unsustainable. Maersk's Q1 2022 EBITDA more than doubled to USD9.1 billion and was in line with its pre-announcement. Due to the strong H1 2022 and exceptional freight rates, which likely will persist through Q4 2022, Maersk raised its 2022 EBITDA guidance to USD30 billion (from USD24 billion) vs. consensus estimates of USD28 billion. This assumes a weaker global contained demand of -1% to 1% vs. previously 2%-4% growth. We raise our 2022 and 2023 EPS to USD1,300 (USD1,100) and USD750 (USD660). We like that Maersk continues to increase the contract volumes negotiated at favorable rates, smoothening any potential decline in spot rates in H2 2022/2023. Assuming 2023 EBITDA halved to USD15 billion, our target price still implies 6x EV/EBITDA, which is not demanding in every measure. / Jun Zhang Tan, CFA

February 10, 2022
02:28 AM ET... CFRA Maintains Strong Buy Opinion on Shares of Maersk (MAERSK B DC 23260.00*****):
We raise our target price to DKK29,850 (DKK27,500), reflecting a 4.5x 2022 EV/EBITDA, lower than its 5-year average of 6x, justified in our view as the strong earnings outlook is supported by exceptional freight rate, which is unsustainable. Q4 2021 revenue grew 64% while EBITDA grew 195%. The strong results were broadly within our expectations, as Maersk continued to benefit from elevated ocean freight rates. Maersk is guiding 2022 EBITDA to be flat at USD24 billion vs. consensus estimates of USD28 billion. We believe this reflects the management conservatism as the guidance implies a sharp decline in freight rate in H2 2022, but we believe the decline will be more gradual. Also, Maersk has locked in 70% of 2022 freight volume in long-term contracts with the annualized rate increase of USD800/FFE to cushion the decline. Due to the stronger-than-expected outlook, the normalization of earnings will likely be delayed from 2022 to 2023. We raise 2022 EPS to USD1,100 and introduce 2023 EPS of USD660. / Jun Zhang Tan, CFA

Forecasts are not reliable indicator of future performance.
Note: A company's earnings outlook plays a major part in any investment decision. S&P Global Market Intelligence organizes the earnings estimates of over 2,300 Wall Street analysts, and provides their consensus of earnings over the next two years, as well as how those earnings estimates have changed over time. Note that the information provided in relation to consensus estimates is not intended to predict actual results and should not be taken as a reliable indicator of future performance.
Note: For all tables, graphs and charts in this report that do not cite any reference or source, the source is S&P Global Market Intelligence.

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs (American Depositary Receipts), and ADSs (American Depositary Shares) based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS (Stock Appreciation Ranking System), equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark (e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)), based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

(also known as **S&P Capital IQ Earnings & Dividend Rankings**) - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsulize the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+	Highest	B	Below Average
A	High	B-	Lower
A	Above	C	Lowest
B+	Average	D	In Reorganization
NC	Not Ranked		

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus (average) EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

CAGR - Compound Annual Growth Rate
CAPEX - Capital Expenditures
CY - Calendar Year
DCF - Discounted Cash Flow
DDM - Dividend Discount Model
EBIT - Earnings Before Interest and Taxes
EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
EPS - Earnings Per Share
EV - Enterprise Value
FCF - Free Cash Flow
FFO - Funds From Operations
FY - Fiscal Year
P/E - Price/Earnings
P/NAV - Price to Net Asset Value
PEG Ratio - P/E-to-Growth Ratio
PV - Present Value
R&D - Research & Development
ROCE - Return on Capital Employed
ROE Return on Equity
ROI - Return on Investment
ROIC - Return on Invested Capital
ROA - Return on Assets
SG&A - Selling, General & Administrative Expenses
SOTP - Sum-of-The-Parts
WACC - Weighted Average Cost of Capital

Dividends on American Depository Receipts (ADRs) and American Depository Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ **5-STARS (Strong Buy):**
Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★☆ **4-STARS (Buy):**
Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★☆☆ **3-STARS (Hold):**
Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★☆☆☆ **2-STARS (Sell):**
Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★☆☆☆☆ **1-STAR (Strong Sell):**
Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:
In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five (six) model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section seof the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports (collectively, the "Research Reports") reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.
