Past performance is not an indication of future performance and should not be relied upon as such.
Analysis prepared by **Jeff Lye, CFA** on Jul 26, 2023 05:08 PM ET, when the stock traded at **EUR 140.00**.

Highlights

- ▶ Aena's Q2 2023 EPS of EUR3.16 beat consensus estimates by 19%. The result was buoyed by improved passenger traffic in Q2 2023 [particularly April and May], which brought H1 2023 volume to 144.1 million passengers [+23% Y/Y], exceeding the 2019 level by 0.5%. H1 2023 revenue jumped to EUR2.33 billion [+24% Y/Y] and EBITDA surged to EUR1.17 billion [+49% Y/Y] thanks to the strong traffic improvement alongside robust commercial activities [higher passenger expenditure and rents revenue]. Consequently, H1 2023 cash from operating activities improved to EUR1.05 billion [+34% Y/Y].
- ▶ We project 13% Y/Y growth in 2023 revenue, which is in line with Aena's 2023 passenger traffic estimate of being between 94% to 104% of the figures in 2019. Given Aena's airports have a higher composition of leisure travelers, we believe our projection is reasonable as we think recovery of air travel from China's reopening will add to the traffic recovery registered by Aena in 2022. Therefore, we see continued strength in 2023 across both aeronautical and international activities.
- ▶ We estimate EPS of EUR8.70 for 2023 and EUR9.50 for 2024, which reflects a further improvement from EPS of 6.01 in 2022.

Investment Rationale/Risk

- ▶ Our call is 4-STARs [Buy]. As domestic and intra-European traffic makes up more than 90% of AENA's total volume, it is one of the best-placed European airport operators to benefit from the ongoing recovery of air travel activities, in our opinion. Commercial sales have exceeded pre-pandemic levels and the minimum annual guaranteed rent of new tenders of Aena's airport spaces has improved. Furthermore, Aena is expected to benefit from the increase in annual maximum revenue per passenger [IMAAJ] for 2024, which set the IMAAJ for 2024 at EUR10.35 per passenger, versus EUR9.95 per passenger in 2023. Long term, we believe AENA's venture into the Brazilian market could help to improve its earnings growth trajectory, although the size of its international ventures remains small relative to its domestic market.
- ▶ Major downside risks include pullback by consumers on travel spending and negative regulatory developments in Spain.
- ▶ Our 12-month target price is set at EUR185, reflecting a 2024 EV/EBITDA of 12x, a premium to the peer average of 11x, justified in our view by Aena's better return on invested capital/ROIC.

Analyst's Risk Assessment

Aena S.M.E., S.A.

Business Summary Jul 26, 2023

COMPANY BACKGROUND: Since its creation as a public entity in 1991, AENA (Aeropuertos Españoles y Navegación Aérea – Spanish Airports and Air Navigation) has been put in charge of the management of airport and air navigation facilities in Spain. Today, it is the world’s largest airport management company (by passenger count), handling more than 270 million passengers in 2022. The company operates 46 airports and two heliports in Spain, in addition to 23 other airports located in Latin America and the U.K. Since its listing on the Madrid Stock Exchange in 2015, AENA has been a component of the IBEX 35 Index. The government of Spain continues to hold 51% of the share capital in the company through the state-owned firm ENAIRE.

DIVISIONAL OVERVIEW: AENA’s core airport service management business was grouped under its Airports segment, which made up 88% of group EBITDA in 2022. This includes its aeronautical activity (43% of EBITDA), such as the provision of aircraft landing and take-off, parking, fuel, passengers, cargo, security, and catering services, whereby revenues are mostly regulated. Meanwhile, unregulated activities, including the management of commercial spaces inside airport terminals and car parks, contributed another 45% of EBITDA to the company in 2022.

International segment (9% of EBITDA) relates to AENA’s interests in 23 airports outside of Spain. This includes a 51% stake in the concessionaire of Luton airport (U.K.), 37.9% in Cartagena de Indias airport (Columbia), 50% in Cali airport (Columbia), and full control of six airports in northeastern Brazil. In addition, the company has a 33.3% stake in Aeropuertos Mexicanos del Pacifico, SAPI de CV (AMP), which in turn owns 17.4% of Grupo Aeroportuario del Pacífico SAB de CV (GAP); GAP operates 12 airports in Mexico and has 74.5% indirect interests in two airports in Jamaica.

Real estate services segment (3% of EBITDA), on the other hand, encompasses AENA’s interests in industrial and real estate assets that are located outside of airport terminals.

CORPORATE STRATEGY: Although AENA monopolizes the operation of the airports under its management, the company is still subjected to intense competition from operators located in other countries. In view of the freeze on its domestic tariffs until 2025, the company has been diversifying outside of its domestic market; aside from extending and renewing existing concessions, it is looking to acquire assets in Latin America and Europe, while also exploring opportunities in Asia, the Middle East, and North America. Separately, AENA will also monetize its existing assets by upgrading retail spaces in airports to narrow the gap of its commercial revenue per passenger to the European peers. The company also owns 2,000 hectares of dormant lands, which neighbor its airports, and plans are now in motion to develop those assets in partnership with other firms.

FINANCIAL TRENDS: AENA’s revenue grew at a CAGR of 6% (2016-2019) to EUR4.5 billion in 2019. However, the business environment turned dismal in 2020 owing to the outbreak of the Covid-19 pandemic, resulting in exceptionally weak revenue of EUR2.2 billion in 2020 and EUR2.4 billion in 2021. Nonetheless, passenger traffic began to recover in 2022 (about 88% of 2019 level) driving revenue up by 70% to EUR4.2 billion. As a result of the rapid traffic recovery, EBITDA soared to EUR2.1 billion in 2022 from EUR91 million (restated from EUR645 million [before accounting changes on leases]) in 2021. Nonetheless, 2022 EBITDA remains 25% below Aena’s peak earnings of EUR2.8 billion (2019). After suspending dividend distribution for two years, Aena proposed to distribute DPS of EUR4.75 in 2022. Given that cash flow generation has recovered significantly, we expect the company to resume its policy of paying out 80% of its net profits as dividends.

Aena S.M.E., S.A.**Industry Outlook**

We maintain our sector recommendation for EMEA Industrial sector at neutral for Q4 2023 and 2024. We believe that the key issue facing the sector is the surge in energy price arising from the concern on potential supply disruption from the Middle East. However, supply chain disruptions have eased. This could be attributed to slower demand for goods and weak economy growth in China. In the past 12 months, the Shanghai Containerized Freight Index (SCFI) has declined about 30% to about \$900 per TEU. This is a signal of weak demand on global movement of cargoes.

Year to date as of October 16, 2023, the EMEA Industrial Index is up 13.0% versus the S&P Europe 350 Index increase of 10.0%. However, in Q3 2023, the EMEA Industrial sector's performance was at -3.8%, which is below S&P Europe 350's -1.8%.

The eurozone's annual inflation rate dropped to 4.3% in September [from August's 5.2%]. We expect lower inflation impact to be positive to industrial sector earnings as it lowers cost and widens operating margin. In Q4 2023, industrial players will likely focus on revenue growth via business volume increase instead of average selling price increases. For Q4 2023, the outlook should turn more positive as inflation moderates, although this is partially caused by a high base case comparison in Q4 2022. However, the growth momentum is likely to be slow as the factor of China reopening has so far generated little demand growth. In our view, industrial players will shift their focus to grow volume instead of passing on increases in cost as inflation cools down.

The Eurozone Manufacturing PMI for September stands at 43.4, which is little changed compared to the August level of 43.5. According to our findings, contractions in order book and an output decline trend is still ongoing. On the positive side, the price of input material has declined and manufacturers are passing the cost savings to their clients.

Due to the aircraft engine recall issues (PW1100G Geared Turbofan Engines), we are now neutral on Aerospace & Defense from positive previously. We

also lowered our opinion to neutral for Airlines. Although airlines players will likely benefit from the global aviation sector recovery due to Covid-19 normalization, its margin could be affected by the spike in jet fuel price [in line with the higher crude oil price].

We are positive on the Industrial Machinery and Industrial Conglomerates sub-sectors. Industrial Machinery sub-sector players are the beneficiaries of high demand due to energy efficiency and automation. For Industrial Conglomerates, strong demand for electrification and sustainability services should continue to support revenue growth.

The focus for Trading Companies and Distributors will be to reduce the record-high inventory in the near term, in our view. This may affect their near-term margin, although it could lead to stronger cash flow. For the Heavy Electrical Equipment sub-sector, the smoother supply chain should lead to improvement in revenue recognition. However, the intense competition should keep the margin upside limited.

We are less positive on the Building Products and Construction Machinery & Heavy Trucks sub-sectors. We expect the Building Products sub-sector's revenue to be affected by poor demand for property during slow economy growth/recession in Europe. For the Construction Machinery & Heavy Trucks sub-sector, slower economy growth/recession in Europe should affect construction activity, trucks demand, and rolling stock.

/ Alan Lim Seong Chun, CFA

Aena S.M.E., S.A.**Analyst Research Notes and other Company News****July 26, 2023**

11:31 AM ET... CFRA Reiterates Buy Opinion on Shares of Aena S.M.E., S.A. [AENA SM 143.85****]:

We adjust our 12-month target for Aena to EUR185 [EUR180], reflecting a 2024 EV/EBITDA of 12x, a premium to the peer average of 11x, justified, in our view, by its better ROIC. We lift our 2023 EPS view to EUR8.70 [EUR8.20] and 2024's to EUR9.50 [EUR9.00]. Q2 2023 EPS of EUR3.16 beat the consensus estimate by 19%. The result was buoyed by improved passenger traffic in Q2 2023 [particularly April and May], which brought 1H 2023 volume to 144.1M passengers [+23% Y/Y], exceeding the 2019 level by 0.5%. 1H 2023 revenue jumped 24% Y/Y and EBITDA surged 49% Y/Y thanks to the strong traffic improvement alongside robust commercial activities [higher passenger expenditure and rents revenue]. We think the deceleration of traffic trends in June to 97% of the 2019 level will be short-lived as airlines may eventually discover an ideal price to optimize capacity. Overall, we are confident that Aena will meet its traffic guidance of 94%-104% of the 2019 level, backed by the recovery of air travel from China's reopening. / Jeff Lye, CFA

April 26, 2023

07:37 AM ET... CFRA Reiterates Buy Opinion on Shares of Aena [AENA SM 152.00****]:

We retain our target price for Aena of EUR180, reflecting 2023 EV/EBITDA of 13x, a premium to peer average of 12x, justified in our view by its better ROIC. We keep our EPS forecast of EUR8.20 for 2023 and EUR9.00 for 2024. Q1 2023 EPS of EUR0.89 beat consensus estimate by EUR0.10. The result was driven by higher passenger traffic of 60.6 million [+39.8% Y/Y], which exceeded 2019 by 1.6%. Revenue jumped to EUR1.03 billion [+34% Y/Y] and EBITDA rose to EUR369 million [+153% Y/Y] on swift recovery in passenger traffic alongside robust commercial activities [higher passenger expenditure and rents revenue]. Given the strong Q1 2023 passenger traffic, which falls in the upper half of Aena's 2023 traffic guidance [94%-104% of the 2019 level], we are confident that Aena will meet its guidance with a likelihood of exceeding its pre-pandemic level in 2023. Our assumption is backed by Aena's high composition of leisure travelers, which we believe will benefit from the recovery of air travel from China's reopening. / Jeff Lye, CFA

February 28, 2023

12:59 PM ET... CFRA Reiterates Buy Opinion on Shares of Aena S.M.E., S.A. [AENA SM 146.00****]:

We raise our 12-month target for Aena to EUR180 from EUR160, reflecting 2023 EV/EBITDA of 13x, a premium to peer average of 12x, justified, in our view, by its better return on invested capital. We lift our 2023 EPS view to EUR8.20 from EUR7.20 and set 2024's at EUR9.00. Aena's 2022 EPS of EUR6.01 beat consensus estimates of EUR4.10, due to the -EUR1.50 EPS increment from accounting changes on leases and a stronger traffic recovery. Aena's passenger traffic improved to 270.7 million passengers [+99% Y/Y] in 2022, around 88% of the traffic in 2019. Revenue grew to EUR4.24 billion [+69% Y/Y] and EBITDA soared to EUR2.08 billion from EUR91 million [restated from EUR645 million], thanks to the rapid recovery in traffic. Aena guided for 2023 passenger traffic at 94%-104% of its 2019 level, reflecting high confidence to recover to the pre-pandemic level. Given that Aena's airports have a high composition of leisure travelers, we believe it will benefit from the recovery of air travel from China's reopening. / Jeff Lye, CFA

October 27, 2022

12:37 AM ET... CFRA Reiterates Buy Opinion on Shares of Aena [AENA SM 112.00****]:

We keep our 12-month target price for Aena at EUR160, reflecting 2023 EV/EBITDA of 13x, a premium to peer average of 12x, justified in our view by its better return on invested capital. We raise our 2022 EPS estimate to EUR5.00 [EUR4.50] following a strong Q3 2022 EPS of EUR2.24. Aena's passenger traffic improved in Q3 2022, bringing 9M 2022 volume to 204.4 million passengers [+134% Y/Y], approximately 86% of the traffic in 2019, and revenue to EUR2.92 billion [+66% Y/Y]. 9M 2022 EBITDA tripled to EUR1.3 billion, thanks to the rapid traffic improvement. Aena has also updated its 2022 passenger traffic estimate upwards to slightly above 85% from the previous range of 75% to 85% of the figures in 2019. Relative to other airport operators, we believe Aena is best placed to benefit from the recovery of regional air travel due to its larger exposure to domestic and intra-European flights alongside its higher composition of leisure travelers. Hence, we maintain our Buy call on Aena. / Jeff Lye, CFA

July 27, 2022

01:34 PM ET... CFRA Raises Opinion on Shares of Aena to Buy from Hold [AENA SM 119.00****]:

Following over a 20% retracement in share price since April 2022, we raise Aena to Buy as we believe current price provides a good entry for the company, which we think is well-placed to benefit from recovery of regional air travels. We keep our 12-month target at EUR160 and retain our EPS estimates at EUR4.50 for 2022 and EUR7.20 for 2023. Our target price represents 2023 EV/EBITDA of 13x, a premium to peer average of 12x, justified, in our view, by its better return on invested capital. Aena's passenger traffic improved in Q2 2022, bringing H1 2022 volume to 117.3 million passengers [+257% Y/Y], approximately 82% of the traffic in 2019, and revenue to EUR1.72 billion [+99.4% Y/Y]. Thanks to the strong traffic improvement, H1 2022 EBITDA jumped to EUR631.3 million vs. a loss of EUR58.2 million in H1 2021. Aena has also revised its 2022 passenger traffic estimate upwards to between 75% and 85% of the figures in 2019, from 68% previously, as it expects an increasing number of flights to be offered by airlines. / Jeff Lye, CFA

April 29, 2022

03:36 AM ET... CFRA Maintains Hold Opinion on Shares of Aena [AENA SM 141.45****]:

We retain our target price on AENA at EUR160, equivalent to a 2022 consensus EV/EBITDA multiple of 37.1x that is better than peer average of 22.6x, justified in our view by its better return on invested capital. We forecast significant rebound in EPS to EUR4.5 in 2022 and EUR7.2 in 2023 from a loss per share of EUR0.40 last year, reflecting the improving operating leverage. Passenger traffic recovery in AENA continued its positive momentum in Q1 2022 with volumes almost tripling to 43.4 million passengers and revenue growing 93.6%, to about 72% of the traffic in 2019. Thanks to the strong traffic improvement, Q1 2022 EBITDA turned positive to EUR72.6 million vs. a loss of EUR121.5 million in Q1 2021. This includes the negative impact of the adjustment for MAG reductions and higher rents. Excluding the impact of the negative adjustments, EBITDA would have been EUR165.9 million. / Adrian Ng, CFA

February 25, 2022

05:21 AM ET... CFRA Keeps Hold Opinion on Shares of AENA [AENA SM 140.00****]:

We retain our target price on AENA at EUR160, equivalent to a 2022 consensus EV/EBITDA multiple of 37.1x that is better than peer average of 22.6x, justified in our view by its better return on invested capital. We lower 2022 EPS estimate by EUR2.00 to EUR4.50 but project improvement to EUR7.20 next year. AENA reported EUR207 million in EBITDA for Q4 2021 which was 24% below consensus forecast. However, we believe the weakness could be largely attributable to impairment of its minimum annual guaranteed rent receivables. Thanks to rebound in passenger traffic, both its aeronautical and international activities delivered solid operational improvement, while one-off gains arising from waiver of concession liability enabled the firm to deliver a EUR40 million beat at the net income level. Still, we see an uncertain outlook with regards to the adjustments of its regulated tariffs and momentum of traffic recovery. This prompts us to keep our recommendation on AENA at Hold. / Jia Man Neoh, CFA

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsize the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Aena S.M.E., S.A.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section of the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.
