Price Performance

Source: CFRA, S&P Global Market Intelligence Past performance is not an indication of future performance and should not be relied upon as such. Analysis prepared by Catherine Seifert on Sep 29, 2023 07:00 PM ET, when the stock traded at EUR 222.40.

Highlights

- Allianz's (ALV) performance for H1 2023 was solid, in line with expectations. P&C business volume rose 9.8%, driven by strong internal growth, supported by positive price and volume effects, while COR improved to 92% [-110 bps Y/Y] due to lower natural catastrophe claims and favorable discounting. P&C operating profit rose 16.3% from higher operating insurance service result and an improved operating investment result. L&H saw PVBPN decline due to lower contributions from Germany and Italy, with NBM and CSM rising due to strong new business in the U.S. and Germany and favorable economics, respectively. L&H operating profit rose 41.1% due to increased investment results in the U.S. due to the prior year's negative hedge on variable annuities swinging to positive. AM operating profit declined 11.1% from lower AUM and higher cost-income ratio of 62.3% [+260 bps Y/Y]. ALV confirms its 2023 operating profit target of EUR14.2 bln [+/- EUR1 bln], close to consensus estimate of EUR14.5 bln.
- ALV registered a strong solvency II ratio of 208% [+70 bps Y/Y].
- We revise our EPS forecast for 2023 to EUR22.48 [from EUR19.14] and 2024 to EUR25.12 [from EUR25.68] to account for recent results.

Investment Rationale/Risk

- We currently have a 4-STARS [Buy] rating for ALV. The Company has a solid track record, delivering operating profit five-year CAGR of +3.8% with 2021 at +25%, driven by the underlying underwriting results as well as lower negative impacts of Covid-19. We like ALV for its favorable progress in shifting away from investment margin toward fee-based and underwriting earnings. In the long term, we believe ALV will likely achieve its target of +5-7% EPS CAGR for 2021-2024. We find ALV attractive with further upside at current P/B valuation of 1.4x, a discount relative to peer's average of 1.6x.
- Downside risks include: (i) competition, which leads to irrational pricing, (ii) weaker-than-expected investment yields in its L&H books, (iii) higher levels of natural catastrophes, and (iv) regulatory risk.
- We raise our target price for Allianz SE (ALV) to EUR258, reflecting a 2024 P/B of 1.6x, above its 5-year historical average of 1.25x, justified by stronger forward ROE of 16% [vs. historical 11%].

Analyst's Risk Assessment

LOW MEDIUM HIGH

Our risk assessment reflects Allianz's gearing to investment markets in respect of capital and profits. A weighting towards property and casualty, little exposure to equity-based guarantees backed by shareholders' capital, and solvency ratios at the high-end of sector ranges help to diminish the risk.

Allianz SE

Business Summary Feb 28, 2023

CORPORATE OVERVIEW: Allianz SE, headquartered in Munich, Germany, is a leading global provider of financial services (P&C insurance, life and health insurance, and asset management) to customers in more than 70 countries. Around 28% of 2020 operating profit originated from Germany. Western & Southern Europe accounted for 32% of operating profit while the U.S. contributed 26%. Growth markets such as Malaysia, South Korea, and Central & Eastern European (CEE) countries account for 12% of operating profits.

DIVISIONS: The Property & Casualty (P&C) business (48% of 2020 operating profits) provides automobile, homeowner, travel along with other personal and commercial lines coverage. Allianz is a leading global provider of P&C insurance, also the largest German P&C insurer, and is among the top five in Italy, Austria, France, and Switzerland. Further, Allianz has significant operations in the U.S., the U.K., CEE countries (where Allianz is a leading non-life insurer in Hungary and Slovakia), and Asia-Pacific (leading non-life insurer in Malaysia). We note that Allianz is the largest foreign insurer in CEE countries as well. In addition to strong local rankings, Allianz has established leading positions in some specialty lines on a global basis, including credit insurance, marine and aviation insurance, international industrial reinsurance, and travel and assistance insurance.

Allianz's Life and Health Insurance businesses (38% of 2020 operating profits) provide endowment, annuity, and term insurance products and a range of health, disability, and related coverage to individuals, as well as group life, group health, and pension products to employers. In Life and Health, the proportion of business with retail clients is significantly higher than that with corporate clients. Its largest operations are in Germany, Italy, France, and the U.S. It has a top five position in Switzerland and is a top ten participant in the Taiwanese market. In Jan. 2006, Allianz acquired a 2.5% stake in ICBC, the largest bank in China, and began selling insurance through ICBC's branches. Following the sell-down in 2009 and 2010, the stake is under 1% but the strategic partnership remains in place. Allianz also owns a 3.8% stake in China Pacific Insurance Group Ltd (CPIC), and is a top 10 player in Life and Non-life in India. In May 2015, Allianz hedged part of the gains on its investment in CPIC through a deal with Goldman Sachs.

Allianz's Asset Management business (25% of 2020 operating profits) is among the world's largest with total assets under management (AUM) of EUR2.39 trillion at the end of 2020, up from EUR2.27 trillion at end of 2019, driven by positive market effects and strong net inflows in 3rd party AUM. It is a global provider of institutional and retail asset management services both to third-party investors (EUR1.712 trillion vs. EUR1.686 trillion at end-2019) and in-house insurance operations. The largest part of third-party assets under management originated from America (55%), followed by 33% from Europe. Some 80% of third-party assets are invested in fixed income. PIMCO, a U.S.-based fund manager focused on bonds, has previously been the driver of growth.

FINANCIAL TRENDS: In 2020, Allianz's revenue declined 1.8% to EUR140.5 billion, mainly due to the negative impact of Covid-19 restrictions. Segmentally, P&C revenue's internal growth was -1.5% as 4.8% negative volume effect was only partially offset by 3.8% positive price effect. In L&H, the revenue was down 3.1%, with PVNBP declined to EUR61.5 billion (EUR67 billion) due to Covid-19 restrictions, particularly in Germany and the U.S. Its new business margin also suffered due to lower interest rates, which was only partially offset by product repricing and improvement in business mix. Allianz continued to focus on preferred lines of business such as protection & health, unit-linked without guarantees, and capital-efficient products. The contribution of guaranteed savings and annuities in PVNBP declined to 14% in 2020 (19% in 2019). Lastly, Asset Management's revenue grew 2.6% driven by higher AUM-driven revenues.

Operating profit took a hit in 2020, as it declined 9.3% to EUR10.75 billion after including the EUR1.3 billion negative impact of Covid-19. Segmentally, P&C's combined ratio increased to 96.3% (95.5%) due to Covid-19 losses in the commercial lines as well as higher nat cat and lower reserve releases. On the other hand, L&H's profit declined 7.4% due to a positive prior-year impact in the U.S. and the disposal of Allianz Popular S.L. in Spain. Asset Management's profit was up 5%, thanks to higher average AUM and continued cautious cost management, which improved the cost-income ratio to 61.2% (62.3%).

During the period 2016-2020, Allianz's total revenue grew at a 3.5% CAGR, but the operating profit remained broadly stable in EUR11-12 billion range. In terms of capital position, its Solvency II ratio was 207% (212%) due to negative interest rates movement and negative market movement in 1H 2020. Its dividend per share has also grown from EUR7.60 in 2016 to EUR9.60 in 2019 and it remained flat for 2020.

Allianz SE

Industry Outlook

Our fundamental outlook on EMEA Financials for the next 12 months is neutral. We believe the industry in general will benefit from the higher interest rate environment. This is balanced by growing concerns about the economy, including slower growth and persistent inflation.

Year-to-date through 30 September 2023, the S&P Europe 350 Financials Index was up 9.2%, outperforming the broader market, represented by the S&P Europe 350 Index, which recorded a gain of 6.5% during the same period.

For the bank sub-industry, we have a neutral view. Signs of easing interest rate tailwind have gathered momentum even as the European Central Bank (ECB) raised its interest rate for the 10th consecutive time in September 2023 by another 0.25%-pts to an all-time high of 4.0%. The ECB has signaled its intention to keep rates on hold in the future. That said, we still expect banks to see expanding net interest income and net interest margins in H2 2023. We expect this to normalize in 2024 due to rising pass-through rates, a gradual decline in sector-wide customer deposits, peaking policy rates, slower loans growth, and weaker macroeconomic prospects. We see higher operating expenses driven by wages and general inflation, IT, and compliance. We expect rising loan loss provisions in the coming months as consumers and businesses will start to feel the negative impact from higher interest rates and inflation.

Our fundamental outlook for the insurance sub-industry is neutral. The challenge for life insurers in managing asset-liability and duration (given the long-term nature of policyholder obligations) caused by the rapid interest rate hikes should ease, in our view, as the uptrend in interest rates is likely to end in the near term. We expect improving investment yields to support the earnings of life insurers but are wary of slowing growth in gross written premiums amid our anticipated lackluster economic activities in Europe. For P&C insurers, we think profitability is set to improve amid our anticipation of easing heavy natural catastrophe claims that plagued most P&C insurers in recent

years, moderated claim cost inflation, and firm pricing of new coverages. As for the reinsurers, consensus earnings expectations are becoming lofty, in our opinion, fully accounting for the benefit of the hardening market in the reinsurance segment. We note that the average projected shareholder cash yield of reinsurers is merely 5%, nearly half of the projected cash yield of the insurance sub-industry.

We are also neutral on the asset management sub-industry, where we expect asset under management (AUM) growth to slow down amid macro uncertainties. Two of the main positive factors for AUM growth are new products and new geographic markets. Investments that have been made to target new sources of AUM in the retail space more efficiently and to attract new mandates (especially from institutional investors) by offering extended quantitative and big data solutions are also potential drivers for AUM growth, in our view. Despite relatively strong expectations for top-line growth, fee income is expected to grow more slowly, which implies further falls in fee margin (as a percentage of AUM).

Allianz SE**Analyst Research Notes and other Company News****August 21, 2023**

03:57 AM ET... CFRA Maintains Buy Opinion on Shares of Allianz [ALV GR 221.50****]:

We revise our target price for Allianz SE [ALV] to EUR258 (from EUR240), reflecting a 2024 P/B of 1.6x, above its 5-year historical average of 1.25x, justified by stronger forward ROE of 16% [vs. historical 11%]. We revise our EPS forecast for 2023 to EUR22.48 [from EUR19.14] and 2024 to EUR25.12 [from EUR25.68] to account for recent results. For H1 2023, ALV reported operating profit of EUR7.5 bln [+14.9% Y/Y], in line with S&P Capital IQ consensus estimates, driven by both operating profitability in L&H and P&C. This comes on the back of an increase in total business volumes by 4.8%. The result was offset by AM, which contracted 11%. ALV registered a strong solvency II ratio of 208% [+70 bps Y/Y]. ALV confirms its 2023 operating profit target of EUR14.2 bln [+/- EUR1 bln], close to consensus estimate of EUR14.5 bln. We continue to like ALV and believe there is further upside against the current P/B valuation of 1.4x. Maintain Buy. / Ashman Razak

May 18, 2023

12:39 AM ET... CFRA Maintains Buy Opinion on Shares of Allianz [ALV GR 208.90****]:

We revise our target price for Allianz SE [ALV] to EUR240 (from EUR260), reflecting a 2024 P/B of 1.5x, broadly in line with peer average of 1.6x, justified by consensus ROE estimate of ~16% [vs peer of 14%]. We revise our EPS forecast for 2023 to EUR19.14 [from EUR23.54] and 2024 to EUR25.86 [from EUR26.28] to account for recent results. ALV reported operating profit of EUR3.7 bln [+24% Y/Y], slightly above S&P Capital IQ consensus estimate of EUR3.6 bln. The L&H segment grew by 62% Y/Y mainly from the U.S., which was previously impacted by an adverse accounting mismatch, whilst P&C rose by 23% Y/Y due to a stronger operating insurance services results partly offset by lower investment and others. AM contracted by 13% Y/Y due to a weaker AM driven revenues amid a challenging market environment. The results came on the back of a rise in total business volume to EUR46 bln [4% Y/Y]. ALV confirms its 2023 operating profit target of EUR14.2 bln [+/- EUR1 bln], close to our estimate of EUR14.5 bln. Maintain Buy. / Ashman Razak

February 21, 2023

02:26 AM ET... CFRA Maintains Buy Opinion on Shares of Allianz SE [ALV GR 218.35****]:

We raise our target price for Allianz SE [ALV] to EUR260 [from EUR230], reflecting a 2024 P/B of 1.5x, broadly in line with peer average of 1.6x, justified by consensus ROE estimate of ~15.8%. We revise our EPS forecast for 2023 to EUR23.54 [from EUR23.12] and introduce 2024 EPS at EUR26.28. ALV reported total revenues of EUR152.7 bln [+2.8% Y/Y], above S&P Capital IQ consensus estimate of EUR151.9 bln, primarily due to strong price and volume of the P&C business [12.4%]. L&H saw PVBPN decline 16.6% due to lower single-premium business in Germany and several continuing prior year impacts, while Asset Management was down 1.9% due to lower performance fees and softer AUM-related revenues. Operating profit grew to EUR14.2 bln [+5.7% Y/Y] from higher underwriting and investment result for P&C and acquired AVIVA operations for L&H. Despite macroeconomic uncertainties, ALV is confident of a strong 2023 with an operating profit target of EUR14.2 bln [+/- EUR1 bln], broadly within our expectations. Maintain Buy. / Ashman Razak

November 13, 2022

11:55 PM ET... CFRA Maintains Buy Opinion on Shares of Allianz [ALV GR 200.65****]:

We maintain our target price for Allianz SE [ALV] at EUR230, reflecting a 2023 P/B of 1.4x with 14% ROE. This is broadly in line with peer average of 1.3x. We revise our EPS forecasts to EUR17.22 [from EUR21.20] for 2022 and EUR23.12 [from EUR23.00] for 2023. For Q3 2022, ALV reported total revenues of EUR34.8 bln [+1.3% Y/Y], lower than S&P Capital IQ consensus estimate of EUR37.2 bln. The revenue increase was driven by growth from the P&C segment as pricing developed strongly and by positive currency impact, but was offset by L&H, which saw softer sales in Italy and Germany. Operating profit grew to EUR3.5 bln [+7.4% Y/Y] as improved underwriting and strong operating investments drove P&C results, partially offset by the contraction in L&H, which was impacted by variable-annuity products in the U.S. and softer net harvesting in Germany. ALV expects a strong outlook with operating profit at the upper range of its target of EUR13.4 bln, which is consistent with consensus expectation. Maintain Buy. / Ashman Razak

August 08, 2022

01:42 AM ET... CFRA Maintains Buy Opinion on Shares of Allianz [ALV GR 176.64****]:

We maintain our target price of EUR230, reflecting a 1.2x 2022 consensus P/B with 10% ROE. This is broadly in line with peer average of 1.3x with a similar ROE profile. We maintain our EPS forecasts of EUR21.20 for 2022 and EUR23.00 for 2023. For H1 2022, ALV reported total revenues of EUR81 bln [+7% Y/Y], higher than S&P Capital IQ consensus estimate of EUR79 bln, mainly driven by strong internal growth and currency impact. P&C saw strong internal growth due to positive price and volume effects, especially with Allianz Partners, Turkey and Germany. Operating profit grew to EUR6.7 bln [+1% Y/Y] as strong growth in P&C from operating investment income and underwriting results offset the contraction in L&H, which faced a difficult market environment in USA and Germany Life. We like ALV for its favorable progress in shifting away from investment margin toward fee-based and underwriting earnings, and believe ALV's target of 5-7% EPS CAGR for 2021-2024 is achievable. / Firdaus Ibrahim, CFA

May 12, 2022

08:16 AM ET... CFRA Maintains Buy Opinion on Shares of Allianz [ALV GR 199.00****]:

We adjust our target price for Allianz [ALV] to EUR230 [from EUR245] to reflect changes of book values, representing a 1.2x 2022 P/B with 11% ROE. This is broadly in line with peer average of 1.2x with average ROE of 9%. ALV reported EUR3.2 billion operating profit [-2.9% Y/Y] in Q1 2022, which beat consensus estimates by 7%, mainly driven by better-than-expected profit in P&C. Combined ratio was 94.7% vs. consensus' 94.9% as higher natural catastrophe claims were partly offset by higher reserve releases. Asset Management also delivered solid profit growth, though it suffered net outflows in AUM. Overall, the results were solid and on track to reach full year target of EUR13.4 billion. Meanwhile, ALV made an additional EUR1.6 billion after-tax provision for the Structured Alpha Funds, dragging Q1 2022 net profit and Solvency II. While the total provisions are higher than our expectation, we believe the bulk has been made and investors will likely focus on its 5-7% EPS growth once the legal issue is behind us. / Jun Zhang Tan, CFA

February 21, 2022

03:47 AM ET... CFRA Maintains Buy Opinion on Shares of Allianz [ALV GR 215.00****]:

We maintain our target price for Allianz [ALV] at EUR245, reflecting a 1.2x 2022 P/B with 11% ROE. This is broadly in line with peer average of 1.2x with average ROE of 9%. Q4 2021 operating profit was 5% ahead of consensus estimates, driven by broad-based performance, though investment margin in Life & Health was lower than expected. We remain positive on ALV's 2022 outlook as we expect a mid-single-digit revenue growth driven by positive price effect in P&C, improved business mix in Life & Health, and growing AUM in Asset Management. ALV's is guiding EUR13.4 billion [+/- EUR1 billion] operating profit for 2022, but we believe that ALV will likely achieve the top end of its guidance. We maintain 2022 EPS forecast and introduce 2023 EPS of EUR23. ALV announced EUR3.7 billion provision for the Structured Alpha Funds investigation, which has impacted net profit and Solvency II ratio in 2021. While the timing of settlement is uncertain, this has removed some concerns on the magnitude of the litigation. / Jun Zhang Tan, CFA

Forecasts are not reliable indicator of future performance.
Note: A company's earnings outlook plays a major part in any investment decision. S&P Global Market Intelligence organizes the earnings estimates of over 2,300 Wall Street analysts, and provides their consensus of earnings over the next two years, as well as how those earnings estimates have changed over time. Note that the information provided in relation to consensus estimates is not intended to predict actual results and should not be taken as a reliable indicator of future performance.
Note: For all tables, graphs and charts in this report that do not cite any reference or source, the source is S&P Global Market Intelligence.

Allianz SE

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsize the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes [paid in the country of origin].

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Allianz SE

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section seof the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.

STARS Stock Reports:

Global STARS Distribution as of September 30, 2023
