Past performance is not an indication of future performance and should not be relied upon as such.
Analysis prepared by Ashman Razak on Aug 23, 2023 06:05 AM ET, when the stock traded at EUR 62.00.

Highlights

- Amadeus (AMS) delivered a strong performance for H1 2023, in line with consensus expectations amid the continued strengthening of the travel industry, in our view. AMS reported revenue of EUR2.7 bln [+28% Y/Y], driven by ~20-30% broad-based growth in all operating segments. This was led by Air Distribution revenues, which grew by 31% on the back of a 17% growth in bookings and an expansion in average revenue per booking, followed by Air IT Solutions growing by 26% Y/Y, driven by passengers boarded evolution which increased 36.8%. Lastly, Hospitality & Other Solutions grew 23.6% from volume growth. We expect the continued recovery of air travel to drive performance in 2023 and forecast revenue to grow by ~21%, within management guidance of 20%- 22.5%.
- AMS's EBITDA grew to EUR1.0 bln, from higher contributions which offset the rise in costs. This translates to a margin of 38.9% (+360 bps Y/Y), just slightly below our expectation of ~40% for 2023.
- We maintain our EPS forecast for 2023 of EUR2.30 and for 2024 of EUR2.75.

Investment Rationale/Risk

- We like AMS for its leading position in the industry, which has helped it to gain market share. Its long-term contracts with its customers also provide strong revenue visibility, and we do not foresee the risks of losing major customers due to its extensive product offerings and high entry barrier in the industry. Revenue per booking has been holding up well so far, thanks to the positive pricing effect, while leverage ratio continued to improve (net debt to last-twelve-month EBITDA of 1.1x, within its leverage target range of 1.0x-1.5x). We see the improvements in air travel demand to continue driving AMS's earnings growth, though it may not fully recover to the pre-pandemic level just yet in 2023. According to AMS, leisure travel continues to recover while the recovery of corporate travel still lags behind leisure travel. Overall, we find the stock to be fairly valued at current valuation.
- Downside risks include slower macroeconomic/higher inflationary pressure that could lead to lower consumer spending, and more travel regulations.
- Our target price is EUR65, implying an EV/ EBITDA multiple of 14.6x, above peer average of 9x, justified in our view by its better margin.

Analyst's Risk Assessment

LOW MEDIUM HIGH

Our risk assessment reflects the company's leading position in the market where it operates. While the demand for its services from travel providers and travel agencies is relatively inelastic, its revenue is based on travel volume, which is cyclical and sensitive to economic conditions.

Amadeus IT Group, S.A.

Business Summary Aug 23, 2023

COMPANY BACKGROUND: Amadeus IT Group (AMS) was founded in 1987 as a Global Distribution System (GDS) company to develop a standard system for connecting four airlines (Lufthansa, Air France, Iberia, and Scandinavian Airlines) with travel agencies. Headquartered in Madrid, Spain, AMS is now the largest transaction processor for the travel and tourism industry worldwide, providing real-time search, pricing, booking, and ticketing services. It serves two key categories of customers: (i) travel providers, such as airlines, hotels, rail operators, car rental companies, insurance companies, and tour operators, and (ii) online travel agencies (Expedia and Booking.com) and offline travel agencies.

BUSINESS SEGMENTS: (i) Air Distribution (48% of 2022 revenue), comprising travel customers, where the primary offering is the Amadeus GDS platform. It generates revenues mainly from booking fees that the Group charges to travel providers for bookings made, as well as other non-booking revenues but excluding Hotel and Car providers.

(ii) Air IT Solutions (35% of 2022 revenue) also focused on travel customers including results from both Airline IT and Airport IT businesses. The Group offers a portfolio of technology solutions (primarily Altea PSS and New Skies) that automate mission-critical processes for travel providers. This segment generates revenues from the transaction processed in the Amadeus platform, as well as from other IT services.

(iii) Hospitality & Other Solutions (17% of 2022 revenue) mainly focused on hospitality customers, including both the distribution and IT solution services, and composed of TravelClick, Hotel and Payments distribution, Hotel and Payment IT solutions, Mobility, Insurance, and Ferry and Travel Audience.

MARKET PROFILE: The GDS market is highly concentrated, with only a few key players, such as Amadeus (estimated market share of 44%), Sabre (36%), and Travelport (20%). Nevertheless, we see the risks of pricing competition among the players to gain market share. In terms of revenue breakdown by geography, EMEA accounted for 51% of 2022 revenue, followed by America (34%) and Asia & Pacific (15%). The distribution is based on where the travel agent, in which bookings are reserved, is located (for the Distribution operating segment), and attending to where the airline receiving the services is registered (for the IT Solutions operating segment). Asia Pacific's revenue contribution has increased in recent years, mainly thanks to the strong growth in travel agencies' air booking that was underpinned by robust travel demand in the region. North America's revenue contribution has also increased as it has gained market shares from low base, coupled with its acquisition of Navitaire, a U.S.-based provider of technology and business solutions to the airline industry in late January 2016.

CORPORATE STRATEGY: AMS seeks growth in the Distribution division by adding more travel providers and travel agencies to its network, as well as expanding the content offering distributed through Amadeus. It is actively signing new contracts or renewals of content agreements with airlines while penetrating into low-cost carriers (LCCs) and hybrid carriers' content worldwide. This creates comprehensive content offerings to entice travel agencies to pay recurring fees to access AMS's travel content. In IT Solutions, future growth will be driven by (i) implementing new customers to its current solutions, (ii) increasing penetration of AMS solutions within its current customer base, and (iii) expanding its portfolio of solutions to address customer needs. It introduces more IT solutions to help its airline customers to improve revenue per passenger. Some of the examples include ancillary services such as additional baggage, seat selection, online rebooking of flights, and merchandising. AMS also focuses on Hospitality which offers hotel solutions such as bookings and reservations systems and guest management solutions.

FINANCIAL TRENDS: Revenue grew at 5-year CAGR of -0.7%, largely dragged by the plunge in sales in 2020 (-61% Y/Y) due to Covid-19's severe impact on the air traffic demand. Before Covid-19, Distribution revenue grew at an average 2%, driven by travel agencies air bookings and improved fee per booking (as a result of higher mix of global bookings). IT Solutions' passengers boarded increased at an average of 16%, driven by increased IT outsourcing trend among airlines as well as Navitaire acquisition. EBITDA margin has been relatively stable at 38%-40% level in the past, but it fell to 10.5% in 2020 as cost savings programs only partially offset the impact of weaker revenue. Margins were able to improve to 24% in 2021 and 37% in 2022 on the back of the recovery in air travel. AMS's dividend per share has increased from EUR0.94 in 2016 to EUR1.30 in 2019, in line with its dividend policy of 40%-50% payout ratio. However, it was cancelled in 2020 due to the challenging outlook. AMS expects to resume shareholder remuneration in 2023 (plan to propose a final gross dividend of EUR0.74 per share, representing 50% of reported profit).

Amadeus IT Group, S.A.

Industry Outlook

We have a positive fundamental outlook over the next 12 months for the European Information Technology industry, comprising Communications Equipment, Semiconductor Equipment, IT Services, and Software. The S&P Europe 350 Information Technology Index was the best performing industry year-to-date through 29 September 2023, gaining 12.0% as compared to the 6.5% gain of the broader S&P Europe 350 Index.

The industry valuation currently trades at a premium valuation of 20.3x P/E, to its 5-year average of 16x. After being the second worst performing industry in 2022 (down 29.7% vs. market's 11.5% contraction), we anticipate that the sector is poised for a robust recovery in 2023, driven by improvement in supply chain, acceleration of digital offerings, and increasing demand for technologies such as 5G, AI, and edge computing. Also, the valuation seems attractive against its EPS growth projections of 17.8% and 14.3% for 2023 and 2024, which are a lot higher than the 8.1% EPS growth in 2022.

For Communications Equipment, we view the continued rapid consumption of data, buoyed by the proliferation of tablets and smartphones, as a solid long-term growth driver for the industry. That said, according to Dell'Oro's report in January 2023, after four years of extraordinary growth that propelled the radio access network (RAN) market to reach new record levels, the RAN market is now expected to transition from the expansion phase to the next phase in this 5G journey with more challenging comparisons and slower growth. According to the report, global RAN is projected to grow at zero percent CAGR outside of China. However, 5G RAN is expected to grow another 25% to 30% by 2027.

For the Semiconductor sub-industry, we believe foundry customers are sustaining increasingly elevated levels of investments, while memory customers face larger headwinds (softening demand and lower ASPs) and are more likely to cut capex meaningfully. With China controlling and increasing amount of the supply chain, the U.S.

and Europe are both looking to boost their own chip manufacturing presence, which we believe will be done via smaller and less efficient fabs, boosting wafer fabrication equipment (WFE) capital intensity, and benefiting equipment suppliers.

In the IT Services and Software industries, we have a positive fundamental outlook. In an increasingly "cloud world", the distinction between application software and systems software becomes fuzzier and less investment relevant, as client-server era's clear demarcations dissolve into an increasingly distributed and functionally federated micro-services architecture. We expect strong revenue growth in 2023, primarily driven by cloud migration and digital transformation projects, partially offset by declining revenues from legacy client-server software licenses and maintenance and support, which are now falling faster as enterprises look to cut costs through cloud migration and other rationalizations.

Analyst Research Notes and other Company News

August 04, 2023

05:07 AM ET... CFRA Maintains Hold Opinion on Shares of Amadeus IT Group [AMS SM 62.68***]:

We maintain our target price for Amadeus [AMS] at EUR65 based on an EV/EBITDA multiple of 14.6x, above the peer average of 8.7x, justified in our view by its better EBITDA margin of 38% [vs 10%]. We maintain our EPS forecast for 2023 at EUR2.30 and for 2024 at EUR2.75. AMS reported H1 2023 revenue of EUR2.7 bln (+28% Y/Y), broadly in line with S&P Capital IQ consensus estimates, driven primarily by broad-based growth of >20% in all segments. This comes on the back of strong operating performance as bookings and passengers boarded rose by 17.2% Y/Y and 36.8% Y/Y, respectively, in line with the continued strengthening of the travel industry. EBITDA margin stood at 38.9% (+360 bps Y/Y), as higher contributions offset the rise in costs. We expect the continued recovery of air travel to drive performance in 2023, and forecast revenue to grow by ~21%, within management guidance of 20%-22.5%. Maintain Hold. / Ashman Razak

May 10, 2023

01:57 AM ET... CFRA Maintains Hold Opinion on Shares of Amadeus [AMS SM 63.66***]:

We keep our Hold opinion on Amadeus and adjust our target price to EUR65 from EUR61, implying an EV/EBITDA multiple of 14.6x, above peer average of 9x, justified in our view by its better margin. Q1 2023 revenue grew by 43% Y/Y driven by all segments, supported by higher bookings (+32.8%) and passengers boarded (+55.1%), while EBITDA margin expanded by 6.6%-pts to 38.9% on operating leverage. Adjusted EPS improved further (+188% Y/Y) and beat S&P Capital IQ consensus estimates on lower depreciation expense (mostly due to reduction in hardware which was largely driven by the shift to cloud) and higher financial income and exchange gains. We raise our EPS estimates to EUR2.30 (from EUR2.20) for 2023 to account for the result beat. Our 2024 EPS estimate of EUR2.75 remains unchanged. We expect the continued recovery of air travel to drive performance in 2023 and forecast revenue to grow by ~21%, within management guidance of 20%-22.5%. / Wan Nurhayati, CFA

February 28, 2023

02:04 AM ET... CFRA Maintains Hold Opinion on Shares of Amadeus [AMS SM 57.64***]:

We keep our Hold opinion on Amadeus with the same target price of EUR61 as we find the stock to be fairly valued. This reflects a 2023 P/E of 28x, largely in line with peers' average. 2022 result came largely in line with our estimate with revenue and EBITDA reaching 80.5% and 73.5% of 2019 level (pre-pandemic level) respectively, driven by all segments on better air bookings and passengers boarded. The company also managed to overturn its loss position in 2021 to post an adjusted profit of EUR742 million (58.8% of 2019 level) and expects to resume shareholder remuneration in 2023 (plan to propose a final gross dividend of EUR0.74 per share, representing 50% of reported profit). We see the continued recovery of air travel to drive performance in 2023 and forecast revenue to grow by ~21% (within management guidance of 20%-22.5% growth). Our 2023 EPS estimate of EUR2.20 remain unchanged, and we introduce 2024 estimate of EUR2.75. / Wan Nurhayati, CFA

November 07, 2022

03:29 AM ET... CFRA Maintains Hold Opinion on Shares of Amadeus [AMS SM 51.50***]:

We keep our Hold opinion on Amadeus and adjust our target price to EUR61 (from EUR64), reflecting a 2023 P/E of 28x, largely in line with peers' average. We maintain our 2022 revenue forecast, which assumes it will reach ~82% of 2019 level, on the back of the continued recovery of air travel which drove the performance of Q3 2022 results. Amadeus posted revenue of EUR1.2 billion in Q3 2022, representing 86.8% of Q3 2019 (pre-pandemic level), which was an improvement from 83% in Q2 and 65% in Q1. This was driven by all segments on better air bookings and passengers boarded. EBITDA also improved to 79.5% of Q3 2019 level (+4%-pts over Q2 2022 excluding the EUR51 million government grant effect), with margin of 37%. We keep our EPS estimates EUR1.62 for 2022 and EUR2.20 for 2023, as the latest result came in largely within our forecast. / Wan Nurhayati, CFA

August 01, 2022

01:54 AM ET... CFRA Maintains Hold Opinion on Shares of Amadeus [AMS SM 56.70***]:

We maintain our target price at EUR64, reflecting a 2022 P/E of 40x, which is above its 5-year average forward P/E of 37x and above its peers' average of 34x, justified by its higher EBITDA margin of 37% [vs. peers' 30%] and improving air travel outlook. The recovery of air travel driven by borders reopening continues to be the key driver behind the sequential growth of Amadeus' results. Q2 revenue has improved to 83% of 2019 level [vs. 65%], driven by solid air bookings and passengers boarded. Also, Amadeus has gained market shares in many regions, which should support above-industry growth rate in 2022 and 2023. Driven by strong topline recovery and benign opex, Q2 2022 EBITDA was still 6% above consensus estimates excluding EUR51 million government grant. No financial guidance was provided, but the air traffic data continue to show encouraging signs of recovery. We maintain our forecasts unchanged, which already assume ongoing improvement and the current valuation is fair in our view. / Jun Zhang Tan, CFA

May 09, 2022

04:27 AM ET... CFRA Maintains Hold Opinion on Shares of Amadeus [AMS SM 60.00***]:

We adjust our target price to EUR64 (from EUR61), reflecting a 2022 P/E of 40x (38x), which is above its 5-year average forward P/E of 37x and above its peers' average of 34x, justified by its higher EBITDA margin of 37% [vs. peers' 30%] and improving air travel outlook. AMS's Q2 2022 EBITDA was 8% above consensus estimates. Q2 2022 opex is expected to trend higher due to salary increases, but the overall fixed cost and capex growth for 2022 will still fall within 10-14% range, which is in line with consensus estimates. The key takeaway is the sequential improvement in revenue, driven by air traffic recovery which was particularly strong in March and April. North America continued to be the best performing region, but we expect to see more meaningful growth in Western Europe subsequently. Despite the improving outlook, we think a hold rating is fair given its expensive valuation. Our above-consensus forecasts have already reflected the strong recovery, providing little upsides to target price lifts. / Jun Zhang Tan, CFA

February 28, 2022

06:50 AM ET... CFRA Maintains Hold Opinion on Shares of Amadeus IT Group, S.A. [AMS SM 59.50***]:

We adjust our target price to EUR61 (from EUR63), reflecting a 2022 P/E of 38x, which is broadly in line with its 5-year average forward P/E of 37x and above its peers' average of 34x, justified by its higher EBITDA margin of 37% [vs. peers' 30%]. Q4 2021 results were broadly in line with consensus estimates where AMS's TA air bookings and passengers boarded continued to improve sequentially. While AMS did not provide specific guidance, it is pointing towards IATA's projection of air traffic to reach 60% of 2019 level in 2022. We maintain our 2022 revenue forecast, which assumes it will reach 80% of 2019 level, due to its IT and Hospitality Solutions which are growing and less correlated to air traffic demand. Nevertheless, AMS pointed out that total fixed cost (75% in P&L and 25% in capex) could grow by 10-14% due to inflation, growing R&D, and recovery of revenue. We reduce our 2022 EPS forecast to EUR1.62 (from EUR1.80) to reflect the higher cost and introduce 2023 EPS of EUR2.20. / Jun Zhang Tan, CFA

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsule the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Amadeus IT Group, S.A.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section seof the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.
