Past performance is not an indication of future performance and should not be relied upon as such.
Analysis prepared by Catherine Seifert on Aug 01, 2023 05:25 PM ET, when the stock traded at USD 349.01.

Highlights

- ▶ We forecast operating revenue growth of between 7% and 12% in 2023 and between 7% and 10% in 2024. During 2022, AMP posted a 2% decline in adjusted operating revenues (lagging our forecast of a 3% to 6% rise), as a 5% rise in Wealth Management revenues was offset by a 26% drop in Asset Management revenues and flat Retirement & Protection revenues. Margins were aided by well-contained operating costs. We expect growth in 2023 to remain pressured by mixed market performance, which is masking some decent growth trends in AMP's wealth management unit.
- ▶ We forecast adjusted EBIT margins of about 29% to 31% in 2023, versus 29.9% reported in the fourth quarter of 2022 (that was an improvement over 2021's 22.3%). This follows a multi-year period of mixed margin trends, beginning in 2014, when EBIT margins were 29.4% and steadily declined to 26.4% in 2015, and to 21.3% in 2016, before climbing again to 25.7% in 2017 and 27.2% in 2018, and declining to 23.6% in 2019.
- ▶ We expect a share buyback program will reduce the net share count by over 5% annually, producing operating EPS of \$30.30 in 2023 and rising to \$33.15 in 2024, and to \$36.60 in 2025.

Investment Rationale/Risk

- ▶ Our Buy recommendation reflects our view that AMP shares are undervalued versus peers and historical levels. We think AMP's ability to produce above-peer levels of revenue growth and expand margins in its core Advice & Wealth Management division should support the shares' current valuation. Our view is tempered by some mixed growth and profitability trends in AMP's asset management and annuity units. However, we expect AMP will take additional restructuring actions to shore up these units.
- ▶ Risks to our recommendation and target price include potential market depreciation, lower interest rates, and regulatory costs. There is also a risk that AMP has to increase long-term care insurance reserves.
- ▶ Our 12-month target price of \$400 reflects a multiple of 12.1x our 2024 EPS estimate of \$33.15 and 10.9x our 2025 EPS estimate of \$36.60, versus AMP's 10-year average forward multiple of 11x and the peer average of 12x, reflecting improved results in the core Advice & Wealth Management unit and steps the company has taken to shore up results in other areas, partly offset by some relative equity underperformance, and the company's slower-growing, more capital-intensive mix of business.

Analyst's Risk Assessment

LOW MEDIUM HIGH

Our risk assessment reflects our view of the company's significant franchise value and diversified business lines, offset by market volatility, fund performance risk, competitive pressures on fee income, and potential regulatory uncertainty.

Ameriprise Financial, Inc.

Business Summary Aug 01, 2023

CORPORATE OVERVIEW. Ameriprise Financial [AMP] is a diversified financial services firm with assets under management [AUM] and administration of \$1.3 trillion as of June 30, 2023.

The company offers a broad assortment of products, including mutual funds, annuities, and life insurance products. AMP was originally named Investors Diversified Services before it was acquired by American Express in 1984. We think the spin-off from American Express and the company's marketing campaign has raised AMP's visibility among prospective clients and helped to attract and retain financial advisers.

AMP has three operating segments. The Advice and Wealth Management segment (which accounted for 57% of segment pretax operating profits in 2022) provides financial advice and full-service brokerage and banking services, primarily to retail clients, through its financial advisers.

The Asset Management segment [22%] provides investment advice and investment products to retail and institutional clients. Threadneedle Investments predominantly provides international investment products and services, and RiverSource Investments mainly provides products and services in the U.S. for domestic customers. Its domestic products are primarily distributed through the Advice and Wealth Management segment and third parties, while international products are mostly distributed through third parties.

The Retirement and Protection Solutions segment [21%] offers a variety of protection products to address the identified protection and risk management needs of retail clients, including life, disability income, and property-casualty insurance. The Corporate and Other segment consists of net investment income on corporate level assets, including unallocated equity and other revenues from various investments as well as unallocated corporate expenses.

CORPORATE STRATEGY. AMP targets the mass affluent and affluent segments of the wealth management market, typically those households with between \$500,000 and \$5 million of investable assets. The firm seeks to help its targeted clients achieve their financial goals through a two-tiered approach of providing wealth and asset management products and services. A central element of this strategy is the AMP network of financial advisors. Through this proprietary network, AMP says it has the necessary tools to leverage two important asset and wealth management trends -- baby boomers' growing retirement needs and the accelerated growth in retirement assets held by the mass affluent and affluent.

AMP has grown both organically and through acquisitions, particularly in the asset management space, where acquisitions have included Threadneedle Asset Management Holdings, H&R Block Financial Advisors, Inc., J. W. Seligman Co. Incorporated, Columbia Management, Emerging Global Advisors, LLC, Investment Professionals, Inc., and Lionstone Partners, Inc. During 2021, AMP acquired BMO Financial Group's European-based asset management business.

CORPORATE GOVERNANCE. We view favorably the high proportion of independent directors on the board, but we would prefer that the company split the roles of chairman and CEO.

FINANCIAL TRENDS. AMP increased its revenues at a compound annual growth rate [CAGR] of 3.3% in the five years ending December 31, 2022, and its AUM increased at a CAGR of 6.0% during the same period. During 2022, GAAP net revenues advanced by 6%, as 3% lower asset management and financial fee income and a 12% drop in net investment income was offset by 6% higher distribution revenues, and a surge in premiums and contract charges. Margins were impaired following a 10% rise in expenses, as a 2% decline in distribution expenses [AMP's largest expense item] was offset by 11% higher interest costs and a 92% surge in benefit costs. As a result, pretax income declined by 5%. A higher tax rate of 19.6% versus 17.6% exerted additional pressure, and net income fell by 7%.

Firm-wide AUM as of December 31, 2022 equaled \$956.3 billion, down from just under \$1.2 trillion as of December 31, 2021. Equity funds accounted for 31% of December 31, 2022 AUM of the asset management segment, while fixed income funds comprised 22% of AUM, and money market and other funds for the remaining 47% of AUM.

Ameriprise Financial, Inc.**Sub-Industry Outlook**

We have a neutral fundamental outlook for the asset management and custody banks sub-industry. We think the long-term outlook is relatively healthy due to aging populations and a fairly healthy employment picture, despite the potential for some near-term volatility as markets react to higher interest rates and inflation. Demographic trends remain favorable, as millennials come of age and baby boomers play "catch-up" with contributions to IRAs, driving a significant increase in retirement investments, in our view. Millennials are also maturing and beginning to save for retirement. We see upside potential for asset managers with solid reputations, better-than-average fund performance, and strong management. Many of the companies in this sub-industry will also benefit from recently enacted legislative initiatives designed to encourage saving for retirement.

These positive longer-term factors are offset by some structural and secular changes within the industry, including a shift in investor preferences to ETFs and away from actively managed assets. Near-term market volatility will also impact many equity funds. Within this relatively broad-based sub-industry classification are companies engaged in asset management, trust and processing, and private equity activities. Each of these different entities' business models are influenced to varying degrees by changes in interest rates and by an array of industry-specific competitive dynamics. Within the asset management industry, there are some negative factors pressuring many firms. An ongoing shift out of active equity investments and into passive and fixed income investments has exerted downward pressure on fee revenues for most firms.

Growth in assets under management (AUM) is a key driver for many firms in this industry. It's important to differentiate between asset growth due to positive fund flow trends and asset growth due to market appreciation. AUM levels for most firms declined in 2022 along with the broader market averages, exacerbated by over \$1 trillion in

net outflows in 2022, with actively managed equity funds seeing the most dramatic outflows. First quarter results improved a bit, marked by \$706 billion of net inflows. As a result, results in recent periods have varied widely by firm, depending on the level of organic AUM growth. A negative trend that continues to linger is AUM growth, which does not directly translate to a similar rate of revenue growth due to increasing amounts of AUM flowing into lower revenue-producing, passively-managed assets.

At March 31, 2023 [latest available] assets in all worldwide open-end funds totaled \$63.1 trillion, up from \$60.1 trillion at year-end 2022. Equity assets continue to dominate the invested asset mix, accounting for more than 45% of the total asset base. Bond funds account for about 19% of the invested asset total, money market assets for 15%, and other funds (including real estate and balanced funds) account for the remaining 21% of fund assets.

A decline in asset values amid actions taken by the Federal Reserve to tame inflation led to a 21.7% drop in the S&P Asset Management & Custody Banks Index, versus a 19.1% decline in the S&P 1500 Index, during 2022. This was a sharp reversal from 2021, when a market recovery propelled the Asset Management & Custody Banks Index up by 31.9%, versus a 26.7% rise in the S&P 1500 Index. Year-to-date through August 11, 2023, the Asset Manager Index fell by 0.5%, versus a 15.70% rise in the S&P 1500.

Ameriprise Financial, Inc.

Analyst Research Notes and other Company News

July 28, 2023

12:12 AM ET... CFRA Keeps Buy Opinion on Shares of Ameriprise Financial, Inc. [AMP 348.50****]:

We raise our 12-month target price by \$55, to \$400, valuing AMP shares at 10.9x our newly initiated 2025 operating EPS estimate of \$36.60 and at 12x our 2024 operating EPS estimate of \$33.15 (upped today by \$0.25), versus their three-year average forward multiple of 11x and a peer average of 12x. AMP posted Q2 operating EPS of \$7.44 versus \$5.72, in line with our \$7.45 EPS estimate and versus the \$7.39 consensus view. As a result, we trim our 2023 EPS estimate by \$0.01, \$30.30. Q2 results reflected 11% revenue growth on 9% higher AUM [to \$1.3T], and wider margins on 1% lower expenses, while per share results were aided by buybacks that reduced the share count by 5.2%. We see 7%-12% revenue growth in 2023, which is above most peers. We view the shares, currently trading at 10.5x our 2024 EPS estimate [and yielding 1.5%], and with above-peer growth metrics, as undervalued versus peers. / Catherine Seifert

April 25, 2023

02:07 PM ET... CFRA Keeps Buy Opinion on Shares of Ameriprise Financial, Inc. [AMP 292.21****]:

We cut our 12-month target price by \$50 to \$345, valuing AMP shares at 10.5x our 2024 operating EPS estimate of \$32.90 [trimmed today by \$0.40] versus the shares' three-year average forward multiple of 11x. We lift our 2023 operating EPS estimate by \$0.06 to \$30.31 after AMP posted Q1 operating EPS of \$7.25 versus \$5.82 on a below-forecasted 3% rise in operating revenues. An 11% rise in core advice and wealth management revenues and 7% higher retirement revenues were offset by 21% lower asset management revenues. We lower our operating revenue growth forecast for 2023 to a rise of 5%-8% [down from 8%-12%], but keep our 7%-10% revenue forecast for 2024. Currently trading at 8.9x our 2024 EPS estimate and yielding 1.8% (following an 8% dividend increase), we view the shares as undervalued versus historical averages and see an easing of asset management pressures, coupled with continued gains in the wealth management unit's operating metrics, providing the shares with a catalyst. / Catherine Seifert

January 26, 2023

04:17 PM ET... CFRA Keeps Buy Opinion on Shares of Ameriprise Financial, Inc. [AMP 345.26****]:

We raise our 12-month target price by \$60, to \$395, valuing AMP shares at 13.1x our 2023 operating EPS estimate of \$30.25 [raised today by \$2.05] and at 11.9x our newly initiated 2024 operating EPS estimate of \$33.30, versus their one-year average forward multiple of 10.9x and a peer average of 14.7x. Q4 operating EPS of \$6.94 versus \$6.15 topped our \$6.45 EPS estimate and the \$6.48 consensus forecast on 2% lower operating revenues, well contained expenses, and 5% fewer shares on buybacks. Full year operating EPS of \$23.96 versus \$22.70 compared to our \$23.48 EPS estimate and the \$24.00 consensus forecast. We expect operating revenue growth of 8% to 12% in 2023 on 6% to 10% higher wealth management revenues and stable asset management results. Currently trading at 11.4x our 2023 EPS estimate, the shares are undervalued versus peers and we see AMP's organic AUM growth, boost from higher interest rates, and above-peer ROE [41% in Q4] providing the shares with a catalyst to close their valuation gap to peers. / Catherine Seifert

October 26, 2022

01:51 PM ET... CFRA Keeps Buy Opinion on Shares of Ameriprise Financial, Inc. [AMP 293.20****]:

We up our 12-month target price by \$45 to \$335, valuing AMP shares at 11.9x our '23 operating EPS estimate of \$28.20 versus its one-year average forward multiple of 11.2x and a peer average of 12.7x. We cut our '22 EPS estimate by \$0.56 to \$23.48. Q3 operating EPS of \$5.24 versus \$5.86 lagged our \$5.90 EPS estimate and the \$5.85 consensus forecast, but included a \$1.19 actuarial review charge. That aside, Q3 revenue growth of 20% topped our 3%-6% growth forecast on some unusual insurance premium shifts, 10% higher distribution fees, and a five-fold increase in banking interest revenues. We still see a 3%-6% in "normalized" operating revenues in '22, with gains of 8%-12% in '23 aided by AMP's growing banking presence. We also applaud asset inflows of \$64B in the TTM ended September 30, 2022, being masked by market weakness. Currently trading at 10.4x our '23 EPS estimate, with above-peer top-line growth and an above-peer ROE of 47% [YTD, excluding AOCI], we view the shares as undervalued versus peers. / Catherine Seifert

July 27, 2022

08:37 AM ET... CFRA Keeps Buy Opinion on Shares of Ameriprise Financial, Inc. [AMP 241.58****]:

We trim our 12-month target price by \$25, to \$290, or 10.3x our 2023 operating EPS estimate of \$28.20 [cut today by \$0.60], in line with AMP's three-year average forward multiple of 10.3x and a peer average of 10.1x. We lower our 2022 operating EPS estimate by \$1.26, to \$24.04, after AMP posted Q2 operating EPS of \$5.81 versus \$5.27, below our aggressive \$6.17 EPS estimate but above the \$5.55 consensus forecast, as 3% revenue gains [below our 9%-12% growth forecast] were partly enhanced by a 5.3% drop in expenses [aided by some improved claim trends amid the absence of prior year charges], and pretax profits rose 28%. We lower our 2022 operating revenue forecast to a rise of 3% to 6% [down from 9%-12%], but remain encouraged by AMP's ability rein in costs, and by the mere 2% decline in Q2 assets under management [to \$957.2B], as client inflows are offsetting market weakness. Currently trading 8.7x our 2023 EPS estimate and yielding 2.1%, we view the shares as undervalued versus peer, historical averages. / Catherine Seifert

April 26, 2022

03:06 PM ET... CFRA Keeps Buy Opinion on Shares of Ameriprise Financial, Inc. [AMP 267.07****]:

We lower our 12-month target price by \$25 to \$315, or 10.9x our 2023 operating EPS estimate of \$28.80 [raised by \$0.90 today] versus AMP's one-year average forward multiple of 12x and a peer average of 10.1x. We lift our 2022 operating EPS estimate by \$0.65 to \$25.30 after Q1 EPS of \$5.98 versus \$5.43, which topped our \$5.93 EPS estimate and the \$5.90 consensus forecast on 9% revenue growth, margin expansion due to a contained 4% rise in expenses, and 4.9% fewer shares on buybacks. Q1 revenue growth reflected 9% higher Wealth revenues and 23% higher Asset Management revenues, partly offset by 2% lower Retirement revenue on a 27% drop in variable annuity sales. We see revenue growth of 9% to 12% in 2022 and 8% to 12% in 2023 on continued momentum in the core wealth and asset management units. Currently trading at 10.5x our 2022 EPS estimate and yielding 1.9% following an 11% divided hike, with several attractive growth catalysts being masked by market weakness, we view the shares as attractively valued. / Catherine Seifert

January 27, 2022

12:05 AM ET... CFRA Keeps Buy Opinion on Shares of Ameriprise Financial, Inc. [AMP 298.79****]:

We lift our 12-month target price by \$10 to \$340, or 13.8x our 2022 operating EPS estimate of \$24.65 [raised today by \$1.00], 12.2x our 2023 operating EPS estimate of \$27.90 [upped by \$1.00], versus AMP's one-year average forward multiple of 12x and a peer average of 13.2x. Q4 operating EPS of \$6.15 versus \$4.53 topped our \$5.65 EPS estimate, the \$5.73 consensus forecast on 18% revenue growth [amid a 28% rise in fees on strength in core wealth and asset management units] and wider margins on a 3% rise in expenses. Full-year 2021 operating EPS of \$22.70 versus \$14.08 topped our \$22.21 EPS estimate, the \$22.31 consensus forecast on strong organic growth hand contributions from acquisitions. We see 10% to 15% operating revenue growth in 2022, above most peers. AMP's mix shift efforts have also yielded results, like the 51.2% GAAP ROE posted in 2021. Currently trading at 12x our 2022 EPS estimate, with dual catalysts of strong organic AUM growth and restructuring gains, we view the shares as undervalued. / Catherine Seifert

Forecasts are not reliable indicator of future performance.
Note: A company's earnings outlook plays a major part in any investment decision. S&P Global Market Intelligence organizes the earnings estimates of over 2,300 Wall Street analysts, and provides their consensus of earnings over the next two years, as well as how those earnings estimates have changed over time. Note that the information provided in relation to consensus estimates is not intended to predict actual results and should not be taken as a reliable indicator of future performance.
Note: For all tables, graphs and charts in this report that do not cite any reference or source, the source is S&P Global Market Intelligence.

Ameriprise Financial, Inc.

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsule the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Ameriprise Financial, Inc.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section of the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.

STARS Stock Reports:

Global STARS Distribution as of September 30, 2023

Ranking	North America	Europe	Asia	Global
