Analysis prepared by **Kenneth Leon** on Sep 29, 2023 07:00 PM ET, when the stock traded at **USD 81.60**.

Highlights

- Following a 17% increase in segment revenues in 2022 (in line with our forecasted 15%-20% rise), we predict segment revenue growth of between 12% and 17% in 2023 and 2024 on more muted market performance expectations, aided by strong asset inflows. Revenue growth in 2022 was partly supported by the January 2022 acquisition of approximately 65% of Athene Holding Ltd. [ATH] that APO did not already own. We expect this \$11 billion acquisition to be accretive.
- Assets under management [AUM] as of June 30, 2023 equaled \$617 billion, up 20% year-over-year; 73% was in yield generating assets, 10% in hybrid assets, and 17% in equity assets. Fee-generating AUM totaled \$462 billion as of June 30, 2023, up 21% from a year earlier. Perpetual capital totaled \$351 billion as of June 30, 2023 (or 57% of total AUM), up 14% year-over-year. During the 12 months ended June 30, 2023, inflows totaled \$154 billion, up from inflows of \$128 billion recorded in 2022. As of June 30, 2023, APO's private equity arm had "dry powder" of \$56 billion available to deploy.
- We estimate adjusted net earnings per share of \$6.65 in 2023, rising to \$7.80 in 2024 and to \$9.00 in 2025, versus adjusted EPS of \$5.21 reported in 2022.

Investment Rationale/Risk

- Our Buy opinion reflects our view that shares are undervalued versus peers, given some improving operating metrics, steps the firm has taken to reduce cyclical, and actions it has taken to make its shares more likely to be added to an index. We also think the successful resolution of some earlier leadership challenges is a positive for APO's long-term fundraising efforts.
- Risks to our recommendation and target price include a weakening business cycle in many industries that APO invests in and the global economy being unable to recover from the current recession. Efforts have been made to simplify reporting, but APO remains a complex company.
- Our 12-month target price of \$100 is based on a forward P/E of 12.8x our 2024 earnings estimate and 11.1x our 2025 earnings estimate. This compares to APO's three-year average forward multiple of 13.9x and a peer average of 14.8x. The shares currently yield 2.1%, adding to potential total return. Compared to peers, APO has the highest concentration of fixed income investments, with bond holdings that are complex and sometimes illiquid. APO also has an above-peer level of perpetual capital, reducing the need for extensive fundraising.

Analyst's Risk Assessment

LOW **MEDIUM** **HIGH**

Our risk assessment reflects the company's complex and less transparent portfolio of investments, its operational and trading risks, and its reliance on performance fees, which can be extremely volatile. We view APO's decision to simplify and streamline its corporate structure with a conversion to a single class of voting stock (with equal voting rights for all shareholders) positively since it increases APO's eligibility for index inclusion. We also think the resolution of certain governance issues improves APO's risk profile.

Apollo Global Management, Inc.

Business Summary Aug 11, 2023

CORPORATE OVERVIEW. Founded in 1990, Apollo is a leading global alternative investment manager. The firm’s investment philosophy is contrarian, applying a value-oriented investing style in private equity, credit, and real estate with significant distressed investment expertise. APO has a flexible mandate in many of the funds that it manages. This enables the firm to invest its funds in different ways.

APO has grown its total AUM at a 17% compound annual growth rate during the period from December 31, 2012 to December 31, 2022. The firm’s activities cover raising, investing, and managing funds on behalf of pension, endowment, and sovereign wealth funds, as well as other institutional and individual investors. During periods of market dislocation and volatility, APO relies on its credit and capital market expertise to build positions in distressed debt. During 2022, APO experienced net capital inflows of \$128 billion, which rose to \$154 billion in the 12 months ended June 30, 2023. The firm deployed \$162 billion of capital during 2022 and at December 31, 2022 had “dry powder” of \$51 billion available for investment. Dry powder at June 30, 2023 increased to \$56 billion.

IMPACT OF MAJOR DEVELOPMENTS. On January 3, 2022, APO completed its acquisition of the approximately 65% of Athene Holdings Ltd (ATH) it did not already own in an \$11 billion all-stock transaction whereby every ATH share was exchanged for 1.149 of an APO common share in an accretive transaction. After closing, APO has set its annual dividend at a fixed rate of \$1.60 a share. Concurrent with this announcement, APO also further streamlined its corporate structure and converted to a single class of voting stock. We believe this move greatly increases the chances of APO shares being included in an index.

On January 25, 2021, APO announced a series of leadership changes and enhancements to its corporate governance, including the retirement [effective July 31, 2021] of Chairman and CEO (and co-founder) Leon Black, who found himself embroiled in controversy over his ties to convicted sex offender Jeffrey Epstein (who provided consulting services to Black and his family foundation, but not to Apollo). Marc Rowan was named as the successor CEO, and APO’s board has expanded to include four new independent directors and APO’s two Co-Presidents.

CORPORATE STRATEGY. APO’s investment approach is value-oriented, focusing on nine core industries in which it has considerable knowledge and experience, emphasizing downside protection and the preservation of capital. The firm has three business segments: private equity, credit, and real estate. It also manages AP Alternative Assets, L.P., a publicly listed permanent capital vehicle. The sole investment held by AAA is its investment in AAA Investments, L.P., which owns the majority of the economic equity of Athene Holding Ltd. Athene Holding Ltd. was founded to capitalize on favorable market conditions in the dislocated life insurance sector.

Private Equity represents investing across market cycles, where APO thinks it has developed a unique set of skills to make new investments and maximize the value of its existing investments. Some of the categories for private equity investment include distressed buyouts and debt investments, corporate care-outs, opportunistic buyouts, and other investments.

Credit is a core expertise that serves as an integral component of APO’s growth and success. The credit segment’s holdings are across a diverse range of credit-oriented investments that utilize the same disciplined, value-oriented investment philosophy that it employs with respect to its private equity funds.

Real Estate takes a broad view of markets and property types in targeting debt and equity investment opportunities, including the acquisition and recapitalization of real estate portfolios, platforms, and operating companies, as well as distressed for control situations. The firm invests through a combination of investment funds, strategic accounts, and Apollo Commercial Real Estate Finance, Inc., a publicly-traded, commercial mortgage real estate investment trust managed by Apollo.

FUND FLOW AND AUM TRENDS. As of December 31, 2022, APO had total AUM of \$548 billion [of which about \$412 billion, or about 75%, was fee-generating], including approximately \$321 billion of perpetual capital [which is capital not tied to the typical private equity lockups and exit strategies]. Year-end 2022 AUM included \$392 billion [or 72%] of yield generating assets, \$99 billion [or 18%] in equity assets, and the remaining \$56 billion [or 10%] in hybrid assets. Inflows of \$128 billion in 2022 [up from \$75 billion in 2021] reflected \$71 billion of flows into asset management accounts [up from \$38 billion in 2021] and \$48 billion into retirement services accounts, up from \$37 billion in 2021].

COMPETITIVE LANDSCAPE. APO expects to face competition in acquisitions primarily from other private equity, credit and real estate funds, specialized funds, hedge fund sponsors, other financial institutions, corporate buyers, and other parties. Several of these competitors have significant amounts of capital and many of them have similar investment objectives to APO, which may create additional competition for investment opportunities. Competition is also intense for the attraction and retention of qualified employees.

FINANCIAL TRENDS. In addition to reporting earnings on a GAAP basis, the firm’s primary non-GAAP reporting format is adjusted net income, which is the sum of fee related earnings, spread related earnings, and principal investment income, less holding company interest and other financing costs and taxes.

Sector Outlook

CFRA recommends marketweighting the S&P 500 Financials sector. Year-to-date through October 13, 2023, the S&P 500 Financials index, which represented 12.7% of the S&P 500 index, was down 3.1% in price, compared with the 12.7% gain for the S&P 500. In 2022, this sector index fell 12.4% versus a price decline of 19.4% for the 500. There are 13 sub-industry indices in this sector. Diversified banks is the largest, representing 21.2% of the sector's market value, while reinsurance is the smallest, accounting for 0.38% of the sector. This sector can be represented by the Financial Select Sector SPDR ETF [XLF 33 ****].

The cap-weighted average of this sector's component company CFRA STARS (STock Appreciation Ranking System) is 3.6 out of 5.0, as compared with a cap-weighted average of 3.7 for the S&P 500. In addition, the sector has an above-average percentage of component issues with favorable investment recommendations. The sub-industries within this sector that currently show the highest average STARS are asset management, consumer finance, investment banking & brokerage, multi-line insurance, reinsurance, and transaction processing & payment services. Those with the lowest average STARS include diversified banks, insurance brokers, life & health insurance, and multi-sector holdings.

Tailwinds for the group include 1) financials posting the highest average price increase in the period between the last rate hike/first rate cut since 1988; 2) CFRA projecting a soft landing, not a recession; 3) us seeing the Federal Reserve starting a rate-cutting cycle around mid-2024; 4) consumers and households remaining resilient to pricing pressures (fuel, shelter, food, and other costs); 5) project credit delinquencies, credit loan losses, and net charge offs to be manageable by banks and other lenders; and 6) struggling commercial real estate office, which is typically just 1%-4% of loans for most banks.

Headwinds include 1) tighter lending standards; 2) rising household debt; 3) weak consumer

confidence/sentiment; 4) higher capital requirements for banks; and 5) "higher for longer" stance by the Federal Reserve.

According to S&P Capital IQ consensus estimates, sector EPS declined 15.6% in 2022 versus the 4.6% gain for the S&P 500, while sector revenues increased 4.5% versus the 12.1% gain recorded by the market on the whole. Sector EPS are projected to decline 3.2% in 2023 versus the 0.1% decline seen for the S&P 500, while sector revenues are forecast to fall by 12.1% versus the 1.1% anticipated gain for the market. For 2024, sector EPS should rise 6.3% compared to the S&P 500's 11.7% increase, with sector revenues gaining 4.5% compared with the market's gain of 5.2%. The sector's price-to-earnings (P/E) ratio is 13.5x, based on consensus next-12-month operating EPS estimates, versus the S&P 500's forward P/E of 18.8x. S&P Capital IQ also reports that the consensus long-term EPS growth estimate for this sector is 10.7% versus the S&P 500's 12.7%, giving the sector a P/E-to-projected EPS growth rate (PEG) ratio of 1.3x, as compared with the broader market's PEG of 1.5x. This sector pays a dividend yield of 2.0%, versus the yield of 1.7% for the S&P 500.

Finally, the technical outlook for this sector index is negative, based on its trailing 40-week (200-day) relative strength.

Apollo Global Management, Inc.

Analyst Research Notes and other Company News

August 03, 2023

01:06 PM ET... CFRA Keeps Buy Opinion on Shares of Apollo Global Management, Inc. [APO 84.03****]:

We raise our 12-month target price by \$25 to \$100, valuing APO shares at 11.1x our newly initiated 2025 adjusted EPS estimate of \$9.00 and at 12.8x our 2024 EPS estimate of \$7.80 [upped by \$0.30], versus the three-year average forward multiple of 13.9x and a peer average of 14.8x. We lift our 2023 adjusted EPS estimate by \$0.15 to \$6.65 after Q2 EPS of \$1.70 versus \$0.94 topped our \$1.48 EPS estimate and the \$1.65 consensus forecast on growth in both spread [up 76%] and fee-related earnings [up 30%]. Q2 Asset Management fees rose 25% at a time when many peers are posting declines. AUM of \$617B at June 30 rose 19.8% year-to-year, primarily on \$112B of net inflows. Retirement Services results were also strong, with normalized spread-based earnings up 52% in Q2. While APO has shifted its business mix to one that is more spreads-based than some private equity peers, we think the successful execution of this strategy provides the shares with a catalyst to close the valuation gap with peers. / Catherine Seifert

May 09, 2023

11:23 AM ET... CFRA Reiterates Buy Opinion on Shares of Apollo Global Management, Inc. [APO 62.54****]:

We lower our 12-month target by \$10 to \$75, valuing APO shares at 10x our 2024 adjusted EPS estimate of \$7.50 [trimmed today by \$0.25], in line with its one-year average forward P/E multiple of 10x, but below its three-year average forward multiple of 14.9x and the peer average of 14.1x. We lower our 2023 EPS estimate by \$0.20 to \$6.50 after Q1 EPS of \$1.42 versus \$1.53 lagged our \$1.46 EPS estimate and the \$1.47 consensus, as 10% higher fee and spread earnings [which account for most of segment profits] were offset by much lower principal investing income [of \$8M versus \$187M]. We note assets under management (AUM) of \$598B at March 31, 2023, rose 17% year-over-year, aided by net inflows of \$115B. Despite some near-term macro headwinds, we view the shares, currently trading at 9.6x our 2023 EPS estimate and yielding 2.8%, as undervalued versus peers. We also see APO's three pronged growth strategy of asset origination [including securitized products], global wealth, and capital solutions, as driving growth. / Catherine Seifert

March 06, 2023

09:41 AM ET... CFRA Keeps Buy Opinion on Shares of Apollo Global Management, Inc. [APO 73.11****]:

We raise our 12-month target price on the shares by \$5 to \$85, or 12.7x our 2023 adjusted EPS estimate of \$6.70 and 11.0x our 2024 EPS estimate of \$7.75, versus a five-year average forward multiple of 14.1x and a peer average of 14.5x. Following a 17% rise in segment revenues in 2022, we look for segment revenue growth of 12%-17% in 2023 and 2024, reflecting more muted market performance expectations, aided by strong asset inflows and contributions from the firm's insurance operations. Despite challenging market conditions, APO grew AUM by 10% in 2022 to \$548 billion, of which \$321 billion (or 59%) was perpetual capital and not subject to typical private equity terms and restrictions, providing APO with a more stable revenue base. At current levels, the shares [which currently yield 2.2%] trade at 10.9x our 2023 adjusted EPS estimate and at 9.4x our 2024 EPS estimate. We view APO as undervalued versus peer and historical averages and see strong organic AUM growth trends as a catalyst for the shares. / Catherine Seifert

February 09, 2023

12:11 PM ET... CFRA Keeps Buy Opinion on Shares of Apollo Global Management, Inc. [APO 70.10****]:

We up our 12-month target by \$8, to \$80, valuing APO shares at 10.3x our newly initiated 2024 adjusted EPS estimate of \$7.75 and at 11.9x our 2023 EPS estimate of \$6.70, versus a five-year average forward multiple of 14.1x and a peer average of 14.5. Q4 adjusted EPS of \$1.42 versus \$1.05 lagged our \$1.48 EPS estimate and the \$1.50 consensus forecast a bit, despite 22% higher segment revenues. Full year EPS of \$5.21 versus \$4.56 compared to our \$5.27 EPS estimate and the \$5.29 consensus view on 17% segment revenue growth [versus our 15%-20% growth forecast]. We see 12%-17% higher segment revenues in 2023/2024 on a shift to more perpetual capital strategies. AUM of \$548B at year-end 2022 rose 10%, year to year, including inflows of \$128B and \$321B [59%] of perpetual capital, above most peers. Currently trading at 10.5x our 2023 adjusted EPS estimate and yielding 2.5%, the shares are undervalued, in our view vs. peer and historical averages; we see top-tier organic AUM growth as a catalyst for outperformance. / Catherine Seifert

November 02, 2022

02:30 PM ET... CFRA Keeps Buy Opinion on Shares of Apollo Global Management, Inc. [APO 61.33****]:

We up our 12-month target price by \$4, to \$72, valuing APO at 10.7x our 2023 adjusted EPS estimate of \$6.70, versus the shares' five year average forward multiple of 14.2x and a peer average of 16x. We keep our 2022 operating EPS estimate of \$5.27 after APO posted Q3 adjusted EPS of \$1.33 versus \$1.71, matching our \$1.33 EPS estimate, topping the \$1.23 consensus forecast, on 20% higher segment revenues [in line with our 15% to 20% forecasted rise] amid 16% higher management fees [APO's core revenue component], flat performance revenues, and a 60% rise in advisory revenues. We see segment revenue growth of 15% to 20% in 2022 and 17% to 22% in 2023 as APO leverages demand for alternative assets, while margins benefit from a rise in interest rates. Weighing the shift in APO's business model with APO's ability to execute this strategy, we view the shares [now yielding 2.7%], currently trading at 9x our 2023 EPS estimate and at 11.4x our 2022 EPS estimate, as undervalued versus peer and historical levels. / Catherine Seifert

August 05, 2022

01:02 AM ET... CFRA Keeps Buy Opinion on Shares of Apollo Global Management, Inc. [APO 57.99****]:

We trim our 12-month target price by \$2, to \$68, or 10.1x our 2023 adjusted EPS estimate of \$6.70 [raised today by \$0.10], versus the shares' one-year average forward multiple of 12.8x and a peer average of 15x. We trim our 2022 adjusted EPS estimate by \$0.30, to \$5.27, after APO posted Q2 adjusted EPS of \$0.94 versus \$1.14, below our \$1.16 EPS estimate and the \$1.02 consensus forecast, on 13.7% higher segment revenues, partly offset by some margin contraction. We still see 15% to 20% segment revenue growth in 2022, and a rise of 17%-22% in 2023. Weighing APO's more stable revenue base, albeit potentially slower growing, given its acquisition-driven shift to retirement services and asset management, we still view the shares as undervalued, versus peer and historical averages, and see continued favorable fund flow trends [trailing-12-month inflows totaled \$110B on a \$515B AUM base] providing the shares [which currently yield 2.8%] with a catalyst. / Catherine Seifert

May 05, 2022

03:21 PM ET... CFRA Keeps Buy Opinion on Shares of Apollo Global Management, Inc. [APO 53.78****]:

We lower our 12-month target price by \$8, to \$70, or 10.6x our 2023 operating EPS estimate of \$6.60 [raised today by \$0.15] and 12.3x our 2022 operating EPS estimate of \$5.67 [lifted by \$0.27 today], versus the shares' one year average forward multiple of 15.1x and a peer average of 14x. Q1 operating EPS of \$1.52 versus \$0.66 topped our \$1.15 operating EPS estimate, and the \$0.98 consensus forecast on an acquisition-driven 70% rise in operating revenues. We don't see this level of growth as a run rate, but we still see segment revenue growth of 15% to 20% in 2022 and 17% to 22% in 2023. Despite difficult market conditions, AUM of \$512.8B rose 11.2%, year to year, aided by net inflows of \$63.8B. Though near term market and macro pressures will likely produce near term headwinds for the shares, at current levels they trade at 9.5x our 2022 operating EPS estimate and yield 3%, and are undervalued versus peer and historical averages, with favorable long term secular and organic growth trends as catalysts. / Catherine Seifert

Forecasts are not reliable indicator of future performance.

Note: A company's earnings outlook plays a major part in any investment decision. S&P Global Market Intelligence organizes the earnings estimates of over 2,300 Wall Street analysts, and provides their consensus of earnings over the next two years, as well as how those earnings estimates have changed over time. Note that the information provided in relation to consensus estimates is not intended to predict actual results and should not be taken as a reliable indicator of future performance.

Note: For all tables, graphs and charts in this report that do not cite any reference or source, the source is S&P Global Market Intelligence.

Apollo Global Management, Inc.

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsule the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Apollo Global Management, Inc.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section of the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.
