Analysis prepared by **Keith Snyder** on Sep 26, 2023 03:18 PM ET, when the stock traded at **USD 177.96**.

Highlights

- ▶ Following sales growth of 48.6% in 2022, we see 31.2% growth in 2023 and 10.9% growth in 2024. Results in 2022 were supported by strong campus demand and spending by cloud titan customers. Spending by cloud titan customers will slow in 2023 as companies pulled forward a considerable amount of orders in 2022 due to fulfillment delays and will now have to digest the excess inventory. Results have been impacted by component shortages and manufacturing challenges, which caused lead times of 50-80 weeks on some components, but ANET has mitigated the issue by building inventory ahead of anticipated demand. We see long-term growth supported by ANET's push into campus networking, with new product launches and the acquisition of Mojo Networks.
- ▶ We expect gross margins in 2023 and 2024 to be between 61.5% and 62.5%, respectively, compared to 61.9% in 2022, affected by sales to large end customers, which generally receive lower pricing, higher capital expenditures, manufacturing costs, merchant silicon costs, and the mix of products sold.
- ▶ We see 2022 and 2023 operating margins as likely in the 41.0%-41.3% range, versus 35.0% in 2022, as ANET reinvests in research and development.

Investment Rationale/Risk

- ▶ Our recent upgrade to Hold reflects our view strong enterprise demand will make up for any short-fall in cloud titan spending and that AI will be a stronger tailwind moving forward than we originally projected, as customers have quickly shifted spending to build out these specialized networks. We are slightly concerned about ANET's high customer concentration, with Meta and Microsoft making up 25.5% and 16% of total revenue, respectively. In addition, late period product shipments may have benefited Q4 revenue growth by pulling forward some sales at the expense of future growth. We believe its push into the campus market will continue to progress well in 2023.
- ▶ Risks to our recommendation and target price are tied to intense competition, customer concentration, and a potential slowdown in capital spending for cloud computing.
- ▶ Our \$200 target price is based on a P/E of 29.3x our 2024 EPS estimate, in line with its five-year forward average P/E, reflecting our long-term growth outlook and strong demand from enterprise customers.

Analyst's Risk Assessment

LOW	MEDIUM	HIGH
-----	--------	------

Our risk assessment reflects the highly competitive nature of the networking equipment industry, with ANET competing against a number of larger, better-capitalized companies. In addition, companies must invest heavily in R&D to keep up with the latest trends and technologies.

Arista Networks, Inc.

Business Summary Sep 26, 2023

CORPORATE OVERVIEW: ANET is a leading supplier of cloud networking solutions that uses software innovations to address the needs of large-scale internet companies, cloud service providers, and next-generation data centers and campuses for enterprise support. The company’s cloud networking solutions consist of its Extensible Operating System, or EOS, a set of network applications and its Ethernet switching and routing platforms. ANET’s cloud networking solutions deliver industry-leading performance, scalability, availability, programmability, automation, and visibility. At the core of its cloud networking platform is EOS, which was purpose-built to be fully programmable and highly modular. The programmability of EOS has allowed ANET to create a set of software applications that address the requirements of cloud networking, including workflow automation, network visibility, and analytics, and has also allowed ANET to rapidly integrate with a wide range of third-party applications for virtualization, management, automation, orchestration, and network services.

In 2015, ANET introduced CloudVision, a network-wide approach for workload orchestration and workflow automation, delivering a turnkey solution for cloud networking. The Company says CloudVision’s abstraction of the physical network to this broader, network-wide perspective allows for a more efficient approach for several operational use-cases related to automation, visibility, management, security, and third-party controller integration. In 2018, ANET announced a new network architecture designed to address transitional changes as the enterprise moves to an Internet of Things-ready campus. Leveraging EOS and CloudVision, its Cognitive Cloud Networking approach brings operational consistency and modern cloud principles to the enterprise campus. In 2019, ANET completed the introduction of 10 new 400G platforms. In 2021, ANET continued to expand its 400G product portfolio for both enterprise and cloud customers with the introduction of the next generation 7050X/7060X and 7300X Series switches, delivering performance and cost benefits for customers of all sizes as they transition to 400G. It also continued to expand its cognitive campus edge portfolio with the new C-360 Wi-Fi 6E access point to take advantage of the greater capacity, higher bandwidth, and lower latency of Wi-Fi 6E.

CORPORATE STRATEGY. The company is focused on cloud networking solutions that consist of its proprietary EOS, a set of network applications and its 10/25/40/50/100/400 Gigabit Ethernet switches. ANET’s value proposition in the market is offering cloud networking solutions that deliver industry-leading performance, scalability, availability, programmability, automation, and visibility. Since the company began shipping its products, ANET has grown rapidly, and it has achieved the second largest market share in data center 10/25/40/50/100 Gigabit Ethernet switch ports, excluding China.

Since shipping its first products in 2008, ANET’s cumulative end-customer base has grown rapidly. Between December 31, 2011 and December 31, 2022, ANET’s cumulative end-customer base grew from 1,100 to more than 9,000. ANET’s end customers span a range of industries that include large Internet companies, service providers, financial services organizations, government agencies, media and entertainment companies, and others.

CUSTOMER CONCENTRATION RISK. To continue to grow its revenue, it is important that the company obtains both new customers and sells additional products to existing customers. During the year ended December 31, 2021, Microsoft accounted for 15.0% of total sales.

COMPETITIVE LANDSCAPE. ANET competes with large network equipment and system vendors, including Cisco Systems, Juniper Networks, Hewlett-Packard Enterprises, and Dell. The company also faces competition from other companies and new market entrants, some of which may be its current technology partners and end customers. In our view, ANET’s ability to compete will depend upon its ability to provide a better solution than its competitors at a more competitive price.

KEY DEVELOPMENTS. During the three months ended September 30, 2018, ANET acquired Mojo Networks and Metamako Holding in order to extend its cognitive cloud networking architecture and to improve next generation platforms for low-latency applications. The total value of these acquisitions was approximately \$117.3 million. In February 2020, ANET acquired Big Switch Networks, Inc., a network monitoring and software-defined networking provider, for \$73.3 million in cash. This acquisition expanded ANET’s data center networking solutions and further strengthened its network monitoring and observability suite delivered through its software platform CloudVision and DANZ [DataANalyZer] capabilities. In October 2020, ANET acquired Awake Security, a network detection and response [NDR] platform provider, for \$180.5 million. This acquisition added to ANET’s product line an NDR platform that combines artificial intelligence [AI] with human expertise to autonomously hunt for and respond to insider and external threats.

FINANCIAL CONDITION. As of June 30, 2023, cash and cash equivalents were \$3.74 billion. We think that ANET’s existing cash and cash equivalents combined with cash proceeds from operations will be sufficient to meet its working capital requirements for at least the next 12-18 months. There is no long-term debt, but a \$51.7 million long-term lease financing obligation. In the first half of 2023, revenues increased 45.7%. The increase was driven by 51.1% growth in product revenue, driven by strong demand for its switching and routing platforms from across its customer base, including healthy contributions from larger customers, and 18.3% growth in service revenue, as a result of continued growth in initial and renewal support contracts as its customer installed base continues to expand.

Arista Networks, Inc.**Sub-Industry Outlook**

Our fundamental outlook for the Communications Equipment sub-industry is positive. We view the continued rapid consumption of network capacity, buoyed by the proliferation of tablets and smartphones, as a solid long-term growth driver for the industry, and we see an improving operating outlook in 2023. We are concerned with the ongoing semiconductor component shortages, and forecast it will be difficult to meet demand. We expect these supply chain issues will begin to fade throughout 2023, but will remain challenging overall. The Covid-19 outbreak acted as a strong headwind for this industry.

Service provider equipment purchases began to pick up by the end of 2015 as these carriers and enterprises shifted from legacy networks to new architectures. Last year saw choppy capital spending patterns as many companies focused on M&A efforts. In 2023, we see strong positive secular demand trends with the start of the WiFi 6 upgrade cycle, the move toward 400-gig networking equipment, and the deployment of 5G network cores.

While carriers have been cautious during the past several years due to the economy, we think spending will increase ahead as the need for new technologies, such as 5G in the wireless space, cloud computing, network security, and big data, continues to grow. We expect accelerated wireless equipment funding related to the emerging demand for wireless connectivity to things in both enterprise and household applications. In the next few years, spending priorities will likely shift to the early stages of the fifth generation for wireless applications, in our view, driven by a rapid rise in mobile broadband and the increased use of smartphones and tablets.

In 2018 and 2019, the enterprise segment gained wider acceptance with data center consolidation, server virtualization, and cloud computing. The industry is undergoing a technology shift toward convergence, where customers require product platforms to offer computing, networking, storage, and other applications all in one box. The Covid-19 outbreak in 2020 further accelerated this trend. As

a result of this trend, market segments have become more intertwined, with traditional data networking companies finding themselves in competition with server and computing players. We expect the need for integrated solutions to continue to push companies in the next 12 months to aggressively partner or acquire missing technologies going forward.

Year-to-date through September 29, the S&P 1500 Communications Equipment Index rose 11.7% versus 10.9% growth for the S&P 1500 Composite Index. In 2022, the Communications Equipment Index was down 22.2% versus a 19.1% decline for the S&P 1500. We note the sub-industry is heavily weighted to Cisco (\$217 billion market cap).

Analyst Research Notes and other Company News

September 26, 2023

02:23 PM ET... CFRA Raises Opinion on Shares of Arista Networks, Inc. to Hold from Strong Sell [ANET 178.85***]:

We raise our 12-month target price by \$80 to \$200, 29.3x our '24 EPS estimate, in line with its five-year forward average P/E, reflecting our better growth outlook. We keep our '23 EPS estimate at \$6.17 and increase '24's by \$0.03 to \$6.82. While we remain concerned with rising inventory levels, we are now less negative on the company overall following Cisco System's [CSCO 53 ****] financial results and recent industry data. We see the slowdown in spending by "one specific Cloud Titan customer," who we believe is Meta Platforms [META 298 ****], as nothing more than a push out of demand rather than a reduction and expect strong spending by enterprise customers to make up the difference. In addition, we expect spending on AI by both Cloud Titan and Enterprise customers will be a stronger tailwind moving forward than we originally projected, as companies are quickly shifting resources to building out these specialized networks. / Keith Snyder

August 03, 2023

12:33 AM ET... CFRA Maintains Strong Sell Opinion on Shares of Arista Networks, Inc. [ANET 177.28*]:

We keep our 12-month target price at \$120, 19.4x our '23 EPS estimate, a premium to peers, reflecting our stronger growth outlook. We raise our '23 EPS estimate by \$0.32 to \$6.17 and increase '24's by \$0.39 to \$6.79. ANET reported Q2 operating EPS of \$1.58 vs \$1.08, \$0.14 above the consensus. Q2 revenue increased 38.7%, fueled by strong enterprise growth and improving lead times. ANET benefits from three refresh cycles with its customers, the first being 100 gigabit migration by enterprises, 200 and 400 gigabit migration in the cloud, and 400 going to 800 gigabits for AI workloads. We note that META has signaled a slowdown in capex from previously elevated levels, which will modestly impact growth, but we expect this drop to be more than offset by strong enterprise demand. ANET now expects full-year growth to be in excess of 30% vs 26% growth previously as supply chain conditions improve and execution remains strong. / Keith Snyder

May 02, 2023

01:58 PM ET... CFRA Maintains Strong Sell Opinion on Shares of Arista Networks, Inc. [ANET 137.71*]:

We lower our 12-month target price by \$10 to \$120, 20.5x our 2023 EPS estimate, a discount to its five-year forward average P/E at 29.3x, reflecting our growth concerns. We raise our 2023 EPS estimate by \$0.05 to \$5.85 and increase 2024's by \$0.03 to \$6.40. ANET reported Q1 operating EPS of \$1.43 vs. \$0.84, \$0.08 above the consensus. Q1 revenue increased 54% as ANET continues to experience improvements in component supply, supporting more consistent levels of manufacturing output and some improvements in lead times. These lead time improvements are expected to reduce ANET's visibility, as customers will no longer need to make purchase decisions so far in advance. We are concerned that cloud titan spending will moderate following a year of accelerated demand in '22. We believe this slowdown by its largest customers will limit the upside potential for revenue growth over the next few quarters. / Keith Snyder

April 06, 2023

01:29 PM ET... CFRA Lowers Opinion on Shares of Arista Networks, Inc. to Strong Sell from Hold [ANET 160.49*]:

We cut our 12-month target price by \$30 to \$130, 22.4x our 2023 EPS estimate, a discount to its five-year forward average P/E at 29.3x, reflecting our long-term growth concerns. We keep our 2023 and 2024 EPS estimate at \$5.80 and \$6.37, respectively. We are concerned that cloud titan customers have increased the useful lives for networking and server equipment by an average of three years since 2019, which, if due to elongated replacement cycles, could pressure ANET's future revenue. ANET's significant customer concentration also concerns us, with Meta Platforms and Microsoft accounting for 25.5% and 16% of 2022 revenues, respectively. In the past, we have seen these large companies quickly and unexpectedly cut spending, which significantly impacted ANET's results. In addition, late period product shipments may have benefitted Q4 revenue growth by pulling forward some sales at the expense of future growth. / Keith Snyder

February 15, 2023

02:28 PM ET... CFRA Maintains Hold Opinion on Shares of Arista Networks, Inc. [ANET 142.25***]:

We raise our 12-month target price by \$10 to \$160, 27.6x our '23 EPS estimate, a

premium to the peer average, reflecting recent strong results. We increase our '23 EPS estimate by \$0.92 to \$5.80 and set '24's at \$6.37. ANET reported Q4 operating EPS of \$1.41 vs. \$0.82, \$0.20 above the consensus. Q4 revenue increased 54.7%, largely driven by growth in product revenue. While ANET experienced some improvement in the overall component supply in the quarter, shipments remained somewhat constrained by lingering shortages on a handful of parts. We are concerned with ANET's high customer concentration, with Meta and Microsoft making up 25.5% and 16% of total revenue, respectively. We have seen these two companies unexpectedly cut spending in the past, which severely impacted ANET's results and we are concerned it could happen again given economic uncertainties. / Keith Snyder

November 01, 2022

05:14 PM ET... CFRA Maintains Hold Opinion on Shares of Arista Networks, Inc. [ANET 127.71***]:

We keep our 12-month target price at \$150, 30.7x our '23 EPS estimate, a premium to the peer average, reflecting strong results. We raise our '22 EPS estimate by \$0.33 to \$4.33 and increase '23's by \$0.38 to \$4.88. ANET reported Q3 operating EPS of \$1.25 vs. \$0.74, \$0.20 above the consensus. Q3 revenue increased 11.9% sequentially, driven by strong overall demand for its products across all areas of the business, despite ongoing supply chain issues with supplier decommits, constraining shipments, and higher-cost broker purchases. ANET is experiencing one of its best ever cloud titan growth and revenue this year since its IPO and expects this category to contribute north of 45% of its total revenue this year. The 400gig upgrade cycle is accelerating, with Microsoft and Meta spending heavily to upgrade their infrastructure, which we expect to continue for the foreseeable future. / Keith Snyder

August 02, 2022

03:52 PM ET... CFRA Maintains Hold Opinion on Shares of Arista Networks, Inc. [ANET 117.79***]:

We keep our 12-month target price at \$150, 33.3x our '23 EPS estimate, a premium to peers, reflecting ANET's recent strong quarter and what we see as conservative guidance. We raise our '22 EPS estimate by \$0.33 to \$4.00 and increase '23's by \$0.26 to \$4.50. ANET reported Q2 operating EPS of \$1.08 vs \$0.68, \$0.16 above the consensus. Q2 revenue increased 48.7%, as demand remains healthy across all areas of the business. While the supply environment remains challenging with ongoing supplier decommits constraining shipments and requiring higher cost broker purchases and expedited fees, we view the Q2 results as extremely strong. Based on commentary, we believe most of the strength came from its cloud titan customers, which bodes well for the company if global macroeconomic uncertainty increase, as demand from these customers is typically much more stable throughout economic cycles. / Keith Snyder

Forecasts are not reliable indicator of future performance.
Note: A company's earnings outlook plays a major part in any investment decision. S&P Global Market Intelligence organizes the earnings estimates of over 2,300 Wall Street analysts, and provides their consensus of earnings over the next two years, as well as how those earnings estimates have changed over time. Note that the information provided in relation to consensus estimates is not intended to predict actual results and should not be taken as a reliable indicator of future performance.
Note: For all tables, graphs and charts in this report that do not cite any reference or source, the source is S&P Global Market Intelligence.

Arista Networks, Inc.

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsule the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARs (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARs (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARs (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARs (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Arista Networks, Inc.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section of the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.
