Analysis prepared by **Emily Nasseff Mitsch** on Oct 10, 2023 12:45 AM ET, when the stock traded at **USD 264.20**.

Highlights

- ▶ Q2 sales fell 14% Y/Y on destocking in nonresidential roofing, volume declines in residential markets, and difficult Y/Y comparisons, partially offset by strength in aerospace. We think CSL will benefit from gains in nonresidential construction spending/upgrades as building codes become more eco-conscious and in aerospace as production rates recover to pre-pandemic levels, but will see some offset from residential markets. We expect 2023 sales to fall 7% and 2024's to rise 6%.
- ▶ EBIT margin fell 120 bps Y/Y on lower volume, partially offset by positive pricing and CIT profit growth. We expect EBIT margin to contract in 2023 on lower volumes, partially offset by cuts to SG&A and moderation in key raw material prices (steel and aluminum). We also forecast that CSL's new products, including a thermoplastic polyolefin designed to reduce labor on large projects and an improved foam and facer technology, will drive margin and sales growth in 2024. We see the 2023 EBIT margin falling 60 bps and 2024's rising 100 bps.
- ▶ We estimate 2023's EPS to fall 12% and 2024's to rise 10%.

Investment Rationale/Risk

- ▶ Our Buy rating is driven by our valuation as we calculate that shares are undervalued, according to our estimates. We note we have a positive short- and long-term outlook on demand for CSL's energy-efficient products, such as insulation and roofing, as regulators push for energy-efficient upgrades and as building codes become more eco-conscious. We also positively view CSL's announcement to sell Carlisle Fluid Technologies, which closed in October 2023, as we believe it will lead to increased financial flexibility with items such as share buybacks and dividends.
- ▶ Risks include a prolonged downward trend in residential construction, lower-than-expected growth in eco-conscious building codes, delayed recovery in commercial airplane production rates, and elevated raw material costs.
- ▶ Our 12-month target price is \$302 using a forward P/E of 15.5x our 2024 EPS estimate, below the five-year historical average of 17x. We note that CSL has healthy debt levels with net debt/EBITDA of 1.5x, below the peer average of 2.1x, and more than \$1 billion in undrawn revolving credit.

Analyst's Risk Assessment

LOW	MEDIUM	HIGH
-----	--------	------

The primary risk facing CSL is the cyclical nature of some of its key end markets, in our view. Demand for products related to new commercial roofs and wiring for new aircraft can fall during periodic downturns in construction or aerospace markets, respectively. We think CSL adequately mitigates this risk by also supplying replacement and maintenance materials, which can smooth out demand cycles as replacement spending tends to be less cyclical than new build spending. The company's growing exposure to less cyclical markets like health care, as well as its conservative debt levels, also help mitigate risk, in our opinion.

Carlisle Companies Incorporated

Business Summary Oct 10, 2023

CORPORATE OVERVIEW. Carlisle Companies designs and manufactures products that serve a variety of industrial markets, with its largest source of sales being construction materials used primarily in commercial roofing and building envelopes and aerospace wiring and connectors. Carlisle operates in four segments: Carlisle Construction Materials [59% of total 2022 sales], Carlisle Weatherproofing Technologies [24%], Carlisle Interconnect Technologies [13%], and Carlisle Fluid Technologies [4%]. Carlisle derives 86% of its sales from U.S. markets, with international markets generating 14% of sales in 2022, with Europe accounting for 6% of this 14%. One of the company's goals is to continue to expand its global presence to capitalize on growing economies around the world.

Carlisle Construction Materials [CCM] is a diversified manufacturer and supplier of easy-to-install and energy-efficient premium roofing products and related technologies primarily for the commercial construction market. CCM offers high-performance, single-ply roofing solutions that include EPDM, thermoplastic polyolefin [TPO], polyvinyl chloride [PVC], architectural metal, and roof garden systems. Demand for CCM's energy-efficient roofing solutions is driven by the need to replace older, existing roofs on nonresidential structures, and to a lesser extent, new construction. Key growth initiatives in this segment include driving innovation through enhanced focus on research and development, focusing on mergers and acquisitions to drive synergistic building envelop opportunities.

Carlisle Weatherproofing Technologies [CWT] is a leading provider of high-performance waterproofing and moisture protection products, protective roofing underlayments, integrated air/vapor barriers, spray polyurethane foam and coating systems, and block-molded expanded polystyrene insulation for the building envelope. CWT operates manufacturing facilities and distribution locations throughout the U.S. and Canada, and the majority of CWT's products are sold through distribution throughout North America. Key growth initiatives are similar to CCM's.

Carlisle Interconnect Technologies [CIT] designs and manufactures high-performance wire and cable, including optical fiber, for the commercial aerospace, military, and defense electronics and the medical device, industrial, and test and measurement markets. CIT is also known as a single-source global provider of innovative medical device solutions and electromechanical technology. Key growth initiatives include increasing content per aircraft across all product groups, increasing market share on defense electronics and space programs, and leveraging vertically integrated capabilities to consolidate supply chains across strategic end markets.

Carlisle Fluid Technologies [CFT] designs, manufactures, and sells highly engineered liquid, powder, sealants, and adhesives, as well as high pressure foam equipment and integrated system solutions for spraying, pumping, mixing, metering, and curing a variety of coatings used primarily in the auto manufacture, general industrial, transportation, and insulation markets. Approximately 54% of CFT's revenues come from outside the U.S. Key growth initiatives include: expanding global distribution network by developing partners in growing regions and markets, expanding product portfolio by launching new products in adjacent markets and filling gaps in existing product portfolio, and driving higher aftermarket sales servicing CSL's growing installed base of equipment.

On June 15, 2023, CSL announced a definitive agreement to sell its CFT segment to an affiliate of Lone Star Funds in a transaction valued at \$520M. The transaction closed on October 2, 2023.

BUSINESS DRIVERS. Given CSL's focus on the commercial roofing market and its U.S. focus, U.S. construction activity is a key driver for its business. Nonresidential construction is generally of more importance for Carlisle, as its roofing and insulation materials are used more in commercial and industrial buildings than houses. In 2022, U.S. nonresidential construction spending increased 15% [Federal Reserve data] and, according to S&P Global, is forecasted to increase 8% in 2023, driven by growth in Industrial [+17%] and Hospitality [+15%]. That said, commercial spending is expected to grow by only 4%. Overall, we have a positive short- and long-term outlook on CSL's energy-efficient roofing for nonresidential construction as regulators push for energy-efficient upgrades.

Fluctuations in demand for aerospace equipment can also have a significant impact on CSL, given aerospace wiring and connectors sold from its Interconnect segment are its second largest product category, after roofing materials. We expect demand for CSL's aerospace products to grow significantly over the short and medium term as production levels climb back to pre-pandemic levels.

CORPORATE STRATEGY. Carlisle's track record of growth has been achieved through a disciplined approach that combines organic growth in its core businesses with targeted acquisitions of related product companies with relatively high margins, solid growth prospects, and a limited number of competitors. This method has allowed Carlisle to achieve a leading position in most of its markets while generating above-average returns on capital and relatively steady growth.

FINANCIAL TRENDS. Total sales increased 37% from 2021-2022, driven by positive pricing, strength in CIT [aerospace and medical end markets], and the resilience of U.S. commercial roofing demand [CCM]. Operating income increased 121% from 2021-2022, driven by lower COGS and SG&A as a percentage of revenue and savings from the Carlisle Operating System [COS]. CSL also repurchased \$400 million worth of shares in 2022 and pays a dividend of 1.36% annually.

Cash from operations increased 134% from 2021-2022, driven by higher net income and strong working capital management. Free cash flow [FCF] increased over 5x from 2021-2022 and we forecast FCF to increase 15% in 2023.

Carlisle Companies Incorporated

Sub-Industry Outlook

We have a neutral outlook for the building products sub-industry over the next 12 months. The residential housing market is seeing lower volume and demand due to high interest/mortgage rates, and we expect this to continue through 2023, but improve in 2024 with expected rate cuts. In addition, we expect repair & remodeling [R&R] activity to decrease primarily due to a decrease in existing home sales. Yet, we have a positive long-term outlook on the residential and R&R markets given the average age of U.S. housing stock and historically low housing supply relative to demand levels. We see positive offset from higher demand for clean energy products due to the government's carbon reduction incentives, and a rise in nonresidential construction spending.

New home construction is a key factor for future growth in residential building products. We believe high interest/mortgage rates will have a negative impact on new home building in 2023 (average 30-year mortgage rates are now at a high of 7% as of August 2023), but have a positive medium-to long-term view as housing inventory remains historically low relative to demand levels. As of July 2023, housing starts have increased 6% since July 2022, but are still very low relative to historical levels. Also, Fannie Mae forecasts housing starts to decline by 9% in 2023. Although we think the worst of residential is most likely over, we believe the rest of 2023 will still show Y/Y weakness, but expect modest growth in 2024 with expected rate cuts.

We expect R&R spending to be a negative as homeowners delay R&R due to declining home sales, high interest rates, and higher costs of contractor labor. Existing home sales have declined 17% in the last year and are expected to decline by a total of 13.6% in 2023. Despite the drastic Y/Y rise in home prices, which allows homeowners more access to capital through home equity loans/lines of credit, we think homeowners will delay R&R. The Leading Indicator of Remodeling Activity, which projects the Y/Y change in homeowner improvements and repairs

on a four-quarter moving basis, projects spending to fall from a reported 9.5% in Q2 to an estimated -5.9% by Q2 2024. That said, we have a bullish long-term outlook for R&R due to the average age of U.S. housing stock, with homes in need of home improvements/remodeling.

We expect government incentives for cleaner energy in homes and buildings to be an important positive driver in the building products industry in 2023 and 2024. Major tax credit incentives for home HVAC and rooftop solar were included in the energy and climate related sections of the Inflation Reduction Act of 2022. There are billions in incentives for commercial building energy and HVAC systems to be decarbonized and we believe this will benefit companies focused on clean energy and sustainability.

Nonresidential construction spending is also a positive driver we foresee in 2023 and 2024. Manufacturing, health care, and education construction spending have been the main growth drivers in 2023, [+71%, +11%, and +10%, respectively, since one year ago] and are forecasted to increase mid-single digits in 2024. Additionally, according to the AIA's most recent report in July 2023, ABI for commercial/industrial rose to 52.7, the highest it's been since June 2022 and institutional remained above 50 [positive] at 51.2.

YTD through September 7, 2023, the S&P 1500 Building Products index is +27%, outperforming the S&P 1500 Industrial index [+10%] and the S&P 1500 [+15%].

Analyst Research Notes and other Company News

July 28, 2023

10:38 AM ET... CFRA Upgrades Opinion of Carlisle Companies Incorporated to Buy from Hold [CSL 273.43****]:

We lift our 12-month target by \$57 to \$302 on a forward P/E of 15.5x our 2024 EPS estimate, below the three-year average of 16.9x on estimated demand weakness in certain segments. We raise our 2023 EPS by \$0.42 to \$17.62 and cut 2024's by \$0.12 to \$19.48. Q2 sales fell 14% Y/Y on destocking in nonresidential roofing, volume declines in residential markets, and difficult Y/Y comparisons, partially offset by strength in aerospace. By segment: Construction Materials [CM; 62% of Q2 sales] -15% Y/Y; Weatherproofing Technologies [24%] -20% Y/Y; and Interconnect Technologies [IT; 14%] +3% Y/Y. CSL posted Q2 EPS of \$5.18, a \$0.55 consensus beat. We expect the rest of 2023 to be somewhat challenging for CSL, with volume declines in residential markets and weather disruptions prolonging inventory destocking in CM. That said, order backlog in CM remains strong and we see aerospace as a bright spot in IT with in-flight entertainment as aircraft build rates rebound. We also view CSL's energy-efficient solutions favorably. / Emily Nasseff Mitsch

June 20, 2023

02:52 PM ET... CFRA Cuts Rating of Carlisle Companies Incorporated to Hold from Buy [CSL 239.61****]:

We raise our 12-month price target by \$5 to \$245 using a forward P/E of 12.5x our 2024 EPS estimate, below the three-year historical average of 17x, but in line with the one-year average. We raise our 2023 EPS estimate by \$0.16 to \$7.20 and 2024's by \$0.38 to \$19.60. We view CSL's announcement to sell Carlisle Fluid Technologies [CFT], which is expected to close Q3 2023, as a positive as we believe it will lead to increased financial flexibility with items such as share buybacks and dividends. Despite this positive view, as well as our positive long-term outlook on CSL's energy-efficient buildings solutions as building codes become more eco-conscious, we downgrade our rating to a Hold as we believe shares are currently close to fair value. / Emily Nasseff Mitsch

April 28, 2023

10:26 AM ET... CFRA Reiterates Buy Opinion on Shares of Carlisle Companies Incorporated [CSL 218.13****]:

We lower our 12-month target by \$25 to \$240 on a forward P/E of 12.5x our 2024 EPS estimate, conservatively below both the three-year historical average of 17.5x and the peer average of 15x. We cut our 2023 EPS estimate by \$2.86 to \$17.04 and 2024's by \$2.89 to \$19.22. Q1 sales declined 21% Y/Y on prolonged destocking in nonresidential roofing [due to inclement weather] and volume declines in residential markets, partially offset by strong volumes and positive pricing in Carlisle Interconnect Technologies and Carlisle Fluid Technologies, representing a combined 24% of total Q1 sales. CSL posts Q1 EPS of \$2.57, a \$0.05 consensus miss. Despite cuts to our sales, margin, and EPS estimates, we stand by our Buy rating as we believe shares are undervalued by about 10%, and we have a positive long-term view on CSL's energy-efficient solutions for buildings, as building codes become more eco-conscious. We also view CSL's new products, including a TPO designed to reduce labor on large products, as favorable for growth. / Emily Nasseff Mitsch

March 15, 2023

11:51 AM ET... CFRA Upgrades Opinion on Shares of Carlisle Companies Inc. to Buy from Hold [CSL 225.80****]:

We raise our 12-month price target by \$2 to \$265, using our 2024 EPS estimate and a forward P/E of 12x, conservatively below both the peer average of 16x and the three-year historical average of 18x. We lower our 2023 EPS estimate by \$0.11 to \$19.90 and raise 2024's by \$0.14 to \$22.11. We upgrade our rating to a Buy as we think shares show significant upside potential of ~15%, according to our estimates. We also have a positive short- and long-term outlook on CSL's energy efficient roofing for commercial construction as regulators push for energy efficient upgrades. We note CSL has healthy debt levels, with net debt to EBITDA of 1.4x, below the peer average of 2.1x, and has strong free cash flow generation, with FCF to net income of 92%. / Emily Nasseff Mitsch

February 08, 2023

11:51 AM ET... CFRA Maintains Hold Opinion on Shares of Carlisle Companies Inc. [CSL 255.77****]:

We lower our 12-month target by \$19 to \$263 using our '24 EBITDA estimate and a forward EV/EBITDA multiple of 8.7x. We lower our '23 EPS estimate by \$0.61 to

\$20.01 and '24's by \$1.13 to \$21.97. CSL Q4 sales increased 5.7% Y/Y driven by strengthening in aerospace & medical end markets in Carlisle Interconnect Technologies [CIT], resilient demand in U.S. commercial roofing in Carlisle Construction Materials [CCM], and positive price realization. CSL posted Q4 EPS of \$3.92, beating consensus by \$0.16. We think CSL will continue to benefit from gains in CIT with aerospace & medical end markets in 2023. That said, we think residential demand weakness will be a significant headwind given new housing starts and construction trends. We also expect margin to expand ~100 bps, with gains particularly in the summer months, as CSL cuts SG&A, and key raw material prices, such as steel & aluminum, moderate. We note that CSL has healthy debt levels with total debt/EBITDA of 1.9x and over \$1b in undrawn revolving credit. / Emily Nasseff Mitsch

November 21, 2022

12:16 AM ET... CFRA Lowers Rating on Shares of Carlisle Companies to Hold from Buy [CSL 250.75****]:

We lower our 12-month target to \$282 from \$298 based on solid 3Q22 results given the macroeconomic environment and the fifth quarter in a row with a consensus beat on both revenue and EPS. Our target is the product of our 2023 EPS estimate of \$20.62 [now \$0.78 higher] and a significantly lower P/E of 13.7x, a 6-month mean, down from our previously used 5-year mean to better reflect current market conditions. We also raise our EPS forecast for '22 by \$1.55 to \$19.90 and initiate 2024 at \$23.10. 3Q22 revenue of \$1.79B grew 36% Y/Y, 28% on an organic basis, and beat by \$4m, while adjusted EPS of \$5.66 beat sell-side consensus by \$0.23, driven by a 475bps Y/Y expansion of gross margin. Management lowered full-year revenue guidance for '22 from a point estimate of \$6.734B, implying 40% Y/Y growth, to a range of \$6.494B to \$6.734B, implying 35% to 40% growth, with CEO Koch cautioning that it will "continue to operate in a highly uncertain and volatile environment." / CFRA Research

April 29, 2022

05:07 PM ET... CFRA Lifts View on Shares of Carlisle Companies Incorporated to Buy from Hold [CSL 265.00****]:

We lift our 12-month target to \$298 from \$240, 15x our 2023 EPS estimate [raised to \$19.84 from \$14.51; 2022 raised to \$18.35 from \$13.34]. Q1 adjusted EPS of \$4.26 beat sell-side consensus of \$2.47 with much higher-than-expected revenue and operating margin. Q1 revenue grew 59% Y/Y with a large contribution from the Q3 2021 acquisition of Henry, which comprises most of CSL's newly formed Weatherproofing segment [24% of sales]. CSL also generated excellent organic sales growth of 45% Y/Y, with a wave of pent up demand for roofing work being unleashed as Covid-19 restrictions eased, and high energy prices also spurring robust demand for building energy efficiency improvements. We knew CSL had excellent brand power, but its ability to materially outpace high inflation with price increases has surprised us, driving an impressive jump in adjusted operating margin to 21.3% vs. 16.0% in Q4 2021. Given the firm's outstanding margin improvement and healthy sales growth outlook we see strong upside for the shares. / Richard Wolfe

Carlisle Companies Incorporated

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsule the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Carlisle Companies Incorporated

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section of the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.
