Analysis prepared by Catherine Seifert on Jul 31, 2023 03:05 AM ET, when the stock traded at USD 205.98.

Highlights

- ▶ We forecast net written premium growth of 9% to 15% in 2023 and 8% to 12% in 2024, amid a still-healthy premium pricing environment that we expect will be enhanced by stable demand for commercial lines coverage despite near-term economic cross currents. We expect CB to leverage its dominant position in the large commercial lines market and produce growth above the industry average, possibly via acquisitions (despite its failure to secure a deal with The Hartford). Net written premiums rose by 10% in 2022 and 12% in 2021, a recovery from the 4.8% rise posted in 2020.
- ▶ The rebound in operating profitability we expect in 2023 is skewed by an elevated level of weather-related catastrophe losses incurred in 2022. Covid 19 related claims, however, have moderated. Still, we expect underwriting results to remain profitable, and superior to most peers, evidenced by the combined ratio that ended 2022 at 87.6% [84.2% before catastrophes], versus 89.1% in 2021 [84.8%].
- ▶ We forecast operating EPS of \$18.45 in 2023, rising to \$20.30 in 2024, and to \$22.35 in 2025, versus operating EPS of \$15.24 CB posted in 2022.

Investment Rationale/Risk

- ▶ Our opinion on the shares is Buy. We think CB's ability to leverage pricing strength will provide the shares with a catalyst. We are also encouraged that claim costs have moderated despite higher catastrophes. We view CB as a top-tier underwriter, and believe the combination of this strength with a strong pricing environment and an increase in demand for coverage amid an economy recovery provides the shares with a powerful catalyst. Long term, we also see CB poised to gain share from weaker competitors in the aftermath of this crisis.
- ▶ Risks to our opinion and target price include a greater-than-forecasted deterioration in claim trends and reserve levels, and deterioration in the credit quality of the investment portfolio.
- ▶ Our 12-month target price of \$245 assumes the shares will trade at a multiple of 12.1x our 2024 operating EPS estimate and at 11x our 2025 operating EPS estimate. These target multiples compare with a disparate peer average of 14.1x (including some slower growing firms that lack CB's market presence and balance sheet strength and some faster growing firms) and CB's three-year average forward multiple of 13x.

Analyst's Risk Assessment

LOW MEDIUM HIGH

Our risk assessment reflects CB as an opportunistic underwriter, offset by concerns we have about reserve levels in certain lines of business, and the potential that credit quality in CB's fixed income investment portfolio could deteriorate.

Chubb Limited

Business Summary Jul 31, 2023

CORPORATE OVERVIEW. Chubb Limited [CB] was created when ACE Ltd. acquired The Chubb Corporation on January 14, 2016, for some \$28.3 billion in cash and stock. As the world’s largest publicly traded, property-casualty insurer, CB operates in 54 countries around the world. CB underwrites an array of commercial, personal property, and casualty insurance; personal accident and supplemental health insurance; reinsurance; and life insurance. Within this array of product lines, CB has a market-leading position in industrial commercial and mid-market traditional and specialty property-casualty coverage. It is also a leader in high-net-worth personal lines insurance coverage, and in supplemental accident and health insurance coverage.

Net written premiums totaled \$41.8 billion in 2022, up 10.3% from \$37.9 billion in 2021. Net earned premiums advanced 11%, to \$40.4 billion in 2022, from \$36.4 billion in 2021. A well- contained 6.2% rise in loss and loss adjustment expenses, driven by higher weather-related losses and an easing of Covid-19 catastrophe claims, led to a 16% increase in core operating income, to \$6.5 billion in 2022, from \$5.6 billion in 2021. Assets of the combined entity equaled \$199 billion at December 31, 2022, and included an investment portfolio of \$113.6 billion of primarily investment-grade fixed income securities. Loss reserves, CB’s largest liability, equaled \$73.6 billion at December 31, 2022, while shareholders’ equity totaled \$50.5 billion at year-end 2022.

Commercial Lines property-casualty insurance accounted for 58% of net written premiums in 2022, while Personal Lines coverage accounted for 18% of net written premiums, Global Accident & Health for 12%, Global Reinsurance for 2%, North American Agriculture for 6%, and Life Insurance for the remaining 4% of net written premiums.

Despite CB’s global footprint, North American is still its primary market, accounting for over 60% of net written premiums in 2022.

One of CB’s key strengths is a solid underwriting track record, as measured by the combined [loss and expense] ratio. During 2022, the combined ratio equaled 87.6%, an improvement from the 89.1% combined ratio CB reported in 2020, reflecting an easing of catastrophe and Covid-19 related claims. The underlying combined ratio [which excludes catastrophes] also improved to 84.2% in 2022, from 84.8% in 2021. These results remain superior to industry averages in both years. A combined ratio of under 100% indicates an underwriting profit, while one in excess of 100% points to an underwriting loss.

COMPETITIVE LANDSCAPE. The property-casualty insurance market is highly competitive, marked by periods of “soft” premium pricing owing to an excess of underwriting capacity and “hard” pricing environments amid a reduction in capacity. Industry-wide, insurance pricing has firmed in the aftermath of several years of record catastrophe losses, and non-catastrophe claim cost inflation, including that brought on by “social inflation”. However, the insurance industry remains under-leveraged and with adequate underwriting capacity, or capital [referred to as policyholders’ surplus under statutory accounting principles]. At March 31, 2023 [latest available], CFRA estimates the property-casualty insurance industry had a policyholders surplus of about just over \$1 trillion, which was supporting a written premium base of approximately \$782 billion. Regulators typically allow insurers to leverage their capital base two times. In other words, insurers are permitted to write \$2 worth of premiums for every \$1 of surplus. At March 31, 2023, insurers were, on average, writing approximately \$0.77 worth of premiums for every \$1 of surplus [or capital], indicating an environment marked by excess underwriting capacity. However, pricing for most lines of coverage has firmed considerably in the wake of record catastrophe claims, the impact of social inflation and the costs of Covid-19. An economic recovery, particularly in the U.S., will also help the demand curve for insurance. While CB has not been immune to industry-wide competitive pressures, we think the firm’s top-tier industry position and balance sheet strength give it a competitive advantage.

IMPACT OF MAJOR DEVELOPMENTS. Despite the aforementioned challenges we see facing the insurance industry, we do not expect a large-scale increase in merger and acquisition activity. Rather, we anticipate that firms will strategically seek acquisition candidates. The company’s recent acquisitions highlight this strategy. On July 1, 2015, ACE agreed to acquire Chubb Corp for \$28.3 billion in cash and stock in a transaction that was completed on January 14, 2016. We view this deal positively, since the firms’ business mixes and geographic footprints complement each other. In December 2014, ACE completed its acquisition of The Fireman’s Fund high net worth personal lines business from Allianz on April 1, 2015, for some \$365 million in a transaction that will greatly expand ACE’s presence in this area. One of the company’s more significant deals occurred in late 2010, when it acquired the 80% of Rain and Hail Insurance Service, Inc. that it did not already own, for approximately \$1.1 billion in cash. Rain and Hail is the second largest crop insurer in the U.S. More recently, ACE acquired Fianzas Monterrey, a Mexican surety lines insurer, for \$293 million in cash in early 2013, and in early 2014, it agreed to acquire 60.9% of The Siam Commercial Samaggi Insurance PCL for some \$185 million.

FINANCIAL TRENDS. CB’s underwriting results remained profitable in 2022 despite an erosion in some claim trends, continuing the firm’s long-term superior performance relative to industry averages. In each of the last five years, CB’s underwriting results [as measured by the combined loss and expense ratio] were profitable and exceeded industry averages. During the five years ended December 31, 2022, CB produced a combined ratio that averaged 90.8%.

Chubb Limited

Sub-Industry Outlook

CFRA's fundamental outlook for the property & casualty insurance sub-industry is positive. Despite some persistent claim cost inflation and some uncertainty over the level of claims stemming from the myriad of recent catastrophes, industry profitability in most lines of coverage is set to improve in 2023 amid an expected easing of heavy worldwide catastrophe claims that plagued most insurers in recent years. However, these losses will likely extract enough excess underwriting capacity from the insurance marketplace to cause rates for many lines of coverage to remain firm. The degree to which demand decreases for certain types of insurance products, particularly those in the commercial lines area, will depend on the health of the broader economy in the U.S. and overseas and the degree to which they are able to withstand a rise in interest rates. Underwriting results in the core personal auto and homeowners' line will likely remain unprofitable in 2023, as persistently high claims inflation [caused in part by supply chain issues] could hamper further margin gains, particularly among personal lines auto insurers.

A firming of rates (particularly in the commercial lines segment) will likely propel net written premiums by about 7%-10% in 2023 and by 6%-10% in 2024, in our estimation. This compares with the 8.3% rise in net written premiums reported in 2022 [in line with our 7%-10% growth forecast], and the 8% rise posted in 2021.

Operating profitability in the property-casualty industry is heavily influenced by the level of weather and catastrophe losses. Worldwide catastrophe losses totaled about \$270 billion in 2022, down slightly from \$280 billion in 2021 and below the record of about \$350 billion set in 2017. Insured losses were around \$120 billion in 2022, or about 44% of total losses, above a long-term average we estimate to be around 40%, but below the 51% of catastrophe losses that were covered by insurance in 2018, reflecting a shift in the type of catastrophes, as fires [which are more comprehensively covered by insurance] accounted for more of the catastrophes in 2018, while

hurricanes [whose flooding is typically excluded from insurance coverage] typically account for the majority of catastrophes. Following the rise in catastrophe losses and an uptick in claims costs in several core line of coverage [including personal auto], underwriting results deteriorated in 2022. As a result, the combined [loss and expense] ratio—a key underwriting metric—deteriorated in 2022 to 102.7% from 99.6% in 2021, 98.8% in 2020, and 99.0% in 2019.

As of March 31, 2023 [latest available], the industry had \$1 trillion in policyholder surplus [or capital], supporting its written premium base of about \$782 billion. The industry was leveraging its capital at less than a 1:1 ratio. Assuming a historical [and somewhat theoretical] benchmark 2:1 leverage of capital, we estimate the industry had “excess” capital of over \$300 billion. We think this “excess” capital [or underwriting capacity] has enabled insurers to leverage the firmer pricing environment and grow their book of business—a trend that may continue as demand and pricing remain firm.

During 2022, the S&P Property & Casualty Insurance Index rose by 12.6%, while the S&P 1500 Index declined by 19.1%. Year-to-date through August 11, 2023, the S&P Property & Casualty Insurance Index declined by 3.5%, while the S&P 1500 Index rose 15.7%.

*For Peer Groups with more than 10 companies or stocks, selection of issues is based on market capitalization.
NA-Not Available; NM-Not Meaningful.
Note: Peers are selected based on Global Industry Classification Standards and market capitalization. The peer group list includes companies with similar characteristics, but may not include all the companies within the same industry and/or that engage in the same line of business.

Chubb Limited

Analyst Research Notes and other Company News

July 26, 2023

12:40 PM ET... CFRA Keeps Buy Opinion on Shares of Chubb Limited [CB 206.49****]:

We lift our 12-month target price by \$10 to \$245, valuing CB shares at 11x our newly initiated 2025 operating EPS estimate of \$22.35, and at 12.1x our 2024 EPS estimate of \$20.30 [upped today by \$0.30], versus the shares' three-year average forward multiple of 12.7x and a peer average of 14.1x. We lift our 2023 EPS estimate by \$0.52 to \$18.45 after Q2 operating EPS of \$4.92 versus \$4.22 topped our \$4.40 EPS estimate and the \$4.42 consensus view, on 16% higher written premiums [versus our 8%-12% forecast] amid strong P&C pricing and demand and contributions from acquisitions. We also note that amid record catastrophes and claim cost inflation, Q2 loss costs rose 9.2%, less than the 15% rise in earned premiums, producing a combined ratio of 85.4% [83.3% underlying] versus 84% [83.5%], significantly better than the industry average of around 100%. Currently trading at 10.2x our 2024 EPS estimate, with above-peer growth and underwriting profitability metrics, we view the shares as undervalued versus peers. / Catherine Seifert

April 26, 2023

11:44 AM ET... CFRA Keeps Buy Opinion on Shares of Chubb Limited [CB 198.68****]:

We cut our 12-month target price by \$25 to \$235, valuing CB shares at 11.8x our 2024 operating EPS estimate of \$20.00, versus the shares' one-year average forward multiple of 12x and a peer average of 14.3x. We trim our 2023 EPS view by \$0.17 to \$17.93 after operating EPS of \$4.41 versus \$3.83 lagged our EPS estimate and the consensus view of \$4.46 on a 38% rise in pre-tax catastrophe losses [\$458M versus \$333M]. Still, underwriting results remained profitable and superior to peers, with a combined ratio of 86.35 versus 84.3%. We also laud Q1 top-line growth, with operating revenues up 18% on 16% higher premiums and 35% higher investment income. We expect property-casualty written premiums to rise by 8%-12% in 2023 [above peers], and see contributions from life acquisitions and a rebound in investment income propelling operating revenues up by 12%-15% [above peers]. Trading at a below-peer 9.9x '24 estimate EPS, with above peer growth and underwriting profitability metrics, we view the shares as undervalued. / Catherine Seifert

January 31, 2023

06:42 PM ET... CFRA Keeps Buy Opinion on Shares of Chubb Limited [CB 227.49****]:

We up our 12-month target by \$20, to \$260, valuing CB shares at 13x our newly initiated 2024 operating EPS of \$20.00, 14.4x our 2023 EPS estimate of \$18.10 [lifted today by \$0.25], versus a five-year average forward multiple of 13.1x and a peer average of 16x. Q4 operating EPS of \$4.05 versus \$3.81 lagged our \$4.20 estimate and the \$4.25 consensus, on a \$0.39 crop insurance shortfall. Full-year operating EPS of \$15.24 versus \$12.56 also lagged our \$15.40 estimate and the \$15.45 consensus forecast, though written premium growth of 10.3% [13% before a negative currency impact] was in line with our 8%-12% growth forecast. We also note underwriting results improved, evidenced by the 87.6% [84.2% underlying] versus 89.1% [84.8%] combined ratio, superior to peer averages. We see 8%-12% written premium growth in 2023 amid strong pricing and stable demand. Currently trading at 12.6x our 2023 EPS estimate [a 20%-plus discount to peers], with above peer underwriting metrics, CB shares are undervalued, in our view. / Catherine Seifert

October 26, 2022

11:39 AM ET... CFRA Keeps Buy Opinion on Shares of Chubb Limited [CB 206.42****]:

We lift our 12-month target price by \$15, to \$240, or 13.4x our '23 operating EPS estimate of \$17.85 [upped today by \$0.70], versus CB's three year average forward multiple of 13.2x, a peer average of 14x. We trim our '22 EPS estimate by \$0.26, to \$15.40, after CB posted Q3 operating EPS of \$3.17 versus \$2.64, versus our \$3.62 EPS estimate, the \$2.61 consensus forecast on an in-line, above-peer, 8.5% rise in net written premiums [11.2% before FX impact], partly offset by catastrophe claims of \$1.16B versus \$975M. Underwriting results remained profitable, evidenced by the 93.1% versus 93.4% combined loss and expense ratio, and underlying [X-catastrophe] results improved, with an underlying combined ratio of 84% versus 84.8%. We think CB's ability to produce top line growth of 8%-12% , enhanced with selective acquisitions, and to consistently produce best in class underwriting results

provide the shares [currently trading at 11.6x our '23 EPS estimate] with a catalyst to close their valuation gap to peers. / Catherine Seifert

July 27, 2022

11:07 AM ET... CFRA Keeps Buy Opinion on Shares of Chubb Limited [CB 188.99****]:

We trim our 12-month target price by \$20, to \$225, or 13.1x our 2023 operating EPS estimate of \$17.15 [upped today by \$0.40], versus CB's three year average forward multiple of 13.4x, peers' 13.5x average. We lift our 2022 operating EPS estimate by \$0.61, to \$15.66, after Q2 operating EPS of \$4.20 versus \$3.62 bested our \$3.59 EPS estimate, and the \$3.63 consensus forecast, amid 7.9% written premium growth [10% before FX impact] and improved claim trends, evidenced by the improved combined [loss and expense] ratio of 84% versus 85.5%, above peers. We expect CB to produce net written premium growth of 8% to 12% in 2022 as it leverages a still-healthy insurance pricing and demand environment, despite headwinds from a strong US dollar. While cyber and climate risks are a concern for CB and its peers, CB's exposure to the war in Ukraine remains de minimis. Currently trading at 11x our 2023 operating EPS estimate, with above-peer growth metrics, we view the shares as undervalued versus peer, historical averages. / Catherine Seifert

April 27, 2022

11:41 AM ET... CFRA Keeps Buy Opinion on Shares of Chubb Limited [CB 212.80****]:

We lift our 12-month target price by \$15 to \$245, or 14.6x our 2023 operating EPS estimate of \$16.75 [raised today by \$0.65] versus the peer average of 14.5x. We up our 2022 operating EPS estimate by \$0.45 to \$15.05 after CB posted Q1 operating EPS of \$3.82 versus \$2.52, topping our \$3.62 EPS estimate and the \$3.48 consensus forecast on 7.1% written premium growth [9% excluding the agriculture line that is subject to a Federal government premium sharing agreement] and a more than doubling of underwriting income, evidenced by the combined ratio of 84.3% versus 91.8%. Underlying claim trends are also trending above peers, with a combined ratio of 83.5% versus 85.2%. CB noted on this morning's call that its exposure to the war in Ukraine will be "de minimis" and that Q1 results included an \$87M charge to deconsolidate its Russian operations. We see dual catalysts of a continued strong premium pricing environment and CB's ability to consistently generate above-peer underwriting results supporting the shares. / Catherine Seifert

February 02, 2022

11:24 AM ET... CFRA Keeps Buy Opinion on Shares of Chubb Limited [CB 204.99****]:

We lift our 12-month target price by \$18 to \$230, or 15.8x our 2022 operating EPS estimate of \$14.60 [raised today by \$0.65] and 14.3x our 2023 operating EPS estimate of \$16.10 [upped by \$0.45], versus the peer average of 15.1x. CB posted Q4 operating EPS of \$3.81 versus \$3.18, topping our EPS estimate and the consensus forecast of \$3.28 amid better than expected underwriting trends [evidenced by the Q4 combined ratio of 85.5% versus 87.6%] and 4.5% fewer shares on buybacks. Full year operating EPS of \$12.56 versus \$7.31 beat our \$12.06 EPS estimate and the \$12.09 consensus forecast, as an in-line 12% rise in written premiums was enhanced by a mere 1.2% rise in loss costs that produced a combined ratio of 84.8% in 2021, more than 10 points better than the industry average. We see written premium growth of 10% to 15% in 2022 and 9% to 12% in 2023, coupled with above-peer underwriting profitability, providing the shares [currently yielding 1.6%] with a catalyst to trade at a premium to peers. / Catherine Seifert

Forecasts are not reliable indicator of future performance.
Note: A company's earnings outlook plays a major part in any investment decision. S&P Global Market Intelligence organizes the earnings estimates of over 2,300 Wall Street analysts, and provides their consensus of earnings over the next two years, as well as how those earnings estimates have changed over time. Note that the information provided in relation to consensus estimates is not intended to predict actual results and should not be taken as a reliable indicator of future performance.
Note: For all tables, graphs and charts in this report that do not cite any reference or source, the source is S&P Global Market Intelligence.

Chubb Limited

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsuleize the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Chubb Limited

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section seof the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.

STARS Stock Reports:

Global STARS Distribution as of September 30, 2023

Ranking	North America	Europe	Asia	Global
