Analysis prepared by **Lee Zhao Jun** on Sep 29, 2023 07:00 PM ET, when the stock traded at **EUR 58.57**.

Highlights

- SGO's H1 2023 EPS of EUR3.57 [+1.7% Y/Y] surpassed the consensus estimate of EUR3.27 but matched our expectations. In our view, the outperformance is attributed to SGO's ability to register record margin of 11.3% [up from H1 2022's 11.0%]. The 7.9% Y/Y price increase outweighed the 6.3% decline in business volume. H1 2023 top line was down 2.1% Y/Y but improved 1.6% Y/Y on a like-for-like basis. The company's balance sheet remains robust, with a stable Y/Y net debt to EBITDA ratio of 1.2. Absolute net debt increased 7.8% to EUR8.92 billion [from EUR8.27 billion as of end June 2022].
- We maintain our non-consensus view that SGO's 2023 earnings will continue to grow. While the rise in interest rates has weakened the demand from new construction, there is resilience in demand from renovation for SGO's products. Regionally, we expect stronger earnings from North America and Asia to drive the growth. Management guided for operating margin of 9%-11% for H2 2023, which is achievable in our view due to SGO's strong brand and expertise in providing sustainable solutions to the construction industry.
- We maintain our forecasts: 2023 EPS at EUR6.62 and 2024 EPS at EUR6.90.

Investment Rationale/Risk

- Our call is 5-STARS [Strong Buy]. First, SGO's focus on margin should result in earnings growth with a 3-year forward earnings compound annual growth rate [CAGR] of 3.6%. Second, the company's "Grow & Impact" plan is beginning to show positive results, with a significant increase of 270bps in operating margin from 2018 to 2022. This trend continues in H1 2023 with operating margin improvement by 30bps to 11.3%. Finally, SGO's distinctive solutions and product offerings with focus on sustainability should allow it to outperform peers. In the long run, SGO is well-positioned to benefit from the global trend towards sustainable construction, renovating high carbon footprint buildings, and industrial decarbonization.
- Key downside risks are: (i) worse-than-expected spike in interest rates causing a slowdown in the construction and automotive markets, thereby affecting demand for SGO's products/services, (ii) higher-than-expected costs due to inflationary pressure, and (iii) stronger-than-expected market competition eroding margins.
- We maintain our 12-month target price of EUR72. This is based on an unchanged EV/EBITDA multiple of 6.2x, in line with its 3-year forward EV/EBITDA average.

Analyst's Risk Assessment

LOW	MEDIUM	HIGH
-----	--------	------

Our risk assessment reflects a cyclical business highly dependent on construction activity and consumer spending to some extent, leading to declining sales volume and margins in a downturn, in our opinion. This is offset by the company's scale, strong operating cash flow, and global presence.

Compagnie de Saint-Gobain S.A.

Business Summary Sep 15, 2023

CORPORATE OVERVIEW: Based in France, Saint-Gobain (SGO) designs, manufactures, and distributes building and high-performance materials (including glass, ceramics, and plastics) as well as solutions and services to the construction and industrial sectors. Majority of SGO’s sales are made in the construction market, mainly for new residential construction and renovation, providing solutions for external envelope like façade coatings and insulating glazing, and internal lining such as plasterboard and ceilings. SGO is also active in the industrial markets, supplying a range of high-performance products for applications in diverse segments such as the automotive, aeronautical, and health industries. The company operates in 75 countries worldwide, with 168,000 employees.

Saint-Gobain is known for its research and development efforts, and has a number of research centers located around the world. These centers focus on developing new products and improving existing ones, with an emphasis on sustainability and energy efficiency.

SGO operates via five reporting units (four regional businesses and a global High Performance Solutions unit); (i) Northern Europe (26% of 2022 sales) comprises Nordic countries, the U.K., Ireland, Switzerland, Germany, Austria, Eastern Europe, and Russia, (ii) Southern Europe, Middle East, and Africa (30%) comprises France, Benelux, Mediterranean, Middle-East, and Africa, (iii) Americas (19%) comprises North America and Latin America, (iv) Asia-Pacific (5%), and (v) High Performance Solutions (20%) which comprises High-Performance Materials and Sekurit (automotive glass) businesses.

SGO has made various acquisitions and divestments throughout the years. As a result, it has rotated one-third of the group sales since 2018. These acquisitions have added EUR3.8 billion to the company sales of which EUR1.9 billion were acquired in 2022. The target companies’ margins are good with EBITDA margin of around 20%. Notable acquisitions include: i) acquisition of GCP Applied Technologies in September 2022 (a major player in construction chemicals and generated EUR250 million sales in 2021), ii) acquisition of Matchem in Jan-2023 (a Brazilian construction materials company and generated EUR20 million sales in 2022), iii) acquisition of Chryso in May-2021 (a global player in construction chemicals and generated EUR400 million sales in 2020), and iv) acquisition of Impac in October 2021 (a construction chemicals solutions provider in Mexico and generated EUR50 million sales in 2020).

In October 2021, SGO launched its “Grow & Impact” Program, which is aimed at outperforming the competitors in the markets that it is operating while at the same time achieving its CSR objectives. In order to achieve this, SGO will strategically reduce its carbon footprint across its entire value chain and improve in multiple areas: (i) customer satisfaction and performance, (ii) value creation for its shareholders, and (iii) staff well-being and commitment. The sales of sustainable solutions make up 72% of the Group’s total sales. The solutions sold by the Group in a year lead to the prevention of approximately 1,300 million tons of CO2 emissions throughout their lifespan.

FINANCIAL TRENDS: SGO recorded annual sales growth of low to mid-single-digit percentage on a like-for-like (LFL) basis over the past five years, driven by price and volume. In 2022, sales were up 15.9% Y/Y (or 13.3% Y/Y on like-for-like basis) to EUR51.2 billion. There is an impact of price increase of 14.6%, which more than offset volume decline of 1.3%. Operating profit grew faster at 18.4% Y/Y to EUR5.3 billion, helped by good management of price/cost spread. Operating margin expanded to 10.4% from 2021’s 10.2%. In terms of leverage profile, its net debt to EBITDA ratio has been declining from 2.4x as at end-2018 to 1.2x as at end-2022. This is better than its objectives of 1.5x-2.0x. Dividend wise, SGO has a dividend policy of paying 30%-50% of recurring net income. Share buyback also increased to EUR520 million in 2022 (from EUR518 million in 2021).

In July 2023, SGO raised its operating margin guidance. For H2 2023, SGO is targeting an operating margin of 9%-11%.

ESG TRENDS: The Group aims to achieve “net zero emissions” by 2050. In the mid-term, SGO has a target to reduce its carbon dioxide emissions by 20% between 2010-2025. The company has a strong commitment to sustainability, and has set ambitious targets to reduce its carbon footprint and environmental impacts. Saint-Gobain is part of the Dow Jones Sustainability Index.

Compagnie de Saint-Gobain S.A.**Industry Outlook**

We maintain our sector recommendation for EMEA Industrial sector at neutral for Q4 2023 and 2024. We believe that the key issue facing the sector is the surge in energy price arising from the concern on potential supply disruption from the Middle East. However, supply chain disruptions have eased. This could be attributed to slower demand for goods and weak economy growth in China. In the past 12 months, the Shanghai Containerized Freight Index (SCFI) has declined about 30% to about \$900 per TEU. This is a signal of weak demand on global movement of cargoes.

Year to date as of October 16, 2023, the EMEA Industrial Index is up 13.0% versus the S&P Europe 350 Index increase of 10.0%. However, in Q3 2023, the EMEA Industrial sector's performance was at -3.8%, which is below S&P Europe 350's -1.8%.

The eurozone's annual inflation rate dropped to 4.3% in September [from August's 5.2%]. We expect lower inflation impact to be positive to industrial sector earnings as it lowers cost and widens operating margin. In Q4 2023, industrial players will likely focus on revenue growth via business volume increase instead of average selling price increases. For Q4 2023, the outlook should turn more positive as inflation moderates, although this is partially caused by a high base case comparison in Q4 2022. However, the growth momentum is likely to be slow as the factor of China reopening has so far generated little demand growth. In our view, industrial players will shift their focus to grow volume instead of passing on increases in cost as inflation cools down.

The Eurozone Manufacturing PMI for September stands at 43.4, which is little changed compared to the August level of 43.5. According to our findings, contractions in order book and an output decline trend is still ongoing. On the positive side, the price of input material has declined and manufacturers are passing the cost savings to their clients.

Due to the aircraft engine recall issues (PW1100G Geared Turbofan Engines), we are now neutral on Aerospace & Defense from positive previously. We

also lowered our opinion to neutral for Airlines. Although airlines players will likely benefit from the global aviation sector recovery due to Covid-19 normalization, its margin could be affected by the spike in jet fuel price [in line with the higher crude oil price].

We are positive on the Industrial Machinery and Industrial Conglomerates sub-sectors. Industrial Machinery sub-sector players are the beneficiaries of high demand due to energy efficiency and automation. For Industrial Conglomerates, strong demand for electrification and sustainability services should continue to support revenue growth.

The focus for Trading Companies and Distributors will be to reduce the record-high inventory in the near term, in our view. This may affect their near-term margin, although it could lead to stronger cash flow. For the Heavy Electrical Equipment sub-sector, the smoother supply chain should lead to improvement in revenue recognition. However, the intense competition should keep the margin upside limited.

We are less positive on the Building Products and Construction Machinery & Heavy Trucks sub-sectors. We expect the Building Products sub-sector's revenue to be affected by poor demand for property during slow economy growth/recession in Europe. For the Construction Machinery & Heavy Trucks sub-sector, slower economy growth/recession in Europe should affect construction activity, trucks demand, and rolling stock.

/ Alan Lim Seong Chun, CFA

Compagnie de Saint-Gobain S.A.**Analyst Research Notes and other Company News****July 27, 2023**

02:38 AM ET... CFRA Maintains Strong Buy Opinion on Shares of Saint-Gobain S.A. [SGO FP 58.54*****]:

We maintain our 12-month target price of EUR72. This is based on an unchanged EV/EBITDA multiple of 6.2x, in line with the company's three-year forward EV/EBITDA average. We keep our 2023 EPS estimate at EUR6.62 and 2024 EPS at EUR6.90. SGO H1 2023 recurring EPS of EUR3.57 (+1.7% Y/Y) is better than the consensus estimate of EUR3.27 but within our expectation. We attribute the outperformance to the record margin achieved at 11.3% [from H1 2022's 11.0%]. The price increase of 7.9% Y/Y has more than offset the 6.3% decline in business volume. The company's balance sheet remains strong and the net debt to EBITDA ratio remained stable Y/Y at 1.2. Management guided for an operating margin of 9%-11% for H2 2023. We continue to like SGO for its ability to pass on its cost inflation pressure to preserve margin despite the tough business environment. In our view, SGO's distinctive solutions and product offerings with a focus on sustainability allow it to outperform its peers. / Alan Lim Seong Chun, CFA

April 27, 2023

02:42 PM ET... CFRA Maintains Strong Buy Opinion on Saint-Gobain S.A. [SGO FP 51.09*****]:

We maintain our 12-month target price of EUR72. This is based on an unchanged EV/EBITDA multiple of 6.2x, in line with the company's three-year forward EV/EBITDA average. We keep our 2023 EPS estimate at EUR6.62 and our 2024 EPS estimate at EUR6.90. SGO announced its business update and shared that Q1 2023 sales grew 3.3% Y/Y [or 4.7% Y/Y like-for-like] to EUR12.4 billion. The strong pricing impact of 10.2% more than offset the 5.5% decline in business volume. We view this positively as SGO continues to pass on its cost inflation pressure to preserve margin despite the difficult business environment. Management maintained its guidance for 2023 in which operating margin target is at 9%-11%. SGO remains a Strong Buy for: i) its strategy to focus on margin will likely result in earnings growth, in our view; ii) ability to expand margin by 270bps to 10.4% from 2018-2022; and iii) distinctive solutions and product offerings with focus on sustainability, which allows the company to outperform peers. / Alan Lim Seong Chun, CFA

February 23, 2023

01:56 PM ET... CFRA Upgrades Opinion on Saint-Gobain S.A. to Strong Buy from Buy [SGO FP 53.36*****]:

We increase our 12-month target price to EUR72 [from EUR68]. This is based on unchanged EV/EBITDA multiples of 6.2x, in line with its three-year forward EV/EBITDA average. We increase our 2023 EPS to EUR6.62 [from EUR6.36] and introduce 2024 EPS of EUR6.90 after assuming higher sales and improvement in margin. In 2022, SGO recurring EPS of EUR6.48 was ahead of consensus' estimate of EUR5.99 as both sales and operating margin have surprised positively. SGO has successfully passed on its cost inflation pressure in 2022 as it has increased price by 14.6% Y/Y with minimal business volume decline of 1.3% Y/Y. SGO is now a Strong Buy due to the following: i) its "Grow & Impact" plan has started to bear fruit as operating margin surged 270 bps to 10.4% in 2022; ii) the earnings outlook is stable, with three-year forward earnings CAGR of 3.6%; and iii) SGO is anticipated to maintain its margin by passing on the cost to customers through its distinctive solutions and product offerings. / Alan Lim Seong Chun, CFA

January 27, 2023

09:40 AM ET... CFRA Maintains Buy Opinion on Saint-Gobain S.A. [SGO FP 53.59*****]:

We maintain our 12-month target at EUR68. This is based on unchanged EV/EBITDA multiples of 6.2x, in line with SGO's three-year forward EV/EBITDA average. We maintain our EPS estimates for 2022 at EUR5.90 and 2023 at EUR6.36. On 4 January 2023, SGO announced the successful completion of its acquisition of Matchem in Brazil. Also, the company has entered into exclusive negotiations for the acquisition of IDP Chemicals in Egypt. We are positive on the news as these acquisitions are expected to enhance the long-term growth prospects of the company by providing access to the promising markets of Brazil and Egypt. SGO remains a Buy due to: i) its "Grow & Impact" plan, which has started to bear fruit as operating margin reached a new high of 11.0% in 1H 2022; ii) the positive earnings outlook, with three-year forward earnings CAGR of 12.6%; and iii) SGO defending its margin, in our view, despite high inflation as it has been able to pass on the cost to customers due to its unique solutions and product offering. / Alan Lim Seong Chun, CFA

October 27, 2022

06:33 PM ET... CFRA Reiterates Buy Recommendation on Compagnie Saint-Gobain S.A. [SGO FP 41.00*****]:

We maintain our Buy opinion and 12-month target for SGO at EUR68. This is based on unchanged EV/EBITDA multiples of 6.2x, in line with its three-year forward EV/EBITDA average. We maintain our EPS estimates for 2022 at EUR5.90 and 2023 at EUR6.36. SGO announced its business update and shared that Q3 2022 sales have grown 19.6% Y/Y [or 13.4% Y/Y like-for-like]. The strong performance was supported by solid double-digit organic growth in all segments, especially the High-Performance Solutions segment. SGO remains a Buy for three reasons: i) its "Grow & Impact" plan has started to bear fruit as operating margin reached a new high of 11.0% in 1H 2022; ii) the earnings outlook is good, with three-year forward earnings CAGR of 12.6%; and iii) we expect SGO to defend its margin despite high inflation as it has been able to pass on the costs to customers due to its unique solutions and product offerings. The company has raised its prices by 15.0% Y/Y in Q3 2022, which more than offsets the 1.6% decline in volume. / Alan Lim Seong Chun, CFA

July 27, 2022

06:20 PM ET... CFRA Maintains Buy Opinion on Shares of Saint-Gobain [SGO FP 42.79*****]:

We have reduced our 12-month target price for SGO to EUR68 from EUR80. This is based on lower EV/EBITDA multiples of 6.2x, in line with its 3-year forward EV/EBITDA average. We have removed our previous premium valuation due to slower earnings growth prospect. We raised 2022 EPS to EUR5.90 [EUR4.90] and 2023 EPS to EUR6.36 [EUR5.40]. SGO's adjusted 1H 2022 EPS of EUR3.51 (+23% Y/Y) was higher than S&P Capital IQ consensus estimate of EUR3.13. The company's revenue growth of 15% Y/Y to EUR25.48 billion surprised on the upside. This is supported by strong double-digit growth across all operating segments and geographies. We maintain our Buy call as we think SGO will continue to benefit from long-term trends towards energy efficient construction, renovating high carbon footprint buildings and industrial decarbonization. SGO is undervalued at 4.2x EV/EBITDA or -3.1 standard deviation below mean. This despite the stable earnings growth prospect in which we expect 3-year forward earnings CAGR of 12.6%. / Alan Lim Seong Chun, CFA

July 27, 2022

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsize the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Compagnie de Saint-Gobain S.A.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section seof the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.

STARS Stock Reports:

Global STARS Distribution as of September 30, 2023
