Analysis prepared by **Wan Nurhayati, CFA** on Aug 08, 2023 05:48 AM ET, when the stock traded at **EUR 47.02**.

Highlights	Investment Rationale/Risk
► Fresenius Medical Care's (FME) Q2 2023 revenue was up 1% Y/Y (+6% in constant currency, cc) with organic revenue growing 6% driven by both Care Delivery (driven by price) and Care Enablement (driven by both volume and price). We forecast revenue to grow by ~2%-4% in 2023 and 2024, largely in line with the company's unchanged 2023 guidance of low to mid-single-digit percentage revenue growth at cc. ► Q2 2023 operating income grew 5% Y/Y, supported by reduced personnel costs resulting from improved productivity as well as FME25 cost savings (excluding Provider Relief Funding and special items, operating income rose 41%). FME narrowed its 2023 operating income guidance range where it now expects operating income, adjusted for the government support received in 2022, to remain flat or decline by up to low-single-digit percentage (previously flat or decline by up to high-single-digit). We forecast operating income margin to be ~1%-pts lower in 2023 with the FME25 savings cushioning cost inflation and the absence of government support (H1: -10% with margin -0.9%-pts on weaker Q1 numbers). ► We revised our 2023 EPS estimate to EUR2.30 (from EUR2.15) to account for the latest result and keep our 2024 estimate.	► Our call is 2-STARS [Sell]. We view the FME25 program, which focuses on streamlining its operating model and reducing the cost base [cost savings of EUR650 million by 2025] as well as the easing of labor shortage in the U.S. (which, along with the impact of Covid-19 on treatment volumes, hit FME's results and led to multiple profit warnings and medium-term target being withdrawn) provides room for improvement for the company in 2023 and onwards. The FME25 program delivered EUR75 million savings in Q2 2023 and is on track to achieve EUR250-EUR300 million savings by year-end 2023. The proposal to change its legal form to a German stock corporation was approved by the shareholders in July 2023, which will simplify its governance structure and allows for more focused and faster decision-making. That said, the execution of its turnaround plan as well as the annualization effect of Covid-19-related excess mortality (impact on treatment volume) remain as risks to recovery in our view. ► Upside risks include better-than-expected results from cost savings/turnaround plan. ► Our 12-month target price is EUR35, implying a 2023 P/E of 15x, in line with its 3-year mean.

Analyst's Risk Assessment		
LOW	MEDIUM	HIGH

Our Medium risk assessment reflects the stable growth in patients and geographic diversification of dialysis services and products, while highly dependent on the reimbursement status, which varies across geographic segments.

Business Summary Aug 08, 2023

CORPORATE OVERVIEW: Fresenius Medical Care (FME) was formed in 1996 from the merger of Fresenius Worldwide Dialysis and National Medical Care. FME is the world’s leading provider of products and services for people with chronic kidney failure. Through its global network of more than 4,000 dialysis clinics, FME provides dialysis treatments for more than 345,000 patients globally. FME also operates 42 production sites on all continents, to provide dialysis products such as dialysis machines, dialyzers, and related disposables. FME has two divisions, Health Care Services (79% of 2022 revenue) and Health Care Products (21%). Geographically, North America is the largest contributor to the Group sales (70% of 2022 sales), followed by EMEA (15%), Asia-Pacific (11%), and Latin America (4%).

(i) The Health Care Services segment provides dialysis treatment in FME’s dialysis clinics worldwide, as well as medical support and training for home dialysis patients in its dialysis centers. FME is the global leader in dialysis care, serving around 10% of all dialysis patients worldwide.

(ii) The Health Care Products segment develops and manufactures dialysis products that focus on areas like hemodialysis, peritoneal dialysis, and acute dialysis. FME also offers non-dialysis products that include acute cardiopulmonary products and products for apheresis therapy. FME is the global market leader for dialysis products with an estimated market share of 35% in 2018.

STRATEGY: Following the headwinds faced in 2022 (which led to multiple profit warnings and medium-term target being withdrawn), the company sets up a broader turnaround plan to improve performance. These include:

[1] Company fully reoriented to two global operating segments: The company has implemented its new operating model with two global segments; Care Enablement (Health Care Products) and Care Delivery (Health Care Services). This operating model provides increased transparency to drive targeted business performance improvements as well as scalable G&A functions to support the operating segments.

[2] Proposes simplification of the governance structure: Proposed to change its legal form to a German stock corporation which will allow for more focused, faster, and independent decision-making as it removes layers from the governance structure and will free up executive and management capacity. The proposal was approved by the shareholders at the extraordinary general meeting held in July 2023. The transition process is expected to be completed by the end of 2023.

[3] FME25 program extended to sustained cost savings of EUR650 million by 2025: The company will accelerate and extend its FME25 transformation program to further optimize processes along the new operating model and increase the savings target from EUR500 million to EUR650 million by 2025. FME now expects to invest up to EUR650 million in the same period.

[4] Portfolio optimization: Exit unsustainable markets in international activities and divestitures of non-core businesses in Care Delivery. In Care Enablement, the company will rationalize its global R&D programs and is evaluating the divestment of non-core products. Proceeds from the disposal shall be used to reduce leverage ratio.

FINANCIAL TRENDS: FME recorded a 5-year CAGR of 1.8% in revenue (2018-2022), driven by both organic growth as well as acquisitions. EBIT, however (5-year CAGR of -7.3%), was impacted by higher SG&A expenses, and by the adverse impact of Covid-19 pandemic (excess mortality rate impacting treatment volumes, and subsequently operating leverage) in 2021 and the tough labor market situation in the U.S. which resulted in staff shortages and rising costs in 2022. As a result, EBIT margin deteriorated to 8.0% in 2022 from 13.2% in 2018. The headwinds in 2022 also led to a lower proposed dividend per share of EUR1.12.

Fresenius Medical Care AG & Co. KGaA**Industry Outlook**

Our sector recommendation for EMEA Health Care is Overweight. Year-to-date through May 30, 2023, the S&P Europe 350 Health Care Index slightly outperformed the market (+6.8% vs. a 6.6% increase in the broader S&P Europe 350 Index), led by the Healthcare Equipment & Services sub-sector. The sector is trading at ~17x 2023 P/E, at the upper end of the historical average range of 16x-17x, which is still decent in our view considering the higher EPS growth as compared to the market [S&P Capital IQ consensus estimates: 2023 EPS growth of 6.4% vs +0.3% for S&P Euro 350; 2024 EPS growth of 12.3% vs +6.9% for S&P Euro 350]. We see demand for health care to be generally resilient in the event of worsening macroeconomy. We expect volume growth and cost savings to drive the sector earnings, partly offset by continued pricing pressure, lower contribution from Covid-19-related sales, and overall cost inflation.

For the Pharmaceutical, Biotechnology, and Life Science sub-sector, we expect the rollout of new launches and core products to be the key growth drivers, providing some cushion to the lower Covid-19-related sales. Among the biggest potential launches of 2023 include Roche's gene therapy for Duchenne muscular dystrophy, GSK's vaccine for older adults against RSV, and AbbVie/Genmab's epcoritamab. Within our coverage, Novo Nordisk tops the sales and core EPS growth forecasts for 2023, boosted by the strong demand for its GLP-1 based diabetes and obesity treatments. At the opposite end, we see lower year-over-year earnings in 2023 for Roche (lower Covid-19-related sales) and Bayer (weaker Crop Science division due to the softening glyphosate prices and continued pricing pressure in pharmaceutical division). We also expect the ongoing efficiency program to help counter cost inflation. The majority of European pharmaceutical companies managed to record margin expansion on better efficiency as well as better product mix (e.g., stronger growth in the high-margin oncology/specialty care segments) in 2022 as well as in the March 2023 quarter.

For the Healthcare Equipment & Services sub-sector, we see easing headwinds with the combination of subsiding supply chain constraints, moderating energy prices, and the reopening of China creating room for demand recovery and margin improvement in 2023. That said, we are mindful of the wage inflation and pricing pressure from the implementation of the volume-based procurement program (VBP) in China. Most companies posted better sales in the March 2023 quarter on improved demand and better market conditions, but margins were mixed as not all companies under our coverage managed to offset cost inflation with efficiency and/or cost savings.

Analyst Research Notes and other Company News

August 03, 2023

04:58 AM ET... CFRA Keeps Sell Opinion on Shares of Fresenius Medical Care [FME GR 46.20**]:

We adjust our target price for Fresenius Medical Care [FME] to EUR35 from EUR32, implying a 2023 P/E of 15x, in line with its 3-year mean. We revised our 2023 EPS estimate to EUR2.30 [from EUR2.15] to account for the Q2 2023 result beat and keep our 2024 estimate. Q2 2023 operating income grew 5% Y/Y, supported by higher revenue, reduced personnel costs, and cost savings from the FME25 transformation program. FME narrowed its 2023 operating income guidance range where it now expects operating income, adjusted for the government support received in 2022, to remain flat or decline by up to a low-single digit percentage [previously flat or decline by up to high-single-digit]. The implementation of the FME25 program and the easing of labor shortage in the U.S. provides room for improvement in our view, though the annualization effect of Covid-19-related excess mortality [impact on treatment volume] remains a risk. Maintain Sell as we find the stock to be fully valued at the current level. / Wan Nurhayati, CFA

May 10, 2023

05:04 AM ET... CFRA Keeps Sell Opinion on Shares of Fresenius Medical Care [FME GR 42.54**]:

We keep our Sell opinion on Fresenius Medical Care [FME] and adjust our target price to EUR32 from EUR28, implying a 2023 P/E of 15x, in line with its 3-year mean. FME posted a 2% Y/Y organic revenue growth in Q1 2023 supported by improving volume trends while operating income fell 25% with margin contracting 2.1%-pts [excluding Provider Relief Funding received in 2022 and special items, operating income fell 9%] impacted by cost inflation. For 2023, we forecast revenue to grow by ~2% and operating income margin to be ~2%-pts lower, largely in line with FME's unchanged 2023 outlook. We keep our estimates. Cost savings from the FME25 transformation program and the easing of labor shortage in the U.S. [which severely hit FME's performance in 2022] provides room for improvement in our view. However, the execution of its turnaround plan as well as the annualization effect of Covid-19-related excess mortality [impact on treatment volume] remain as risks to recovery. / Wan Nurhayati, CFA

February 23, 2023

11:33 PM ET... CFRA Keeps Sell Opinion on Shares of Fresenius Medical Care [FME GR 37.80**]:

We keep our Sell opinion on Fresenius Medical Care [FME] with the same target price of EUR28, implying a 2023 P/E of 13x, below its 3-year mean of 15x, justified in our view by the near-term challenges. FME expects operating income to be lower in 2023 as it sees cost headwinds to continue and assumes no government support for 2023 [EUR277 million support in 2022]. Overall, the company expects 2023 to be a transitional year with more headwinds than tailwinds before moving toward recovery in 2024 [FME is working on a turnaround plan which includes cost savings and portfolio optimization]. That said, execution remains a key risk to recovery in our view. FME also proposed changing its legal form to a German stock corporation as it intends to simplify its governance structure, allowing for more focused and faster decision-making. We adjust our 2023 EPS estimate to EUR2.15 [from EUR3.00] to account for the guidance and introduce our 2024 estimate of EUR2.85. / Wan Nurhayati, CFA

November 01, 2022

03:12 AM ET... CFRA Lowers Opinion on Shares of Fresenius Medical Care to Sell from Hold [FME GR 27.83**]:

We lower our opinion to Sell from Hold as we turned more cautious following the disappointing Q3 2022 result and yet another guidance cut. We lower our target price to EUR28 [from EUR38] as we cut our EPS estimates to EUR2.80 [from EUR2.90] for 2022 and to EUR3.00 [from EUR3.10] for 2023. This implies a 2023 P/E of 9.3x, below its 3-year mean of 15x, justified in our view to reflect the near-term headwind. FME now expects net income in 2022 to decline by high-teens to mid-twenties percentage at constant currency [previously high-teens percentage decline] due to slower-than-expected recovery in the North America business as it continues to face tough labor market situation in the U.S., which resulted in staff shortages and rising costs. In view of the headwinds, the management is in the process of detailing a broader turnaround plan. Overall, we are cautious on the stock given the deteriorating outlook and view the challenges to continue being an overhang issue in the near term. / Wan Nurhayati, CFA

August 02, 2022

07:02 AM ET... CFRA Maintains Hold Opinion on Shares of Fresenius Medical Care [FME GR 35.83***]:

We lowered our target price for Fresenius Medical Care [FME] to EUR38 [from EUR58] as we cut our EPS estimates to EUR2.90 from EUR3.50 for 2022 and to EUR3.10 from EUR3.60 for 2023 to impute the latest guidance. The target price implies a 2022 P/E of 13x, below its 3-year mean of 16x, justified in our view to reflect the near-term headwind. Net income before special items fell 10% Y/Y [-15% at constant currency, cc] in H1 2022, hit by the worsening U.S. labor market situation, which resulted in higher-than-expected wage inflation and additional costs for contract labor to contain the increasing staff shortages. As a result, FME now guides for full year net income to decline by high-teens percentage at cc [previously low to mid-single digit growth]. We keep our Hold opinion on FME as we continue to be cautious on issues related to staff shortages [growth in Q2 was also affected by the number of clinics with constrained ability to accept new patients for treatment] and overall inflationary pressure. / Wan Nurhayati, CFA

May 06, 2022

02:12 AM ET... CFRA Maintains Hold Opinion on Shares of Fresenius Medical Care [FME GR 59.10***]:

We keep our Hold opinion on Fresenius Medical Care [FME] with the same target price of EUR58, implying a 2022 P/E of 16.6x, in line with its 5-year mean. Q1 2022 results were hit by the surge of the Omicron variant, resulting in higher-than-anticipated Covid-19 related excess mortality and elevated labor costs in the U.S. to manage isolation clinics and shifts, which led to a 20% Y/Y decline in net income before special items. Nevertheless, given the strong decline in excess mortality in February and March, FME reaffirmed its full year guidance of low to mid-single digit revenue and net income growth. We forecast revenue growth of ~3% for 2022 and 2023 and operating income margin pressure with headwinds related to the excess mortality, wage inflation, and supply chain constraints being partly mitigated by cost savings. We keep our 2022 EPS estimate of EUR3.50 [which came at the lower end of management guidance] and 2023 EPS estimate of EUR3.60. / Wan Nurhayati, CFA

February 23, 2022

06:45 AM ET... CFRA Keeps Hold Opinion on Shares of Fresenius Medical Care [FME GR 60.02***]:

We keep our Hold opinion on Fresenius Medical Care [FME] and adjust our target price to EUR58 from EUR65 as we trim our 2022 EPS estimate to EUR3.50 from EUR4.10 to account for the latest result. We introduce our 2023 EPS estimate of EUR3.60. The target price implies a 2022 P/E of 16.6x, largely in line with its 3-year mean. We forecast revenue growth of ~3% for 2022 and 2023 and slight operating income margin pressure with headwinds related to the excess mortality, wage inflation, and supply chain constraints being partly mitigated by cost savings. In 2021, revenue grew 2% at constant currency [CC, reported: -1% due to currency headwind], but net income fell by 23% Y/Y CC [at the lower end of guidance range of high-teens to mid-twenties percentage decline], largely dragged by the adverse Covid-19 impacts [estimated adverse effect of accumulated Covid-19 related excess mortality on organic growth in the Health Care Services business of 280 bps in 2021]. / Wan Nurhayati, CFA

Forecasts are not reliable indicator of future performance.
Note: A company's earnings outlook plays a major part in any investment decision. S&P Global Market Intelligence organizes the earnings estimates of over 2,300 Wall Street analysts, and provides their consensus of earnings over the next two years, as well as how those earnings estimates have changed over time. Note that the information provided in relation to consensus estimates is not intended to predict actual results and should not be taken as a reliable indicator of future performance.
Note: For all tables, graphs and charts in this report that do not cite any reference or source, the source is S&P Global Market Intelligence.

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsize the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ **5-STARS (Strong Buy):**

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ **4-STARS (Buy):**

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ **3-STARS (Hold):**

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ **2-STARS (Sell):**

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ **1-STAR (Strong Sell):**

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section of the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.
