Analysis prepared by **Jonathan Sakraida** on Aug 07, 2023 02:38 AM ET, when the stock traded at **USD 148.53**.

Highlights

- ▶ We estimate 2023 revenue growth of 10% as we see core price remaining elevated and, coupled with acquisitions, contributing to additional expansion in sales. RSG's customer retention rate has remained solid at 94%+, despite pricing actions taken in recent quarters. We anticipate organic volumes being flat to slightly positive in 2023, with pricing and acquisitions driving top-line growth. Recycled commodity prices meaningfully contracted in 2022 on unfavorable supply-demand, though prices are expected to recover in 2023 with RSG estimating an average recycled commodity price of \$110-115 per ton.
- ▶ We expect the EBITDA margin to expand 30 bps in 2023 to 29.4%. Improved route metrics support margins through increased productivity. RSG is managing costs by replacing older trucks, reducing emissions, improving driver productivity, and increasing conversions to natural gas vehicles to reduce fuel costs. Pricing remains robust, with a positive price/cost expected to support margin expansion in the coming quarters.
- ▶ RSG believes that quality acquisitions result in the most long-term shareholder value creation, with CFRA expecting over \$600M of deals being completed by year-end 2023.

Investment Rationale/Risk

- ▶ We view RSG as well positioned to benefit from stable volumes and favorable pricing trends as its markets expand. We maintain a positive view of the increased focus on renewable natural gas projects but are more mixed on RSG's expansion into hazardous waste. In the near term, RSG will likely focus on tuck-in acquisitions within its core business [solid waste and recycling] following the acquisition of U.S. Ecology. RSG continues to lower its recycling earnings sensitivity to be less responsive to commodity price volatility, which fell to an average price of \$170 per ton in 2022 [down 9% from 2021]. We see RSG integrating electric vehicles into its fleet ahead of peers, although wide-scale adoption is still several years off.
- ▶ Risks to our rating and target include worse-than-expected activity in the housing market and economy, a decline in customer retention rates due to competitive pricing, a rapid decline in commodity recycling prices, and sharply higher fuel/commodity costs.
- ▶ Our 12-month target of \$162 values shares at 27.6x our 2024 EPS estimate, in line with RSG's three-year historical average given our outlook for pricing momentum, balanced by execution risk surrounding U.S. Ecology.

Analyst's Risk Assessment

LOW MEDIUM HIGH

Our risk assessment reflects soft volumes during periods of weak economic conditions, offset by a solid balance sheet and strong cash generation to fund dividends, share repurchases, debt reductions, and acquisitions.

Republic Services, Inc.

Business Summary May 08, 2023

CORPORATE OVERVIEW. Republic Services, Inc. [RSG] is the second-largest U.S. provider of services in the non-hazardous solid waste industry, based on revenues. As of December 31, 2022, RSG operated in 41 states through 353 collection operations; 233 transfer stations; 206 active landfills; 71 recycling processing centers; three treatment, recovery, and disposal facilities; seven deep injection wells; and six saltwater disposal wells. RSG also operated 73 landfill gas and renewable energy projects and had post-closure responsibility for 128 closed landfills.

RSG generates revenue primarily from its solid waste collection operations [69% of 2022 revenue, of which about 20% is from residential services, 29% small-container commercial services, and 20% large-container services]. The remaining revenue is from other services, including transfer station [5%], landfill tipping fees [12%], environmental services [8%], and other [5%]. The residential and small-container commercial collection operations in some markets are based on long-term contracts with municipalities. Certain of RSG’s municipal contracts have annual price escalation clauses that are tied to changes in an underlying base index, such as a consumer price index. RSG generally provides small-container commercial and large-container industrial collection services to customers under contracts with terms up to three years. RSG’s transfer stations, landfills and, to a lesser extent, its recycling facilities generate revenue from disposal or tipping fees charged to third parties. In general, RSG integrates its recycling operations with its collection operations and obtains revenue from the sale of recycled commodities. RSG’s revenue from environmental solutions services consists mainly of fees charged for the treatment and disposal of liquid and solid waste derived from the production of oil and natural gas. Sales from environmental solutions materially expanded following the acquisition of U.S. Ecology. Other revenue consists primarily of revenue from national accounts, which represents the portion of revenue from nationwide or regional contracts in markets outside RSG’s operating areas, where the associated waste handling services are subcontracted to local operators. Consequently, this revenue is substantially offset with related subcontract costs, which are recorded in cost of operations.

MARKET OVERVIEW. The total addressable environmental services market in which RSG operates in generates approximately \$107 billion of annual revenue, which includes the \$78 billion U.S. recycling and solid waste industry and \$29 billion in the broader environmental services industry, according to RSG. These industries remain fragmented, which provides consolidation opportunities to further drive scale. Growth in the solid waste industry historically has been linked primarily to population growth and growth in the overall economy, including the level of new household and business formation as well as changes in residential and commercial construction activity.

CORPORATE STRATEGY. RSG strives to have a No. 1 or No. 2 market position in each of the markets it serves, or have a clear path on how to achieve a leading market position over time. In situations where RSG cannot establish a leading market position, or where operations are not generating acceptable returns, RSG may decide to divest certain assets and reallocate resources to other markets. We think the company will continue to focus on cash flow generation, share repurchases, and selective tuck-in acquisitions. Organic growth is focused on volume growth, price increases, expansion of recycling capabilities, and infrastructure development. External growth via acquisitions continues to be a key focus. Consolidation reduces costs by decreasing capital and expenses used in routing, personnel, equipment and vehicle maintenance, inventories, and back-office administration. As of December 31, 2022, approximately 76% of RSG’s residential routes had been converted to automated single-driver trucks. By converting routes to automated service, RSG reduces labor costs, improves driver productivity, decreases emissions, and creates a safer work environment for employees. Additionally, communities using automated vehicles have higher participation rates in recycling programs, complementing RSG’s initiative to expand its recycling capabilities.

RECYCLING MARKET. As a result of China’s National Sword Program, the global recycling market has faced significant headwinds. China banned or severely restricted the import of a vast majority of recycled materials. Across the world, recycling operations hit a standstill and collected material piled up as recycling companies struggled to find a destination for their unprocessed recyclable material. Most baled material was historically shipped to China for processing. RSG generates less than 5% of its revenues from recycling processing where it collects and sells old corrugated cardboard, newsprint, aluminum, glass, etc., at market prices. In 2022, RSG processed and sold 2.0 million tons, excluding glass and organics, from recycling processing centers. An additional 2.0 million tons were collected and delivered to third parties.

FINANCIAL TRENDS. Revenue for the year ended December 31, 2022 increased by 10% to \$13,511 million. This growth was driven by strength in core price, acquisition contributions, an increase in volume, and fuel recovery fees. In the five years ending in 2022, revenues grew at a compound annual growth rate [CAGR] of 6.1%. In the same period, EPS increased at a 4.5% CAGR.

Republic Services, Inc.**Sub-Industry Outlook**

Our positive 12-month fundamental outlook for the Environmental & Facilities Services sub-industry is based on our view that the companies in the sub-industry are defensive compared to the broader market, which we view favorably amid ongoing macro uncertainty across global markets. We anticipate organic growth to be driven by core pricing that remains above historical levels despite a still competitive environment. Pricing has become a focal point as companies work to offset lingering impacts from cost inflation. We forecast core price at roughly 6% as firms continue to leverage the inflationary environment, though we see pricing contributions cooling in 2024. We expect recycling commodity prices to recover in 2023-2024, following the slump in pricing for old corrugated containers during the second half of 2022. We view impacts from volatility in the recycling line of business as manageable as recycling operations are, on average, only about 5% of a waste company's revenue. Although landfill capacity averages more than 20 years, landfill prices (landfills tend to generate higher margins) should rise over the next few years as more third-party waste is disposed of in the largest haulers' landfills.

We expect full-year construction and demolition (C&D) volumes to be positive in 2023-2024 despite the interest rate driven slowdown in housing, with activity from the \$1.2 trillion federal infrastructure bill, Inflation Reduction Act, and CHIPS Act being tailwinds. Commercial waste collection volumes have begun to flatten following a strong post-pandemic recovery. In early 2020, residential volumes were well above average at the start of the pandemic, causing increased processing costs on the collectors, but volume normalized through the second half of the year. Overall, contract structure and payment are based on collection frequency, not volume, so the normalization of residential volumes (down from elevated levels in 2020) has aided operator profitability. We see residential volumes being flat to slightly negative in 2023 and stable in 2024.

In our view, the largest North American haulers will

continue to divest underperforming assets and make selective, accretive acquisitions while seeking to enhance customer service as an incentive to maintain a high retention rate. We expect acquisitions to remain a key lever for top-line growth and market share expansion as smaller haulers experience operating difficulties in this highly regulated and capital-intensive industry. Negative impacts from the inflationary environment could potentially lead to more attractive opportunities for acquisitions during 2023, in our view. We see a growing environmental trend from the conversion of methane gas at landfills into energy and expect industry incumbents to ramp up investment in gas-to-energy infrastructure and operations as firms capitalize on tax credits introduced by the Inflation Reduction Act. We look for solid free cash flow generation to be targeted for debt reduction, strategic "tuck-in" acquisitions, growth capital expenditures, dividend payments, and share repurchases, in addition to automation investments toward recycling.

Year-to-date through August 31, 2023, the S&P Environmental & Facilities Services Index rose by 6.8% versus a 13.1% increase in the S&P 1500 Industrials Index. In 2022, the S&P Environmental & Facilities Services Index fell 5.6% versus the S&P 1500 Industrials Index's decline of 7.9%.

Republic Services, Inc.

Analyst Research Notes and other Company News

August 01, 2023

08:11 AM ET... CFRA Keeps Buy Rating on Shares of Republic Services, Inc. [RSG 151.11****]:

We lift our 12-month target price to \$162 (from \$150), valuing shares at 27.6x our 2024 EPS estimate (lifted to \$5.88 from \$5.76; 2023 EPS lifted to \$5.39 from \$5.29), in line with RSG's three-year historical average multiple. RSG posted Q2 adjusted EPS of \$1.41 vs. \$1.32 (+7% Y/Y), \$0.09 above consensus on supportive margin expansion. Q2 sales increased 9% Y/Y (+4.7% organic growth; +4.4% from acquisitions), with a still elevated core price of 7.3% and volumes being roughly flat. We anticipate volumes to be flat to slightly positive, with a majority of top-line expansion being supported by pricing actions. Pricing also benefited profitability, with adjusted EBITDA margin flipping to Y/Y expansion in Q2 (40 bps). Easing labor challenges and inflation assisted on margins. Retention remains above 94%, with potential for additional improvement in the coming quarters. We keep a Buy rating on RSG shares. / Jonathan Sakraida

April 28, 2023

12:43 AM ET... CFRA Reiterates Buy View on Shares of Republic Services, Inc. [RSG 137.69****]:

We keep our 12-month target price of \$150, valuing shares at 26.0x our 2024 EPS estimate (kept at \$5.76; 2023 EPS forecast lifted to \$5.29 from \$5.20), near RSG's three-year historical average multiple. RSG posted Q1 adjusted EPS of \$1.24 vs. \$1.14 (+9% Y/Y), beating both the consensus and CFRA forecasts due in large part to strong double-digit sales growth, in our view. Q1 revenue rose 21% Y/Y (+11% from acquisitions; +10% organic), with contributions from a solid core price (9.3% vs. 6.5% in 2022) and volumes (+1.8% Y/Y). Customers continue to be receptive to pricing actions, lending to better-than-anticipated sales growth during the quarter. Adjusted EBITDA margin fell 140 bps Y/Y due to margin dilution related to the U.S. Ecology acquisition and lower commodity prices on a Y/Y basis. We maintain a favorable view on RSG's pricing power in the current environment and maintain shares at a Buy. / Jonathan Sakraida

February 16, 2023

01:39 PM ET... CFRA Keeps Buy View on Shares of Republic Services, Inc. [RSG 130.37****]:

We keep our 12-month target price at \$150, valuing shares at 26.0x our 2024 EPS estimate (initiated at \$5.76; 2023 EPS forecast reduced to \$5.20 from \$5.57), near RSG's three-year historical average multiple. RSG posted Q4 adj-EPS of \$1.13 vs. \$1.02 (+11% Y/Y), \$0.11 above the consensus estimate, but in line with CFRA expectations. Revenue increased 20% over the prior year (+8% organic; +11% from acquisitions), with organic growth led by an acceleration in core price. Volumes contributed 1.5% of sales growth during the quarter. Volume growth between 0.5% and 1.0% is expected in 2023. Adj-EBITDA margin declined by 80 bps Y/Y to 27.3% on lower recycled commodity prices and acquisition-related costs. We see EBITDA margin being roughly flat in 2023 as margin headwinds continue, though pricing contributions should offset negative impacts, in our view. We see upside in RSG shares at current levels and maintain our Buy recommendation. / Jonathan Sakraida

October 28, 2022

12:49 PM ET... CFRA Upgrades Opinion on Shares of Republic Services, Inc. from Hold to Buy [RSG 130.44****]:

We raise our 12-month target price by \$5 to \$150, valuing shares at 27.0x our 2023 EPS estimate of \$5.57 (lifted from \$5.36; 2022 EPS forecast raised to \$4.93 from \$4.81), below the three-year historical average given our outlook for solid core pricing growth, offset by execution risk surrounding U.S. Ecology. RSG posted Q3 adj-EPS of \$1.34 vs. \$1.12 (+20%), surpassing consensus by \$0.12. Q3 sales grew 23% Y/Y (+10.2% organic; +12.4% from acquisitions), supported by robust core price growth of 6.9%. Volumes advanced 2.2% during the quarter, with momentum in construction & demolition (+8.3%) and special waste volumes (+13%). Adj-EBITDA margin contracted to 29.2% (-130 bps Y/Y) as acquisition-related costs weighed on margins. RSG reaffirmed acquisitions as the primary target of cash flow, which we see being tuck-in after acquiring U.S. Ecology. We upgrade our view of RSG on accelerating core price growth and shares trading at more attractive levels. / Jonathan Sakraida

September 27, 2022

09:27 AM ET... CFRA Raises Opinion on Industrials to Marketweight from Underweight [RSG 140.51****]:

We raised our recommended exposure to the S&P 500 Industrials sector to marketweight from underweight. The percentage of the sector's CFRA STARS with favorable investment outlooks is now in line with that of the S&P 500. EPS growth is seen exceeding that of the S&P 500 not only in Q3, but also for all of 2022 and 2023. In addition, the group appears oversold and should benefit from a possible near-term relief rally. Finally, the sector's technical outlook, based on its 40-week relative strength, recently improved to neutral from negative. / Sam Stovall

August 05, 2022

09:14 AM ET... CFRA Keeps Hold Opinion on Shares of Republic Services, Inc. [RSG 141.54****]:

We raise our 12-month target price by \$7 to \$145, valuing the shares at 30.1x our 2022 EPS estimate of \$4.81 (lifted from \$4.73), above the 3-year historical average of 27.6x given our outlook for continued strength in core pricing growth and market share expansion via acquisitions. We increase our 2023 EPS estimate to \$5.36 from \$5.23. RSG posted Q2 adj-EPS of \$1.32 vs. \$1.09 (+21%), beating the consensus forecast by \$0.14. Q2 revenue increased 21.4% (+11.1% organic; +10.3% from acquisitions), with core price growing sales by 6.2%. Average yield rose to 5.0% (4.2% in Q1) and volumes were up 2.4%. RSG's adj-EBITDA margin contracted 100 basis points Y/Y to 29.6%, reflecting impacts from acquisitions (primarily US Ecology) and elevated fuel costs. With the US Ecology deal closed, we see RSG focusing on tuck-in acquisitions within its core business (solid waste/recycling). / Jonathan Sakraida

May 06, 2022

12:28 AM ET... CFRA Maintains Hold Opinion on Shares of Republic Services, Inc. [RSG 130.33****]:

We increase our 12-month target price by \$3 to \$138, valuing the shares at 29.2x our 2022 EPS estimate of \$4.73 (raised from \$4.65), above the 3-year historical average of 27.5x given our outlook for continued strength in core pricing growth and market share expansion via acquisitions. We lift our 2023 EPS estimate to \$5.23 from \$5.15. RSG posted Q1 adjusted EPS of \$1.14 vs. \$0.93, beating the consensus estimate by \$0.09. Q1 sales rose 14%, with core price reaching an all-time high of 6%. Average yield increased to 4.2% and volumes were up 3.6%. Operating adjusted EBITDA margins fell to 30.4%, 30 bps lower vs. the previous year, due to elevated fuel and acquisition costs in the quarter. We keep a positive view on RSG's recent efforts to differentiate its business with the acquisition of US Ecology and an increased focus on renewable natural gas projects. We see RSG continuing to prioritize acquisitions over organic growth investments in the coming quarters. / Jonathan Sakraida

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsize the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes [paid in the country of origin].

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Republic Services, Inc.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section of the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.
