Analysis prepared by **Adrian Ng, CFA** on Jul 24, 2023 03:41 AM ET, when the stock traded at **NOK 110.40**.

Highlights

- ▶ Telenor's H1 2023 total revenue grew 4% organically as service revenues increased 4%. In the Nordics, organic service revenues grew 3% as service revenues increased 2% in Norway, 5% in Sweden, and 6% in Finland, with pricing initiatives driving growth in the three countries. Service revenue in Denmark was better in the second quarter, leading to a flat service revenue in H1 2023 Y/Y. In Asia (now mainly Bangladesh and Pakistan as well as the associate accounting of JVs in Thailand and Malaysia), service revenues grew by 3% with data monetization being the leading factor in both countries. There was a strong rebound in Bangladesh (+4%) as the ban on new SIM sales was lifted in January 2023 while service revenue in Pakistan grew slightly. The JV contributions from Malaysia and Thailand were positive for the period but were offset by write down of investment in Telenor Microfinance Bank.
- ▶ We see a stable revenue and slightly lower EBITDA, as its direct result is now concentrated in the Nordics. H1 2023 organic EBITDA was up 3% with benefits of service revenue growth offset by increased energy costs and the revenue reversal in Denmark.
- ▶ Our 2023 EPS estimate is NOK7.00 and 2024 EPS estimate is NOK7.70.

Investment Rationale/Risk

- ▶ Our recommendation is 4-STARS [Buy]. Telenor's global spread proved to be a liability as it was exposed to a more varied government response against the Covid-19 pandemic vs. peers. Telenor's move to merge its operations in Malaysia with Malaysia's Axiata and Thai operations with CP Group should put Telenor in a manageable position, in our opinion. Its decision to exit Myanmar also removes a major source of uncertainty for the Group. For 2023, Telenor is guiding for: (i) low to mid single digit service revenue and EBITDA growth in the Nordics; and (ii) a capex to sales ratio excluding licenses and spectrum of around 17%.
- ▶ Key downside risks that may prompt us to increase our target price and/or recommendation include: (i) an economic downturn in Scandinavia, (ii) high capex continuing to put pressure on dividends, (iii) unexpected currency losses, and (iv) macroeconomic issues affecting its emerging markets.
- ▶ Our 12-month target price of NOK130 represents a 6.7x 2023 consensus EV/EBITDA, similar to its historical averages of ~6.5x. We like Telenor's dividend yield and business and we turn positive as it reorganizes its portfolio.

Analyst's Risk Assessment

LOW MEDIUM HIGH

Our risk assessment reflects Telenor's significant exposure to developing markets in eastern Europe and Asia. Its recent exit from Myanmar improved its geographical risk exposure, in our opinion. Telenor has also gone into deals to reduce its exposure in Thailand and Malaysia, concentrating its geographical exposure further.

Telenor ASA

Business Summary Jul 24, 2023

CORPORATE OVERVIEW: Founded in 1855, Telenor Group [TEL] is the leading provider of telecommunications services in Norway, and has substantial international operations across Europe and Asia in mobile, fixed, and broadcast communications. It is circa 54% owned by the Norwegian state. It has mobile operations in nine markets and an additional 12 markets through its 9% stake in VEON Ltd. TEL is active in the Nordics [Norway, Sweden, Denmark, and Finland] and Emerging Asia [Bangladesh and Pakistan], giving it a balanced exposure. The emerging market exposure presents TEL with more compelling growth opportunities relative to many of its European peers, but comes with economic and political risks.

Previously TEL had a major presence in Malaysia and Thailand. By 2023, TEL has merged its operations in Malaysia with Malaysia’s Axiata and Thai operations with CP Group’s True Corporation, both of which are now held as associated companies with TEL holding a 33.1% and 30.2% stake, respectively.

DIVISIONS: Mobile operations are the primary revenue generator and growth driver for the overall company. TEL holds controlling interests in mobile operations in Norway, Sweden, Denmark, Finland, Thailand, Malaysia, Bangladesh, Pakistan, and Myanmar. In total, the group has 186 million mobile subscribers, making it one of the world’s largest mobile operators. It has additional exposure to 12 other markets through a minority stake in VEON. While we expect only moderate revenue growth from its Nordic operations [these markets are mature with high penetration rates], we do see opportunities for further subscriber and usage expansion in a number of TEL’s emerging market operations in Asia.

Fixed operations provide solutions to both the business and residential markets, including analog and digital telephony, broadband data and voice services, internet access, data services, and leased lines. Activities are concentrated in Norway, Sweden, and Denmark. The ongoing focus is broadband data and corporate Internet Protocol services as traditional fixed telephony subscribers continue to decline. We expect further pressure on fixed operations in the coming years from the more aggressive promotion of mobile broadband services, particularly in Sweden and Denmark, where we believe TEL lacks sufficient scale.

Broadcast includes TV-based applications across the Nordic region with a focus on satellite dish, cable TV, cable internet access, and satellite master antenna TV. Canal Digital Satellite provides direct-to-home TV broadcasting services to more than 793,000 customers in the Nordic region. Instead of competing directly with streaming services such as Netflix, Canal Digital integrates the streaming giant into its OnePlace service, which delivers Ultra HD on set top boxes and personal video recorders via satellite and OTT to the Nordic region.

Other units include activities falling outside the three main business segments and various staff and support functions. Operations include Global Wholesale [international wholesale communication], Telenor Maritime [at sea and marine communication], Telenor Connexion [Internet of Things solutions], and Tapad [marketing technology]. Many of Norway’s successful technology companies were spin-offs of TEL’s R&D projects, for instance, Eltek or Opera.

FINANCIAL TRENDS. In the 5-year period ending 2022, Telenor recorded a revenue CAGR of -2.5% and EBITDA CAGR of -5.8%, coming from its divestments in recent years. Excluding divestments, we see a similar financial trend for TEL as we do its peers, with low single-digit service revenue growth and flat-ish EBITDAaL.

Telenor ASA

Industry Outlook

The European Telecoms industry includes traditional telecommunication services and alternative carriers. This includes well-established telecoms such as Deutsche Telekom, Orange, Vodafone, and Telefonica. The industry is considered defensive with high barriers to entry and slow and steady cash generating abilities. However, it has seen some disruption with the rise of MVNOs and other discount operators.

We are neutral on the European Telecoms Services industry. Industry revenues continued on a recovery trajectory in 2023 as roaming revenues returned in the year. We believe heavier travel in the second half of the year will give a better indication of post-Covid-19 performance for the industry. Equipment sales have not shined as much in the year so far, as recent equipment launches have not been as exciting. As a result, margins have improved slightly in the year as the lower margins of equipment sales have historically depressed industry margins. The industry is still looking towards cost controls to protect margins as pricing power in the industry remains rather weak.

The capex needs of European telecom companies will remain high in 2023, with many telcos increasingly racing to widen their 5G coverage. On the other hand, cash flows are likely to improve in the industry overall as 5G auctions have concluded. There have been slight improvements to ARPU in the industry as 5G services get rolled out. We think the improvements in ARPU will remain limited and the impact will be lower than the market expects as fast internet becomes more commoditized. On the other hand, we do believe that telcos that are faster to deploy 5G will have better retention and customer adds.

Market interest has shifted from the infrastructure assets of telcos (towers and cable assets), which has proven to have strong monetization potential, to industry consolidation as it became increasingly challenging in many of Europe's saturated telco markets. In 2023, Orange and MasMovil announced the merging of their Spanish operations, while Vodafone and Three U.K.

announced plans to merge their U.K. operations. Both planned mergers are expected to face heavy regulatory scrutiny, and we believe the results will likely influence the prevalence of M&A deals in the industry moving forward.

Overall, we are neutral on the European Telecoms industry as we think the challenges faced by the industries within are balanced by attractive valuations.

Telenor ASA

Analyst Research Notes and other Company News

July 21, 2023

10:50 AM ET... CFRA Maintains Buy Opinion on Shares of Telenor ASA [TEL NO 110.08***]:

We keep our Buy recommendation for Telenor with the same target of NOK130, implying a 6.7x 2023 consensus EV/EBITDA, similar to its historical average of about 6.5x. We like Telenor's dividend yield and business and we turn positive as it reorganizes its portfolio. Telenor's 1H 2023 total revenue grew 4% organically as service revenues increased 4% while 1H 2023 organic EBITDA was up 3%. In the Nordics, organic service revenues grew 3% with pricing initiatives driving growth in the three countries. In Asia (now mainly Bangladesh and Pakistan as well as the associate accounting of JVs in Thailand and Malaysia) service revenues grew by 3% with data monetization being the leading factor in both countries. There was a strong rebound in Bangladesh [+4%] as the ban on new SIM sales was lifted in January 2023, while service revenue in Pakistan grew slightly. The JV contributions from Malaysia and Thailand were positive for the period, but were offset by the write-down of investments in Telenor Microfinance Bank. / Adrian Ng, CFA

May 05, 2023

06:06 AM ET... CFRA Maintains Buy Opinion on Shares of Telenor [TEL NO 128.40***]:

We maintain our Buy recommendation for Telenor with a higher target price of NOK130 [NOK120], implying a 6.7x 2023 consensus EV/EBITDA, similar to its historical averages of ~6.5x. We like Telenor's dividend yield and business, and we turn positive as it reorganizes its portfolio. Telenor's Q1 2023 total revenue grew 4% organically as service revenues increased 3%. In the Nordics, total service revenues grew 3% with positive developments in Norway, Finland, and Sweden, while Denmark was impacted by a service revenue reversal. In Asia (now mainly Bangladesh and Pakistan as well as the associate accounting of JVs in Thailand and Malaysia), service revenues grew by 2% with a positive ARPU development in both countries. Q1 2023 organic EBITDA was up 2% with benefits of service revenue growth offset by increased energy costs and the revenue reversal in Denmark. Telenor's direct results are now concentrated in the Nordics. We keep our 2023-2024 EPS forecasts unchanged. / Adrian Ng, CFA

February 03, 2023

05:09 AM ET... CFRA Raises Opinion on Shares of Telenor to Buy from Hold [TEL NO 110.80***]:

We raise our opinion on shares of Telenor to Buy from Hold with a higher target price of NOK120 [NOK100], implying 6.6x 2023 consensus EV/EBITDA, similar to its historical averages of ~6.5x. We like Telenor's dividend yield and business, and we turn positive as it reorganizes its portfolio. Q4 2022 total revenue grew 1.5% organically as service revenues increased 1.9%. Service revenue in the Nordics grew at mid to high single-digit percentages while its operations in Thailand and Pakistan decreased. 2022 organic EBITDA was up 0.5% boosted by a one-off gain in Pakistan offsetting higher energy prices. We see a stable revenue and slightly lower EBITDA, as Telenor merges its operations in Malaysia and Thailand with local rivals, and it concentrates direct results into the Nordics. Our 2023 EPS estimate is NOK7.00 [NOK8.00] and 2024 EPS estimate is NOK7.70, accounting for the M&A impact in Asia. We are positive on the new focus in the Nordics as Telenor as a Group becomes more manageable. / Adrian Ng, CFA

October 27, 2022

07:40 AM ET... CFRA Maintains Hold Opinion on Shares of Telenor [TEL NO 90.00***]:

We keep our Hold opinion on Telenor with a lower target price of NOK100 [NOK138], implying 5.4x 2023 consensus EV/EBITDA, around two standard deviations below its historical averages of ~6.5x. While we like Telenor's dividend yield and business, we remain neutral given the volatile energy market. Q3 2022 total revenue grew 4.5% organically as service revenues increased 2.5% with good growth in Scandinavia and lower ARPU hurting Asia. Q3 2022 organic EBITDA was up 2.5% boosted by a one-off gain in Pakistan relating to a positive court ruling offsetting higher energy prices. We lower our 2023 EPS estimate to NOK8 [NOK8.70] accounting for M&A and energy costs. Thanks to the previously mentioned one-off gain in Pakistan, Telenor reaffirmed its 2022 guidance excluding Malaysia of: [i] low single digit service revenue growth; [ii] organic EBITDA at level vs. 2021; and [iii] a capex to sales ratio excluding licenses and spectrum of about 16% to 17%. / Adrian Ng, CFA

July 21, 2022

08:16 AM ET... CFRA Maintains Hold Opinion on Shares of Telenor [TEL NO

115.65***):

We keep our Hold opinion on Telenor with a lower target price of NOK138 [NOK145], implying 6.5x 2022 consensus EV/EBITDA, around its historical averages of ~6.5x. We view the valuation as justified, balancing out its volatile and stable markets. Telenor's Q2 2022 total revenue grew 2.2% organically as service revenues increased 1.5%, reversing the decline in Q1 2022. Subscription and traffic revenues decreased 1% in Norway but grew 2% in Sweden, 5% in Denmark, and 3% in Finland respectively. In Asia, service revenues declined in Thailand [-3%] and Malaysia [-1%] but grew in Bangladesh [+6%] and Pakistan [+2%]. Q2 2022 organic EBITDA was flat [+0.3%] with negative effects from reduced copper revenues in Norway offset by other positive items. Telenor has confirmed its guidance for low single digit service revenue growth but now sees flat organic EBITDA in 2022 [previous guidance stated 'slightly higher']. / Adrian Ng, CFA

May 05, 2022

01:28 AM ET... CFRA Maintains Hold Opinion on Shares of Telenor [TEL NO 134.00***]:

We keep our Hold opinion on Telenor with a lower target price of NOK145 [from NOK160], implying 6.5x 2022 consensus EV/EBITDA, around its historical averages of ~6.5x. We view the valuation as justified, balancing out its volatile and stable markets. We lower our 2022 EPS estimate to NOK8.00 [from NOK9.00] and 2023 EPS estimate of NOK8.70 [from NOK9.20] as we continue to work in the full implications of the M&A actions in Asia. Telenor's Q1 2022 total revenue grew 0.5% organically as subscription and traffic revenues decreased 1.4% with declines in most markets on a strengthening Norwegian Kroner. Q1 2022 organic EBITDA was down 2.5% with negative effects from reduced copper revenues in Norway. We continue to see stable revenue and slightly lower EBITDA as we think there will be some initial negative impact on EBITDA on corporate activity. Telenor has confirmed its guidance for low single-digit service revenue growth and flat or slightly higher organic EBITDA in 2022. / Adrian Ng, CFA

February 04, 2022

07:04 AM ET... CFRA Maintains Hold Opinion on Shares of Telenor [TEL NO 139.75***]:

We keep our Hold opinion on Telenor with the same target price of NOK160, implying 6.8x 2022 consensus EV/EBITDA, around its historical averages of ~6.5x. We view the valuation as justified, balancing out its volatile and stable markets. We see a stable revenue and slightly lower EBITDA, as Telenor merges its operations in Malaysia and Thailand with local rivals Axiata and CP Group respectively. We believe this will have some initial negative impact on the group EBITDA owing to corporate activities. 2021 organic revenue grew 1.2% on the back of stable subscription and traffic revenues growth while organic EBITDA was down 0.2% with negative effects from higher energy prices offset by solid opex reductions. We lower our 2022 EPS estimate to NOK9.0 [NOK10.2] and introduce 2023 EPS estimate of NOK9.2 as we continue to work in the full implications of the Thai merger. / Adrian Ng, CFA

Forecasts are not reliable indicator of future performance.
Note: A company's earnings outlook plays a major part in any investment decision. S&P Global Market Intelligence organizes the earnings estimates of over 2,300 Wall Street analysts, and provides their consensus of earnings over the next two years, as well as how those earnings estimates have changed over time. Note that the information provided in relation to consensus estimates is not intended to predict actual results and should not be taken as a reliable indicator of future performance.
Note: For all tables, graphs and charts in this report that do not cite any reference or source, the source is S&P Global Market Intelligence.

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index (MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index)], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsule the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share (EPS) estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics, including Fair Value.

Abbreviations Used in Equity Research Reports

- CAGR - Compound Annual Growth Rate
- CAPEX - Capital Expenditures
- CY - Calendar Year
- DCF - Discounted Cash Flow
- DDM - Dividend Discount Model
- EBIT - Earnings Before Interest and Taxes
- EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
- EPS - Earnings Per Share
- EV - Enterprise Value
- FCF - Free Cash Flow
- FFO - Funds From Operations
- FY - Fiscal Year
- P/E - Price/Earnings
- P/NAV - Price to Net Asset Value
- PEG Ratio - P/E-to-Growth Ratio
- PV - Present Value
- R&D - Research & Development
- ROCE - Return on Capital Employed
- ROE Return on Equity
- ROI - Return on Investment
- ROIC - Return on Invested Capital
- ROA - Return on Assets
- SG&A - Selling, General & Administrative Expenses
- SOTP - Sum-of-The-Parts
- WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes (paid in the country of origin).

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Telenor ASA

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five [six] model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section seof the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.

STARS Stock Reports:

Global STARS Distribution as of September 30, 2023

Ranking	North America	Europe	Asia	Global
Buy	36.8%	34.5%	41.6%	37.4%
Hold	53.8%	51.2%	50.3%	52.6%
